## precipitation

- ☐ A. any water that falls from the clouds
- ☐ B. the sun lifting water into the air as vapor
- ☐ C. any water that sits still in a lake
- ☐ D. the way a plant breathes water out

## Q4 L.1.5

## evaporation

- ☐ A. any water that falls from the clouds
- ☐ B. water gathering and building up in one place
- ☐ C. the sun lifting water into the air as vapor
- ☐ D. gas cooling and turning into water

**Q5** L.1.5

**sublimation**

- ☐ **A.** cool air changing vapor into water drops
- ☐ **B.** ice turning into gas without melting first
- ☐ **C.** ice melting into water before it dries
- ☐ **D.** the sun lifting water into the air as vapor

**Q6** L.1.5

**transpiration**

- ☐ **A.** the way a plant breathes water out
- ☐ **B.** ice turning into gas without melting first
- ☐ **C.** the endless trip water takes around the earth
- ☐ **D.** water entering a plant through its roots

**Q7** L.1.5

**accumulation**

- ☐ **A.** the way a plant breathes water out
- ☐ **B.** any water that falls from the clouds
- ☐ **C.** water gathering and building up in one place
- ☐ **D.** water spreading out into a thin film

**Directions.** Items 1-4: choose the SYNONYM (same meaning). Items 5-5: choose the ANTONYM (opposite). Items 6-7: choose the word that GOES WITH it.

Q1 L.1.5

**SAME** Choose the synonym of **condensation**:

- ☐ A. gas turning back into drops   ☐ B. drops turning into gas   ☐ C. ice turning into gas  
☐ D. water turning into ice

Q2 L.1.5

**SAME** Choose the synonym of **evaporation**:

- ☐ A. ice turning into water   ☐ B. water turning into gas   ☐ C. gas turning into water  
☐ D. water turning into ice

Q3 L.1.5

**SAME** Choose the synonym of **sublimation**:

- ☐ A. water turning into ice   ☐ B. ice turning into water first   ☐ C. ice turning straight into gas  
☐ D. gas turning straight into ice

Q4 L.1.5

**SAME** Choose the synonym of **transpiration**:

- ☐ A. water entering through plant roots   ☐ B. water freezing inside a plant  
☐ C. water leaving through plant leaves   ☐ D. water stored inside a stem

Q5 L.1.5

**OPPOSITE** Choose the antonym of **accumulation**:

- ☐ A. piling up   ☐ B. drying up   ☐ C. filling up   ☐ D. gathering up

Q6 L.1.5

**GOES WITH** Choose the word that goes with **water cycle**:

- ☐ A. sun   ☐ B. star   ☐ C. moon   ☐ D. comet

**Directions.** Read each short passage. Choose the best meaning of the bold word as it is used.

**Q1** RI.1.4

The **water cycle** never stops. The same water has been going round for ages.

What does **water cycle** mean here?

- ☐ **A.** water going round and round for ages
- ☐ **B.** the one-way trip water takes to the sea
- ☐ **C.** the endless trip water takes around the earth
- ☐ **D.** the machine that cleans dirty water

**Q2** RI.1.4

**Condensation** forms on a cold glass. Little beads of water run down the side.

What does **condensation** mean here?

- ☐ **A.** beads of water on a cold glass
- ☐ **B.** drops warming and turning into gas
- ☐ **C.** gas cooling and turning back into drops
- ☐ **D.** water freezing into hard ice

**Q3** RI.1.4

We measured the **precipitation** all month. April brought the most rain.

What does **precipitation** mean here?

- ☐ **A.** water that soaks into the soil
- ☐ **B.** rain measured through April
- ☐ **C.** water that sits still in a lake
- ☐ **D.** any water that falls from the clouds

**Q4** RI.1.4

**Evaporation** empties the puddle by noon. The sun does all the work.

What does **evaporation** mean here?

- ☐ **A.** a puddle that is empty by noon
- ☐ **B.** water warming and turning into gas
- ☐ **C.** gas cooling and turning into water
- ☐ **D.** water freezing into solid ice

**Q5** RI.1.4

**Sublimation** happens on dry, sunny days. The snow pile gets smaller with no puddle.

What does **sublimation** mean here?

- ☐ **A.** water freezing into a solid block
- ☐ **B.** ice melting into water first
- ☐ **C.** a snow pile that leaves no puddle
- ☐ **D.** ice turning into gas without melting first

**Q6** RI.1.4

**Transpiration** goes on all day. A big tree can give off buckets of water.

What does **transpiration** mean here?

- ☐ **A.** water entering through the roots
- ☐ **B.** water stored inside a thick stem
- ☐ **C.** water leaving a plant through its leaves
- ☐ **D.** a tree giving off buckets of water

**Q7** RI.1.4

**Accumulation** happens in lakes and oceans. That is where the cycle starts again.

What does **accumulation** mean here?

- ☐ **A.** where the whole cycle starts again
- ☐ **B.** water gathering and building up in one place
- ☐ **C.** water rushing down a steep hill
- ☐ **D.** water spreading into a thin film

## Water Cycle

Water never stops moving. That is why we call it the **(1)** \_\_\_\_\_. The sun heats a lake, and **(2)** \_\_\_\_\_ turns that water into gas. Plants add more through **(3)** \_\_\_\_\_, when water leaves their leaves. Up high the gas cools, and **(4)** \_\_\_\_\_ turns it back into tiny drops that make a cloud. When the drops grow heavy, they fall as **(5)** \_\_\_\_\_. On a cold, dry, sunny day, snow can skip the melting step, and that is **(6)** \_\_\_\_\_. In the end all the water gathers in lakes and seas. We call that **(7)** \_\_\_\_\_, and then the whole trip begins again.
