4 Read & Infer

Set 2 · Story 2. Mariana Trench · Part 4 of 6

CCSS RI.4.4 · L.4.4

Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.4.4

The lowest place in the world is at the bottom of the Mariana **Trench**. It is a long, deep valley in the floor of the Pacific Ocean.

What does **trench** mean here?

- ○ **A.** a group of islands in the Pacific Ocean
- ○ **B.** a tall mountain near China
- ○ **C.** a tall hill that rises above the land
- ○ **D.** a long, narrow ditch or groove in the ground or sea floor

Q2 RI.4.4

The Mariana Trench is a long valley in the floor of the Pacific Ocean. Inside that **groove** in the ocean floor is the Challenger Deep.

What does **groove** mean here?

- ○ **A.** a tall, pointed peak that sticks up
- ○ **B.** the coldest spot in the ocean
- ○ **C.** a long, narrow cut or low path in a surface
- ○ **D.** a boat that dives deep underwater

Q3 RI.4.4

This enormous trench **extends** for about 1,554 miles from one end to the other. It could stretch from New York City almost to Denver.

What does **extends** mean here?

- ○ **A.** to fill with water
- ○ **B.** to stretch out over a distance
- ○ **C.** to walk at a quick pace
- ○ **D.** to stop at a short, close point

Q4 RI.4.4

The Mariana Trench averages about 45 miles wide. A person walking at a **brisk** pace would need about ten hours to go from one side to the other.

What does **brisk** mean here?

- **A.** quick and full of energy
- **B.** slow and tired
- **C.** very wide and deep
- **D.** cold and wet

Q5 RI.4.4

Conditions are very harsh at the **summit** of Mount Everest. Temperatures average -33 degrees Fahrenheit, and winter winds howl at more than 100 miles an hour.

What does **summit** mean here?

- **A.** the bottom of a deep valley
- **B.** the cold winds that howl
- **C.** the deepest spot in the ocean
- **D.** the top or highest point of a mountain

Q6 RI.4.4

Conditions are very **harsh** at the summit of Mount Everest. Temperatures average -33 degrees Fahrenheit, and winds howl at more than 100 miles an hour.

What does **harsh** mean here?

- **A.** very tall and famous
- **B.** warm and sunny
- **C.** very rough, cold, or hard to live in
- **D.** mild, calm, and easy

Q7 RI.4.4

Conditions are very harsh at the summit of Mount Everest. Yet climbers have reached the top and **lived to tell about it**.

What does **lived to tell about it** mean here?

- **A.** to climb a mountain alone
- **B.** to tell a story about a mountain
- **C.** to make it through something very risky and survive
- **D.** to give up before trying something hard

Q8 RI.4.4

In the Challenger Deep, the water is about 36 degrees Fahrenheit. The human body **shuts down** quickly in water that cold.

What does **shuts down** mean here?

- **A.** to stop working
- **B.** to grow very strong
- **C.** to swim to the surface
- **D.** to start running faster

Q9 RI.4.4

A person on the ocean floor would be **crushed** by the weight of the water. At the deepest point, water would press down with a weight heavier than hundreds of elephants.

What does **crushed** mean here?

- **A.** to blow air into something to make it bigger
- **B.** to freeze in very cold water
- **C.** to float up toward the light
- **D.** to press something so hard that it breaks or loses its shape

Q10 RI.4.4

Why is it pitch dark in the deep ocean? Water **absorbs** and scatters sunlight, so little light remains after 660 feet.

What does **absorbs** mean here?

- **A.** to freeze into ice
- **B.** to take in or soak up something
- **C.** to make a glowing light
- **D.** to push something away

Q11 RI.4.4

Beyond 660 feet is a twilight zone, where the human eye cannot see colors. This zone of **faint** light goes down to about 3,300 feet.

What does **faint** mean here?

- **A.** full of bright colors
- **B.** hot and steamy
- **C.** weak and hard to see or hear
- **D.** bright, strong, and easy to see

Q12 RI.4.4

No human could survive in the Challenger Deep. However, living things do **thrive** in the Mariana Trench.

What does **thrive** mean here?

- ○ **A.** to swim to the surface
- ○ **B.** to grow well and be healthy
- ○ **C.** to glow in the dark
- ○ **D.** to just barely stay alive

Q13 RI.4.4

Some creatures in the Mariana Trench look like deep-sea movie monsters or survivors from **prehistoric** times.

What does **prehistoric** mean here?

- ○ **A.** from deep under the sea
- ○ **B.** from a time long, long ago, before people wrote things down
- ○ **C.** from just a few years ago
- ○ **D.** from a scary movie

Q14 RI.4.4

Some deep-sea creatures can produce a glowing light, like fireflies. Creatures use this light to attract **prey**.

What does **prey** mean here?

- ○ **A.** an animal that is hunted and eaten by another animal
- ○ **B.** a light that glows like a firefly
- ○ **C.** a plant that grows on the sea floor
- ○ **D.** an animal that hunts others for food

Q15 RI.4.4

The flashlight fish **lurks** in the dark water and turns its light on and off. When a curious fish approaches, it becomes dinner!

What does **lurks** mean here?

- ○ **A.** to swim in a big group
- ○ **B.** to turn a light on and off
- ○ **C.** to show yourself out in the open
- ○ **D.** to hide and wait, often before attacking

Q16 RI.4.4

Certain types of crabs and bacteria thrive in the Mariana Trench. The extreme temperatures and pressure of the deep ocean are **vital** to these organisms.

What does **vital** mean here?

- **A.** easy to find anywhere
- **B.** too cold and dark
- **C.** needed for life; very important
- **D.** nice to have but not important

Q17 RI.4.4

The ROV Kaiko scooped up samples of mud from the trench floor. Scientists found tiny **organisms** in those samples that are Earth's deepest living creatures.

What does **organisms** mean here?

- **A.** the samples of mud from the floor
- **B.** the rocks and minerals that are not alive
- **C.** the ships that sail above
- **D.** the living things, such as plants, animals, and bacteria

Q18 RI.4.4

In 1951 the British Royal Navy **vessel** HMS Challenger II returned to the area. It used a modern device to measure the ocean depth.

What does **vessel** mean here?

- **A.** a large boat or ship
- **B.** a machine that measures depth
- **C.** a small car that drives on roads
- **D.** a deep spot in the ocean

Q19 RI.4.4

Don Walsh and Jacques Piccard spent just twenty minutes at the bottom during their **descent** in the Trieste submersible in 1960.

What does **descent** mean here?

- **A.** a trip or movement upward
- **B.** a trip or movement downward
- **C.** a long talk with a friend
- **D.** a quick trip to the moon

Q20 RI.4.4

People got their first **glimpse** of the Challenger Deep in 1960. That year, Jacques Piccard and Don Walsh traveled to the bottom.

What does **glimpse** mean here?

- **A.** a deep hole in the sea floor
- **B.** a long, careful look at something
- **C.** a very quick look at something
- **D.** a loud sound under water

Q21 RI.4.4

In 1960, Piccard and Walsh rode in the Trieste, a **submersible** vehicle. Small submarines of this kind are built to withstand extreme underwater pressure.

What does **submersible** mean here?

- **A.** able to fly high in the sky
- **B.** able to go or work under water
- **C.** very old and broken
- **D.** made of soft, bendy plastic

Q22 RI.4.4

Small submarines of this kind are built to **withstand** extreme underwater pressure. They usually carry scientific instruments for exploring the deep ocean.

What does **withstand** mean here?

- **A.** to float on the surface
- **B.** to break easily under a little push
- **C.** to carry scientific tools
- **D.** to be strong enough not to be hurt or broken by something

Q23 RI.4.4

Some vehicles are **remotely** operated vehicles, or ROVs. Scientists control these through cables from a ship on the surface.

What does **remotely** mean here?

- **A.** very slowly and carefully
- **B.** by being right there in person
- **C.** without any computers at all
- **D.** from far away, by using controls or cables

Q24 RI.4.4

Others are **autonomous** underwater vehicles, or AUVs. These explore on their own without any connection to another ship.

What does **autonomous** mean here?

- **A.** needing someone else to control it
- **B.** able to measure the ocean depth
- **C.** able to control itself without help
- **D.** connected to a ship by cables

Q25 RI.4.4

AUVs explore on their own without any connection to another ship. AUVs **navigate** with onboard computers and record data from the areas they explore.

What does **navigate** mean here?

- **A.** to find the way and steer from place to place
- **B.** to record data in a notebook
- **C.** to get lost and go nowhere
- **D.** to sink to the bottom

Q26 RI.4.4

In the 1990s, Japanese ROVs explored the Mariana Trench. The ROV Kaiko **scooped up** samples of mud from the trench floor for scientists to study.

What does **scooped up** mean here?

- **A.** to watch fish through a window
- **B.** to pick something up with a curved tool or with your hands
- **C.** to pour something out onto the ground
- **D.** to measure how deep the water is

Q27 RI.4.4

In 1960, Don Walsh and Jacques Piccard rode the Trieste to the bottom of the trench. At the bottom, they **relayed** their depth to their team.

What does **relayed** mean here?

- **A.** to send a message or information on to another person
- **B.** to keep a secret and tell no one
- **C.** to steer a vehicle with a computer
- **D.** to measure how cold the water is

Q28 RI.4.4

The Mariana Trench is not threatened by humans. But the Mariana Islands on its edge are home to many **endangered** species of fish and marine plants.

What does **endangered** mean here?

- ○ **A.** glowing in the dark
- ○ **B.** living deep in the trench
- ○ **C.** living in large numbers everywhere
- ○ **D.** at risk of disappearing from Earth forever

Q29 RI.4.4

The future of the Mariana Trench seems very safe. However, movements of Earth's plates may **eventually** change the Mariana Trench.

What does **eventually** mean here?

- ○ **A.** in the end, after a long time
- ○ **B.** every single day
- ○ **C.** by accident
- ○ **D.** right away, with no waiting

Q30 RI.4.4

In Trieste's very **cramped** space, Walsh and Piccard spent five hours descending 35,814 feet. At the bottom, they relayed their depth to their team.

What does **cramped** mean here?

- ○ **A.** large and roomy, with lots of space
- ○ **B.** made of thick steel
- ○ **C.** too small, with not enough room to move
- ○ **D.** lit by a bright headlight

CCSS RI.4.4 · L.4.4

Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.4.4

A huge field in eastern Pennsylvania is full of **mysterious** rocks. When hit with a hammer, these rocks ring like bells.

What does **mysterious** mean here?

- ○ **A.** loud and ringing like a bell
- ○ **B.** strange and hard to explain or understand
- ○ **C.** plain and easy to explain
- ○ **D.** dark and full of iron

Q2 RI.4.4

At Ringing Rocks County Park, visitors enjoy tapping the **boulders** to hear the sounds they make.

What does **boulders** mean here?

- ○ **A.** little pebbles you can hold in one hand
- ○ **B.** deep holes in the ground
- ○ **C.** large rocks that are too heavy to lift easily
- ○ **D.** loud bells that ring in concerts

Q3 RI.4.4

The ringing rocks are made of diabase, a dark, igneous, or **volcanic**, rock. Scientists have shown that all of the rocks ring.

What does **volcanic** mean here?

- ○ **A.** made of soft clay
- ○ **B.** made by water slowly dripping
- ○ **C.** made of shiny metal
- ○ **D.** formed from hot, melted rock that rose up from deep inside Earth

Q4 RI.4.4

Scientists have shown that all of the ringing rocks ring. Some of the rocks **produce** sounds too low for humans to hear.

What does **produce** mean here?

- **A.** to make or create something
- **B.** to stop making noise
- **C.** to break into small pieces
- **D.** to destroy something completely

Q5 RI.4.4

Some scientists think high levels of iron in the rocks produce the ringing. Another **theory** points to stress caused by repeated freezing and thawing.

What does **theory** mean here?

- **A.** a fact that everyone already knows is true
- **B.** an idea that tries to explain why something happens
- **C.** a hammer used to hit rocks
- **D.** a concert played by musicians

Q6 RI.4.4

Another theory points to stress caused by **repeated** freezing and thawing. The rocks and their sounds still need more study.

What does **repeated** mean here?

- **A.** happening only one single time
- **B.** very cold and icy
- **C.** loud and ringing
- **D.** happening again and again

Q7 RI.4.4

The rocks and their sounds still need more study. **In the meantime**, the musical rocks provide great entertainment.

What does **in the meantime** mean here?

- **A.** after a very long time
- **B.** while waiting for something else to happen
- **C.** during a short concert
- **D.** long after everything is finished

Q8 RI.4.4

The rocks and their sounds still need more study. In the meantime, the musical rocks provide great **entertainment**.

What does **entertainment** mean here?

- **A.** a heavy hammer for hitting rocks
- **B.** a careful science study
- **C.** something people enjoy watching or listening to for fun
- **D.** a boring job that nobody enjoys

Q9 RI.4.4

The small flame under the waterfall may have been burning, on and off, for a thousand years. People call it '**eternal**,' even though hikers sometimes have to relight it.

What does **eternal** mean here?

- **A.** lasting forever, with no end
- **B.** lasting only a few seconds
- **C.** very hot and bright
- **D.** hidden behind a waterfall

Q10 RI.4.4

Long-lasting flames burn in other places, too. Many are **linked to** mines or volcanoes.

What does **linked to** mean here?

- **A.** to be named after something
- **B.** to be joined to something or connected with it
- **C.** to burn under a waterfall
- **D.** to ring like a bell when tapped

Q11 RI.4.4

Shale is a type of sedimentary rock. It contains fossilized **organic** matter, the remains of ancient plants.

What does **organic** mean here?

- **A.** made in a factory
- **B.** made of shiny glass
- **C.** made from things that were never alive
- **D.** made from things that were once alive

Q12 RI.4.4

The gas forms from decaying organic matter and **seeps out** from shale rocks. The natural gas produces a flame up to 8 inches tall.

What does **seeps out** mean here?

- **A.** to rush out in a sudden, huge burst
- **B.** to slowly leak out through small holes or cracks
- **C.** to burn very brightly
- **D.** to blow away in the wind

Q13 RI.4.4

Shale is a type of sedimentary rock that contains fossilized organic matter, the **remains** of ancient plants.

What does **remains** mean here?

- **A.** the brand-new parts that were just made
- **B.** the new plants that grow in spring
- **C.** the parts left over after something has died or been destroyed
- **D.** the flames under a waterfall

Q14 RI.4.4

Shale contains fossilized organic matter, the remains of **ancient** plants. The gas from this matter feeds the Eternal Flame.

What does **ancient** mean here?

- **A.** very hot and burning
- **B.** green and leafy
- **C.** brand-new; made just today
- **D.** very, very old; from long ago

Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.4.4

The Great Barrier Reef is the world's largest system of coral reefs. The reef is home to the most **diverse** mix of marine life on earth.

What does **diverse** mean here?

- ○ **A.** made up of only one kind
- ○ **B.** made of limestone skeletons
- ○ **C.** far away from the coast
- ○ **D.** made up of many different kinds

Q2 RI.4.4

The reef is home to the most diverse mix of **marine** life on earth. Because of this, it is sometimes called 'the rainforest of the sea.'

What does **marine** mean here?

- ○ **A.** having to do with rainforests on land
- ○ **B.** having to do with deserts and dry land
- ○ **C.** having to do with the sea and the things that live in it
- ○ **D.** having to do with outer space

Q3 RI.4.4

It's sixteen hundred miles long along the Queensland coast, the barrier reef whose name is 'Great,' and that's no **idle** boast.

What does **idle** mean here?

- ○ **A.** empty and without real truth or reason behind it
- ○ **B.** loud and full of joy
- ○ **C.** sixteen hundred miles long
- ○ **D.** true, serious, and backed up by facts

Q4 RI.4.4

The barrier reef's name is 'Great,' and that's no idle **boast**. The reef really is sixteen hundred miles long.

What does **boast** mean here?

- **A.** a picture taken from space
- **B.** a proud claim about how great someone or something is
- **C.** a quiet promise to try harder
- **D.** a long coast in Australia

Q5 RI.4.4

The Great Barrier Reef stretches along the coast of Australia. The reef is a living thing, made up of coral polyps and their limestone **skeletons**.

What does **skeletons** mean here?

- **A.** the deep cracks in the ocean floor
- **B.** the hard frames of bone or shell that hold up an animal's body
- **C.** the colorful fish that swim around the reef
- **D.** the soft outer skins that keep animals warm

Q6 RI.4.4

To think, you can be orbiting the earth while looking at a **teeming** turtle, dolphin, whale and porpoise habitat.

What does **teeming** mean here?

- **A.** far away in outer space
- **B.** almost completely empty
- **C.** dark and quiet
- **D.** full of lots of living things moving around

Q7 RI.4.4

The reef is so huge it's visible by astronauts in space. From there, they can look down at a teeming turtle, dolphin, whale and porpoise **habitat**.

What does **habitat** mean here?

- **A.** the natural home of a plant or animal
- **B.** a ship that carries astronauts
- **C.** a swimsuit for diving
- **D.** a store where pet food is sold

Q8 RI.4.4

In Robert Schechter's poem, the speaker asks if you would like to have a look at the reef. You do not need to dive or even get your swimsuit wet to see this **awesome** place.

What does **awesome** mean here?

- **A.** so amazing that it fills you with wonder
- **B.** so old that it is falling apart
- **C.** so scary that it makes you want to run away
- **D.** so tiny that you need a microscope to see it
