CCSS RI.5.4 · L.5.4

Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.5.4

Some places were still a mystery. Who knew, for example, what lay in the stratosphere, that **vast** blue canopy above the clouds?

What does **vast** mean here?

- ○ **A.** very large in size or amount
- ○ **B.** very old and broken
- ○ **C.** very dark and cold
- ○ **D.** very narrow and short

Q2 RI.5.4

The deep sea is dangerous. In deep seas, water may weigh a crushing 8 tons per square inch, enough to **squash** an ordinary submarine like an empty soda can.

What does **squash** mean here?

- ○ **A.** to blow air into something
- ○ **B.** to wash something with soap
- ○ **C.** to throw something very far
- ○ **D.** to press something so hard that it becomes flat or crushed

Q3 RI.5.4

These explorers were different. Unlike adventurers of the past, they were not steely soldiers or **hardy** mariners; rather, they were scientists.

What does **hardy** mean here?

- ○ **A.** weak and easily hurt
- ○ **B.** strong and able to live through hard conditions
- ○ **C.** very quiet and shy
- ○ **D.** very rich and famous

Q4 RI.5.4

The new explorers were scientists. Unlike adventurers of the past, they were not steely soldiers or hardy **mariners**.

What does **mariners** mean here?

- **A.** people such as sailors who navigate ships
- **B.** people who build houses
- **C.** people who grow crops on farms
- **D.** people who fly airplanes

Q5 RI.5.4

Auguste Piccard was a scientist. He grew interested in new theories about the **cosmic** rays that were believed to be active in the stratosphere.

What does **cosmic** mean here?

- **A.** found only at the bottom of the sea
- **B.** found only deep under the ground
- **C.** coming from outer space, beyond Earth and its air
- **D.** made by people in a factory

Q6 RI.5.4

Piccard had a big problem to solve. So how could Piccard **ascend** to seven and a half miles, as he hoped, and still return safely to Earth?

What does **ascend** mean here?

- **A.** to stay still in one place
- **B.** to move from side to side
- **C.** to turn around in a circle
- **D.** to go up or climb

Q7 RI.5.4

Piccard built a special balloon. To make it rise, the canopy was **inflated** with lighter-than-air hydrogen.

What does **inflated** mean here?

- **A.** to cut something into pieces
- **B.** to fill something with air or gas so it gets bigger
- **C.** to paint something a bright color
- **D.** to let all the air out of something

Q8 RI.5.4

The cabin had to be safe up high. Once the balloon had risen to 5,000 feet, the hatches were **sealed** and the cabin became airtight.

What does **sealed** mean here?

- ○ **A.** to cook something slowly
- ○ **B.** to open something wide
- ○ **C.** to close something tightly so nothing can get in or out
- ○ **D.** to wash something carefully

Q9 RI.5.4

Piccard's cabin kept the air pressure the same. The same **principle** applies to the pressurized cabins that are standard on all modern high-flying passenger aircraft.

What does **principle** mean here?

- ○ **A.** a basic rule or law that explains how something works
- ○ **B.** a list of things to buy
- ○ **C.** a short story with a lesson
- ○ **D.** a person who runs a school

Q10 RI.5.4

Piccard and his assistant needed air to breathe. The cabin was **equipped** with around ten hours' supply of pure oxygen and a system for recycling stale air.

What does **equipped** mean here?

- ○ **A.** to give someone or something the tools or supplies needed
- ○ **B.** to lock something with a key
- ○ **C.** to take away the tools someone needs
- ○ **D.** to clean something from top to bottom

Q11 RI.5.4

The first flight began in Germany. On May 26, 1931, the FNRS (the balloon was named after its sponsor) **lifted off** from Augsburg, Germany.

What does **lifted off** mean here?

- ○ **A.** to roll down a hill
- ○ **B.** to stop and rest for a while
- ○ **C.** to sink to the bottom of the sea
- ○ **D.** to leave the ground and rise into the air

Q12 RI.5.4

The second flight went well. **What's more**, they beat their own record.

What does **what's more** mean here?

- **A.** but on the other hand
- **B.** and also; adding to what was just said
- **C.** at the very beginning
- **D.** because of that reason

Q13 RI.5.4

Piccard flew higher than anyone before him. Piccard pushed the world **altitude** record higher and gathered vital information about the stratosphere.

What does **altitude** mean here?

- **A.** the weight of something on a scale
- **B.** the height of something above the sea or the ground
- **C.** the color of something in the sky
- **D.** the speed of something as it moves

Q14 RI.5.4

Piccard learned what cosmic rays were. As it turned out, they were not rays at all, but **minute** space invaders: subatomic particles zooming into Earth's atmosphere.

What does **minute** mean here?

- **A.** very loud and noisy
- **B.** very bright and shiny
- **C.** very slow and heavy
- **D.** extremely small

Q15 RI.5.4

Piccard turned to the deep sea. Working with his son, Jacques, he began to design an extraordinary deep-sea **craft**, or bathyscaphe.

What does **craft** mean here?

- **A.** a building near the sea
- **B.** a tool for digging holes
- **C.** a vehicle such as a boat, submarine, plane, or spaceship
- **D.** a picture painted on paper

Q16 RI.5.4

The new craft had to be very strong. Like the cabin of the FNRS, it was a perfect sphere, but instead of aluminum, its walls were **forged** in steel 5 inches thick.

What does **forged** mean here?

- ○ **A.** to paint a picture on a wall
- ○ **B.** to carve something out of wood
- ○ **C.** to sew pieces of cloth together
- ○ **D.** to shape metal by heating it and hammering it

Q17 RI.5.4

The Trieste needed help to reach the dive site. The USS Wandank then **towed** it to a site above the deepest part of all the world's seas: the mysterious Challenger Deep.

What does **towed** mean here?

- ○ **A.** to paint a boat a new color
- ○ **B.** to push something from behind
- ○ **C.** to park a car in a garage
- ○ **D.** to pull a car, boat, or other vehicle behind another one

Q18 RI.5.4

The Challenger Deep is very deep. The great **gash** in the earth's surface, deeper than Mount Everest is high, lies in the Mariana Trench on the floor of the Pacific Ocean.

What does **gash** mean here?

- ○ **A.** a flat, smooth field
- ○ **B.** a tall, pointed tower
- ○ **C.** a long, deep cut or opening
- ○ **D.** a small round bump

Q19 RI.5.4

The dive began in the morning. At **precisely** 8:23 a.m., they let seawater into the air tanks above them and began a 288-minute descent.

What does **precisely** mean here?

- ○ **A.** in a slow and lazy way
- ○ **B.** at that very moment or amount and no other
- ○ **C.** about, but not exactly
- ○ **D.** in a loud and angry way

Q20 RI.5.4

The dive did not go as planned. To Jacques's surprise and **dismay**, at about 340 feet below the surface, the Trieste came to a stop.

What does **dismay** mean here?

- **A.** the sound of a ringing bell
- **B.** a feeling of shock and worry when something bad happens
- **C.** a feeling of being very sleepy
- **D.** a feeling of being very hungry

Q21 RI.5.4

Jacques knew what to do. After a quick **calculation**, he made his craft less buoyant by releasing some of the gas from the tank above.

What does **calculation** mean here?

- **A.** the act of using math to figure something out
- **B.** the act of drawing a picture
- **C.** the act of telling a joke
- **D.** the act of guessing without thinking

Q22 RI.5.4

Jacques had to make the craft sink. After a quick calculation, he made his craft less **buoyant** by releasing some of the gas from the tank above.

What does **buoyant** mean here?

- **A.** very dry and dusty
- **B.** able to float in water or air
- **C.** very loud and noisy
- **D.** very sharp and pointed

Q23 RI.5.4

Jacques checked the lights. At 1,000 feet, Jacques tested the Trieste's quartz arc lights, **casting** bright white beams into the surrounding sea.

What does **casting** mean here?

- **A.** to send light or a shadow onto something
- **B.** to hide something in the dark
- **C.** to catch a ball with one hand
- **D.** to break something in half

Q24 RI.5.4

The deep sea was very dark. Staring out at the **grim** blackness, the men felt the cabin grow colder and colder.

What does **grim** mean here?

- **A.** loud and silly
- **B.** warm and cozy
- **C.** dark, serious, and frightening
- **D.** bright and cheerful

Q25 RI.5.4

There was a scary moment. Around 18,000 feet, the cabin **sprang a small leak**, which a little later mended itself.

What does **sprang a small leak** mean here?

- **A.** to suddenly get a crack or hole that lets water in or out
- **B.** to sink to the bottom quickly
- **C.** to fill up with fresh air
- **D.** to float to the top quickly

Q26 RI.5.4

The leak did not last long. Around 18,000 feet, the cabin sprang a small leak, which a little later **mended** itself.

What does **mended** mean here?

- **A.** to throw something away
- **B.** to paint something a new color
- **C.** to fix something that is broken or torn
- **D.** to break something into pieces

Q27 RI.5.4

Once the balloon had risen to 5,000 feet, the hatches were sealed and the cabin became **airtight**, so the pressure inside remained constant.

What does **airtight** mean here?

- **A.** very cold and icy
- **B.** made of shiny metal
- **C.** very high up in the sky
- **D.** closed so tightly that no air can get in or out

Q28 RI.5.4

The window cracked, but the men were safe. Luckily the inner layer of Lucite **held fast**, and not long afterward the Trieste came to rest at the bottom of the Challenger Deep.

What does **held fast** mean here?

- **A.** to run away very fast
- **B.** to grow bigger and bigger
- **C.** to hold something in your hands quickly
- **D.** to stay firmly in place and not break or move

Q29 RI.5.4

The men reached the bottom of the sea. It was certainly **eerie** and strange, but at least there were no monsters.

What does **eerie** mean here?

- **A.** strange and a little scary
- **B.** loud and busy
- **C.** warm and friendly
- **D.** clean and new

Q30 RI.5.4

The dive was over. The sailors on the Wandank and the **escorting** destroyer Lewis hurried to winch her from the water and release her crew.

What does **escorting** mean here?

- **A.** to leave someone alone and unprotected
- **B.** to cook food for a crew
- **C.** to go with someone or something to protect or guide it
- **D.** to sell tickets for a trip

Set 4 · Story 4. SpaceShipOne · Part 4 of 6

CCSS RI.5.4 · L.5.4

Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.5.4

The big moment came high above the ground. SpaceShipOne's engine **ignited** right by the mother ship, White Knight, which had just carried it on her underbelly to around 50,000 feet.

What does **ignited** mean here?

- **A.** to fall apart into small pieces
- **B.** to start to burn or to make something start burning
- **C.** to put out a fire with water
- **D.** to cool down slowly

Q2 RI.5.4

Matt loved rockets as a kid. My brother and I even **accidentally** set a field on fire while shooting off our model rockets.

What does **accidentally** mean here?

- **A.** with a careful plan
- **B.** by mistake, without meaning to
- **C.** very loudly
- **D.** very quickly

Q3 RI.5.4

Matt pulled the lever that released SpaceShipOne. "Not nervous for me," he says, "nervous for the pilot that's about to get launched on an **adventurous** flight."

What does **adventurous** mean here?

- **A.** exciting and full of danger or new experiences
- **B.** safe, quiet, and boring
- **C.** short and very cheap
- **D.** slow and easy to plan

Q4 RI.5.4

SpaceShipOne had a special rocket. The rocket on the spaceship was a Lefler 2004, a **hybrid** rocket fueled by a mixture of two substances.

What does **hybrid** mean here?

- **A.** made from only one kind of thing
- **B.** made by mixing two different kinds of things
- **C.** made a very long time ago
- **D.** made to be very small

Q5 RI.5.4

The rocket used two kinds of fuel. It was fueled by a **mixture** of two substances, in this case, laughing gas and synthetic rubber.

What does **mixture** mean here?

- **A.** a list of rules
- **B.** a combination of two or more things put together
- **C.** one thing kept all by itself
- **D.** a tool for cutting wood

Q6 RI.5.4

The rocket fuel was unusual. The rocket was fueled by a mixture of two substances, in this case, laughing gas and **synthetic** rubber.

What does **synthetic** mean here?

- **A.** very old and worn out
- **B.** grown on a farm or in a garden
- **C.** made by people from chemicals, not found in nature
- **D.** very soft and warm

Q7 RI.5.4

The team built a special spacecraft. Our **one-of-a-kind** spacecraft was being built for the Ansari X Prize competition, which was created to help develop the private spaceflight industry.

What does **one-of-a-kind** mean here?

- **A.** very cheap and easy to buy
- **B.** just like many others
- **C.** not like anything else; the only one of its type
- **D.** very old and broken

Q8 RI.5.4

Matt could not tell his family about the secret project. The one **consolation** was that my wife, Kit, also worked at Scaled.

What does **consolation** mean here?

- **A.** something that makes you feel worse
- **B.** something that makes you feel better when things are hard
- **C.** a prize for first place
- **D.** a rule for a game

Q9 RI.5.4

The big test flight was coming. The date was June 21, 2004, and it would prove to be a **historic** day.

What does **historic** mean here?

- **A.** not important at all
- **B.** happening every single day
- **C.** happening only in dreams
- **D.** important enough to be remembered in history

Q10 RI.5.4

The team got ready before sunrise. The sky was still black as we rolled the joined aircraft out of the **hangar**.

What does **hangar** mean here?

- **A.** a long road where planes take off
- **B.** a tower where people watch the sky
- **C.** a small room for pilots to sleep
- **D.** a large building where aircraft are kept

Q11 RI.5.4

Matt's job was to ride in White Knight and pull the lever to release the spaceship. The sound of the rocket engine filled the **cockpit**.

What does **cockpit** mean here?

- **A.** the part of an aircraft where the pilot sits
- **B.** the tail at the back of a plane
- **C.** the wheels under an airplane
- **D.** a deep hole dug in the ground

Q12 RI.5.4

The team knew the flight could be dangerous. Everyone was **aware** of the dangers of this flight.

What does **aware** mean here?

- **A.** afraid of something
- **B.** tired of something
- **C.** not knowing about something
- **D.** knowing about something

Q13 RI.5.4

SpaceShipOne was retired to the Smithsonian. I'm glad that it now hangs in its **rightful** place between Charles Lindbergh's Spirit of St. Louis and Chuck Yeager's Bell X-1.

What does **rightful** mean here?

- **A.** correct and deserved; where something truly belongs
- **B.** on the right-hand side
- **C.** high above the ground
- **D.** very old and dusty

Q14 RI.5.4

The team knew how important the flight was. We all knew what was **at stake** and had left nothing to chance.

What does **at stake** mean here?

- **A.** at risk of being won or lost
- **B.** safely put away
- **C.** finished and done
- **D.** far away and hard to reach

Q15 RI.5.4

The team prepared very carefully. We all knew what was at stake and had **left nothing to chance**.

What does **left nothing to chance** mean here?

- **A.** to give up before starting
- **B.** to take a big risk for fun
- **C.** to plan every detail carefully so nothing would go wrong
- **D.** to do something carelessly and hope for luck

Q16 RI.5.4

Matt got ready for the flight. I tried to calm my nerves as I **strapped** on my parachute.

What does **strapped** mean here?

- **A.** to throw something away
- **B.** to fasten something with a belt or band
- **C.** to paint something a bright color
- **D.** to take something off quickly

Q17 RI.5.4

Matt hoped the flight would go well. If all **worked out** as I expected, this would be our moment of glory.

What does **worked out** mean here?

- **A.** to fall asleep early
- **B.** to run out of time
- **C.** to happen in a good or successful way
- **D.** to go wrong in a bad way

Q18 RI.5.4

The flight was about to begin. As White Knight **taxied** onto the runway carrying SpaceShipOne under her, I looked out at the crowd gathered to watch the flight.

What does **taxied** mean here?

- **A.** to fly very high above the clouds
- **B.** to park in a garage
- **C.** to move slowly along the ground before taking off or after landing
- **D.** to crash into the sea

Q19 RI.5.4

The long flight was hard on Matt. After an hour I was getting sore, but it was worth it to **make history**.

What does **make history** mean here?

- **A.** to do something so important that it will be remembered for a long time
- **B.** to forget something important
- **C.** to read about the past in a book
- **D.** to write a diary every day

Q20 RI.5.4

Matt waited for the big moment. I anticipated the **countdown** for the release of SpaceShipOne.

What does **countdown** mean here?

- **A.** a list of names in a class
- **B.** a map of the night sky
- **C.** the time after a show ends
- **D.** the counting of numbers backward to zero before something starts

Q21 RI.5.4

The flight was big news. News channels all over the world carried the story that the first **civilian** spaceship had made it safely to space and back again.

What does **civilian** mean here?

- **A.** part of the army or navy
- **B.** very old and broken
- **C.** not part of the army or other armed forces
- **D.** very fast and loud

Q22 RI.5.4

NASA spaceships need special launch pads. The large rocket boosters used to get them off the ground create a lot of heat and **exhaust**.

What does **exhaust** mean here?

- **A.** the paint on the outside of a car
- **B.** the water inside a car's radiator
- **C.** the fresh air in a forest
- **D.** the gas that comes out of an engine as it runs

Q23 RI.5.4

Matt got his job at the right time. When Matthew Stinemetze was offered the position of project engineer, he had just finished another project and was able to **jump right in**.

What does **jump right in** mean here?

- **A.** to start doing something right away without waiting
- **B.** to quit a job
- **C.** to fall into a swimming pool
- **D.** to wait a long time before starting

What does **fatally** mean here?

- ○ **A.** in a way that causes death or total failure
- ○ **B.** in a slow and careful way
- ○ **C.** in a small way that is easy to fix
- ○ **D.** in a funny and silly way

Q3 RI.5.4

Landing on Mars was dangerous. If the lander didn't pass through the atmosphere just right, it would burn up from **friction**.

What does **friction** mean here?

- ○ **A.** the light that comes from the sun
- ○ **B.** the pull that keeps things on the ground
- ○ **C.** the rubbing of one thing against another, which slows it and makes heat
- ○ **D.** the water that falls as rain

Q4 RI.5.4

The rover needed help to slow down. A parachute and retrorockets were supposed to slow the rover's descent, but if they didn't **deploy**, the spacecraft would be smashed to a million pieces.

What does **deploy** mean here?

- ○ **A.** to hide something in a box
- ○ **B.** to open up or spread out something so it can be used
- ○ **C.** to paint something a new color
- ○ **D.** to fix something that is broken

Q5 RI.5.4

The rover had a soft cushion for landing. The final stage of landing would be free fall from 30 feet, protected only by a cushion of airbags that **encircled** the robot.

What does **encircled** mean here?

- ○ **A.** to climb to the top of something
- ○ **B.** to cut something in half
- ○ **C.** to form a circle around something
- ○ **D.** to dig a hole under something

Q6 RI.5.4

Someone announced each step of the landing. The first announcement came from the landing manager, who handled the **transition** from flight operations to surface operations.

What does **transition** mean here?

- ○ **A.** a list of things to buy
- ○ **B.** a change from one stage or condition to another
- ○ **C.** a loud noise from a speaker
- ○ **D.** a time when nothing changes at all
