Module Overview

Essential Question: How do living things in a habitat depend on each other?
Quote: "What is not good for the hive is not good for the bee." — Latin Proverb
Big Idea Words (3): habitat, ecosystem, species
Main Stories (workbook 4):

- The Long, Long Journey · Sandra Markle (illus. Mia Posada) · Informational Text
- Sea Otter Pups · Ruth Owen · Informational Text
- At Home in the Wild · Poetry & Song Collection (incl. Joyce Sidman, Alberto Blanco)
- Abuelo and the Three Bears · Jerry Tello (illus. Ana Lopez Escriva) · Folktale

Note. SoT lists 27 core vocabulary words (3 Big Idea + 24 Power Words = 8+4+4+8), in mybook page-order. Quick-Teach and Context Clues strategy words are NOT counted as core vocabulary. Worksheet E is intentionally omitted for M9 — the V3.1 workflow uses 4 worksheets (A·B·C·D). "Mingles" appears on the Long, Long Journey title spread (line 410 of OCR) but its body occurrence was not located in cleaned OCR — flagged in SoT, but the word is verified as a TP-published Power Word.

Answer Distribution (79 Multiple-Choice Items)

Verified counts across Worksheets A (27), B (32), and D (20). Worksheet C is open-response IB and not counted in MCQ balance.

A · 19 · B · 20 · C · 21 · D · 19

Balance enforced via choice-order rotation only — correct-answer meanings and option texts are preserved from the Source of Truth. All 27 SoT vocabulary words covered on Worksheet A in mybook page-order (Big Idea 3 → Long Long Journey 8 → Sea Otter Pups 4 → At Home in the Wild 4 → Abuelo 8).

Voca Trap Items (Worksheet A)

8 of 27 ≈ 30% — meets G2 trap target band (30%).

- Q7 **coast** — polysemy (the edge of land vs. glide through the air)
- Q11 **mingles** — sound-near trap with "mangles" (mingle ≠ mangle)
- Q12 **surface** — polysemy (top of water vs. skating board vs. ocean floor)
- Q15 **crack** — polysemy (joke / line in a wall / whip sound vs. break open)
- Q18 **hide** — polysemy (animal skin in moose poem vs. go where unseen)
- Q19 **wit** — abstract noun (cleverness in song vs. concrete objects)
- Q23 **tucked** — meaning-shift (push gently into place vs. hit / throw / wash)
- Q27 **offered** — opposite-meaning trap "take without asking" (offer = give out)

MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Pond at the Park · **148 words** · Lexile 240–290L · RIT 180–189
- Passage 2 · The Bees and the Apple Tree · **149 words** · Lexile 300–350L · RIT 190–195
- Passage 3 · The Tide Pool · **150 words** · Lexile 360–410L · RIT 195–199
- Passage 4 · The Coral Reef · **150 words** · Lexile 440–500L · RIT 199–200

All four passages within target band 80–150 words; RIT 180→200; Lexile 240L–500L. Each passage models a different facet of the EQ — a freshwater pond food web (everyday Korean park), a bee-apple pollination team (backyard), a tide pool ecosystem (coastal), and a coral reef as a planet-scale habitat needing protection.

Worksheet A — Vocabulary · Answer Key

27 items · CCSS L.2.4 / L.2.5 / L.2.6

BIG IDEA WORDS

Q1 L.2.6

habitat

C

Meaning: a place where plants and animals live and grow. **Source:** SoT Big Idea — OCR line 179.

Q2 L.2.6

ecosystem

C

Meaning: A community of living things and their surroundings that work together as one. **Source:** SoT Big Idea (revised 2026-05-22).

Q3 L.2.6

species

B

Meaning: A group of living things that are the same kind — all polar bears are one species, all pine trees are one species. **Source:** SoT Big Idea (revised 2026-05-22).

POWER WORDS · THE LONG, LONG JOURNEY

Q4 L.2.4

wobbly

D

Evidence: newly hatched chick stands on wobbly legs (SoT, OCR line 471). Shaky and not steady.

Q5 L.2.4

trills

B

Evidence: their mother next to the nest trills softly, and the chicks come running (SoT, OCR line 467). A quick, high, shaking sound.

Q6 L.2.4

crouches

C

Evidence: chick crouches in the grass (SoT, OCR line 628). Bend low to the ground.

Q7 L.2.5 TRAP

coast

A

Source: SoT Power Word — title spread (OCR line 404). Verb sense = glide smoothly without flapping. (Book text uses the noun "the coast," OCR line 726; this item teaches the verb sense.) **Trap:** B "edge of land" — polysemy.

Q8 L.2.4

prances

B

Evidence: young godwit prances on the mudflat (SoT, OCR line 729). Walk with high, playful steps.

Q9 L.2.4

flock

D

Evidence: young female rises with the flock (SoT, OCR lines 793, 819, 824, 831). A large group of birds together.

Q10 L.2.4

route

C

Evidence: flock follows the migration route Alaska to New Zealand (SoT, OCR line 842). A path from one place to another.

Q11 L.2.5 TRAP

mingles

D

Source: SoT Power Word — title spread (OCR line 410). Moves among others and mixes in. **Trap:** B "mangles" — sound-near.

POWER WORDS · SEA OTTER PUPS

Q12 L.2.5 TRAP

surface

A

Evidence: she swims back up to the water's surface (SoT, OCR line 1567). Top layer of water. **Trap:** B "ocean floor" — opposite-meaning.

Q13 L.2.4

wraps

B

Evidence: otter wraps seaweed around its body (SoT, OCR lines 1592, 1596). Cover or wind around.

Q14 L.2.4

attached

C

Evidence: pup stays attached to her mother (SoT, OCR line 1623). Joined or fastened to something.

Q15 L.2.5 TRAP

crack

D

Evidence: otter uses a rock to crack open shellfish (SoT, OCR lines 1548, 1635). Hit hard so it breaks. **Trap:** A "joke" / B "line in wall" — polysemy.

POWER WORDS · AT HOME IN THE WILD

Q16 L.2.4

sheltered

B

Evidence: polar bear mama finds a sheltered winter place (SoT, OCR lines 1931, 2341). Protected from cold/wind/danger.

Q17 L.2.4

weary

C

Evidence: weary cubs ride their mama home (SoT, OCR lines 1949, 1959). Very tired after a long day.

Q18 L.2.5 TRAP

hide

A

Evidence: "moose with a tough, shaggy hide" (SoT, OCR lines 2052, 2094). Animal skin/thick coat. **Trap:** B "go where unseen" — polysemy.

Q19 L.2.5 TRAP

wit

D

Evidence: "The night contains his wit" — The Cricket by Alberto Blanco (SoT, OCR line 2252). Cleverness / smart thinking. **Trap:** concrete-object distractors hide the abstract noun.

POWER WORDS · ABUELO AND THE THREE BEARS

Q20 L.2.4

arrive

B

Evidence: Emilio waits for his cousins to arrive (SoT, OCR lines 2595, 2624, 3233). Reach a place at the end of a trip.

Q21 L.2.4

grumpy

C

Evidence: Papa Bear woke up as grumpy as ever (SoT, OCR line 2634). In a bad mood, easy to anger.

Q22 L.2.4

joking

D

Evidence: "Abuelo, you're joking!" laughed Emilio (SoT, OCR line 2642). Saying something funny you do not really mean.

Q23 L.2.5 TRAP

tucked

B

Evidence: Papa Bear tucked a napkin under his chin (SoT, OCR line 2720). Pushed gently into place to hold. **Trap:** A "hit hard" / C "threw" — meaning-shift.

Q24 L.2.4

stubborn

C

Evidence: Stubborn Papa Bear did not listen to Mama Bear's warning (SoT, OCR line 2824). Refusing to change.

Q25 L.2.4

growled

D

Evidence: "Ay!" he growled, jumping out of his chair (SoT, OCR lines 2826, 3051, 3138). Low, angry sound from the throat.

Q26 L.2.4

shrugged

A

Evidence: "Goldilocks?" Abuelo shrugged (SoT, OCR line 2860). Lift shoulders to show "I don't know."

Q27 L.2.5 TRAP

offered

A

Evidence: "There'll be beans at my house," offered Trencitas (SoT, OCR line 3141). Give or hold out for someone to take. **Trap:** B "take without asking" — opposite-meaning.

Worksheet B — Reading Comprehension · Answer Key

32 items · CCSS RL.2.1–2.9 / RI.2.1–2.6

Story 1 · The Long, Long Journey

INFORMATIONAL · 8 ITEMS

Q1 RI.2.1

A

Evidence: female bar-tailed godwit hatches in the tundra of Alaska (SoT summary_anchor, OCR line 462).

Q2 RI.2.3

D

Evidence: mother trills warning; chick crouches in grass (SoT, OCR lines 467, 628).

Q3 RI.2.3

B

Evidence: wobbly legs → walk → run → prance on mudflat (SoT, OCR lines 471, 729).

Q4 RI.2.3

C

Evidence: peregrine falcon swoops; young godwit crouches low and still (SoT, OCR lines 628, 908).

Q5 RI.2.3

A

Evidence: flock lands on warm coast of New Zealand at journey's end (SoT summary_anchor, OCR line 842 context).

Q6 RI.2.5

B

Source: SoT genre — Informational Text. Real facts about a real bird species.

Q7 RI.2.6

D

Author's Purpose: following one chick shows each step depending on habitat — pedagogical choice that ties to EQ.

Q8 RI.2.2

C

Synthesis: chick grows + flock + habitat = global migration (SoT summary_anchor).

Story 2 · Sea Otter Pups

INFORMATIONAL · 8 ITEMS

Q9 RI.2.1

B

Evidence: sea otters live in cool ocean near kelp (SoT, OCR lines 1216, 1218, 1419, 1421).

Q10 RI.2.3

A

Evidence: mother swims on back, carrying pup on tummy (SoT, OCR line 1595).

Q11 RI.2.3

C

Evidence: otter floats on back and smashes shellfish open with small rock (SoT, OCR line 1569).

Q12 RI.2.3

D

Evidence: sea otters wrap in kelp to avoid drifting while asleep (SoT, OCR line 1426 ecosystem context).

Q13 RI.2.3

A

Evidence: mother teaches pup to swim, dive, find shellfish (SoT, OCR line 1627 + summary_anchor).

Q14 RI.2.8

B

Reasoning: the author's reason — the mother brings a rock so she can smash the clam against it until the shell breaks open (SoT, OCR lines 1565–1571).

Q15 RI.2.6

C

Author's Purpose: photos help reader SEE habitat interdependence (SoT genre — Informational + photographic).

Q16 RI.2.2

D

Synthesis: pup depends on mother + ocean habitat (kelp/shellfish/rocks). EQ alignment.

Story 3 · At Home in the Wild

POETRY & SONG · 8 ITEMS

Q17 RL.2.1

A

Evidence: polar bear mama and cubs romp in cold white snow (SoT, OCR lines 1923, 1942).

Q18 RL.2.4

B

Word Choice: "ravenous" conveys extreme hunger after long winter (SoT, OCR line 2072 + Big Brown Moose Joyce Sidman).

Q19 RL.2.3

C

Evidence: Over in the Meadow lists frogs, fish, birds, wolves, bees (SoT, OCR line 2204).

Q20 RL.2.5

D

Source: SoT genre — Poetry & Song collection. Short lines, rhythm, multiple poems share one topic.

Q21 RL.2.4

A

Word Choice: "The Cricket" (Alberto Blanco) gives a tiny creature a voice — habitat perspective (SoT, OCR line 2249).

Q22 RL.2.6

B

Perspective: "What Rhino Knows" told from rhino's view — what it KNOWS of its habitat (SoT, OCR line 2345).

Q23 RL.2.9

C

Compare: poetry (rhythm/feeling) vs. informational (facts/photos). SoT genre tags.

Q24 RL.2.2

D

Synthesis: every animal has a HOME in the wild — the habitat is belonging.

Story 4 · Abuelo and the Three Bears

FOLKTALE · 8 ITEMS

Q25 RL.2.1

A

Evidence: Emilio waits for cousins; Abuelo offers a story (SoT summary_anchor, OCR line 2530).

Q26 RL.2.3

B

Evidence: Papa Bear stubborn — wants frijoles though they are too hot (SoT, OCR line 2824).

Q27 RL.2.3

C

Evidence: Trencitas = "Little Braids" in Spanish; takes Goldilocks role (SoT Spanish glossary; summary_anchor).

Q28 RL.2.3

D

Evidence: Trencitas falls asleep on Osito's small bed (SoT summary_anchor, OCR line 3223).

Q29 RL.2.3

A

Evidence: ending = all walk to Trencitas's house, share tortillas and salsa (SoT summary_anchor + Spanish glossary).

Q30 RL.2.6

B

Perspective: Spanish words anchor folktale in a Latino home (SoT Spanish glossary lines 3316–3323).

Q31 RL.2.9

C

Compare: Trencitas / frijoles / sharing ending — all swap classic Goldilocks elements (SoT summary_anchor).

Q32 RL.2.2

D

Synthesis: retelling from new home + sharing meal = a home welcomes everyone.

Worksheet C — IB Critical Thinking · Answer Key

5 questions · PYP Key Concepts · DOK 2–4

Q1 Change DOK 3

In **"The Long, Long Journey,"** show how the godwit chick CHANGES from hatching to migrating — and how her habitat helps her.

MODEL ANSWER

Just hatched · Tundra: The chick is tiny. Her legs are WOBBLY. She cannot fly. The TUNDRA gives her tall grass to hide in. When the Arctic fox comes, mother TRILLS a warning and the chick CROUCHES low. The grass is her safety. **Ready to fly · Migrating:** Months later, the chick has strong legs that PRANCE on the mudflat. Her wings are strong. The MUDFLAT gives her food. The FLOCK shows her the ROUTE. She rises into the sky and COASTS on strong wings toward New Zealand. **What the habitat gives:** The tundra gives a nest and hiding place. The grass and the mother's trill give safety. The mudflat gives food to grow. The flock gives the route. Without the habitat — and the flock — one tiny chick could not make a journey halfway across the world.

KEYWORDS (3)

tundra → grass to hide | mudflat → food to grow | flock → route across the world

SCORING NOTES

- Full credit (3): just-hatched description + ready-to-fly description + at least 2 habitat helps named.
- Partial (2): both stages described but habitat link is vague.
- Minimal (1): only "the chick grows up" — no habitat naming.

TEACHING STEPS

Step 1 · Two boxes.

강사: *"Draw 2 boxes — Just Hatched / Ready to Fly. In each box, draw the chick AND one piece of her habitat (grass or mudflat)."*

코멘트. 박스 2개 — 갓 부화 / 비행 준비. 각각 새와 서식지 한 부분 그리기.

Step 2 · Name the danger.

강사: *"For Box 1, name the danger (fox or falcon). What does the habitat give her to survive?"*

코멘트. 박스 1에서 위험(여우·매)과 서식지가 주는 도움 명명.

Step 3 · Connect to EQ.

강사: *"Now write one sentence: how does the chick DEPEND on her habitat?"*

코멘트. 한 문장으로: 새는 서식지에 어떻게 의존하는가?

STUDENT PROMPTS

- "What is the FIRST danger the chick faces?"
  새가 처음 만나는 위험은?
- "Why does the chick CROUCH instead of running away?"
  왜 새는 도망치지 않고 웅크릴까?

- "Could one godwit make the journey alone, without the flock?"
  새 한 마리가 무리 없이 혼자 그 여행을 할 수 있을까?

DIFFERENTIATION

STRUGGLING Provide 3 picture cards (chick + grass / chick + fox / flock in sky). Order them and label each.
3장 그림 카드 순서 + 라벨.

ADVANCED Compare the godwit's habitat-help to the sea otter pup's habitat-help (kelp/rocks). Which habitat does more for its young animal?
새와 해달의 서식지 비교 — 어느 쪽이 새끼에게 더 많이 주는가?

COMMON MISCONCEPTIONS

PITFALL "The chick grows on its own." She depends on her mother's trill, the grass, the mudflat, and the flock — habitat is the helper.
새는 혼자 크지 않음. 어미·풀·갯벌·무리 모두 도움.

PITFALL "Migration is just flying." Migration is following a learned ROUTE across the world — the flock teaches the route.
이주는 그냥 나는 것이 아님. 무리가 배운 길을 따라가는 것.

LEARNER PROFILE LINK

INQUIRERS Asking "what does the chick NEED at each step?" is the inquirer's habit applied to a habitat.
단계마다 무엇이 필요한가 묻기 — Inquirer.

KOREAN BRIDGE

표현 "She depends on her habitat." → "그 새는 서식지에 의존해."
EQ 핵심 문장 — '의존(depend)'은 G2 사회·과학 공통 키워드.

단어 "tundra / 툰드라 — mudflat / 갯벌 — flock / 무리"
핵심 단어 영-한 대응.

Q2 Responsibility DOK 2

In **"Sea Otter Pups,"** show what the MOTHER OTTER does for her pup, step by step.

MODEL ANSWER

Job 1 · Carry & Float: The mother otter swims on her back. She holds her pup on her tummy. This way the pup never sinks and never drifts away. The mother also FLOATS to rest, with the pup safely on top. **Job 2 · Feed & Smash:** The mother dives to the rocky bottom and finds shellfish. She comes back up, lays on her back, and SMASHES the shellfish open with a small rock. She breaks the meal so the pup can eat. Later, she teaches the pup how to do this. **Job 3 · Wrap in Kelp:** When it is time to sleep, the mother wraps herself and her pup in long KELP, so that the waves do not carry them out to sea. The kelp is like a strong rope made from the ocean itself. **Hardest job alone:** Job 2 — smashing shellfish. The pup is not strong enough to swing a rock. Without the mother breaking the food open, the pup would not get the meat inside. The OCEAN is the home, but the mother is the teacher.

KEYWORDS (3)

carry pup on tummy | smash shellfish with rock | wrap in kelp = no drifting

SCORING NOTES

- Full credit (3): 3 jobs named with at least one detail each + reflection on hardest job with reason.
- Partial (2): 3 jobs but no reflection.
- Minimal (1): only "the mother takes care of the pup."

TEACHING STEPS

Step 1 · Three jobs.

강사: *"Draw 3 columns — Carry, Feed, Wrap. In each, draw what the mother is doing."*

코멘트. 3열 — 안기·먹이기·감싸기. 각 행동 그림.

Step 2 · Add the tool.

강사: *"In each column, add ONE part of the ocean habitat the mother uses (her tummy, a rock, the kelp)."*

코멘트. 각 열에 어미가 사용하는 바다 도구 한 가지(배·돌·켈프).

Step 3 · Star the hardest.

강사: *"Star the job the pup could NOT do alone yet. Why is that one the hardest?"*

코멘트. 새끼가 혼자 못 하는 일에 별표 — 왜 가장 어려운가?

STUDENT PROMPTS

- "Why does the mother float on her BACK?"
  왜 어미는 등을 대고 뜰까?
- "What would happen if there were no KELP in the ocean?"
  바다에 켈프가 없다면 어떻게 될까?
- "Which job is also a kind of TEACHING?"
  어느 일이 동시에 '가르치는 일'인가?

DIFFERENTIATION

STRUGGLING Match 3 pictures (mother + pup / mother + rock / mother + kelp) to 3 labels (carry / feed / wrap).

3장 그림 + 3장 라벨 매칭.

ADVANCED Pick another animal mother (the godwit, the polar bear mama) and write her own 3 jobs.

다른 어미(고드윗·북극곰)의 3가지 일 쓰기.

COMMON MISCONCEPTIONS

PITFALL "Otter pups can swim from birth." They float at first; the mother teaches them how to swim and dive.

새끼는 처음부터 헤엄치지 않음. 어미가 가르침.

PITFALL "Kelp is just decoration." Kelp is an anchor — without it, otters drift out to sea while sleeping.

켈프는 장식이 아님. 자는 동안 표류 방지 — 닻 역할.

LEARNER PROFILE LINK

CARING A mother who teaches her young the skills they will need is the model of caring.

새끼에게 살아갈 기술을 가르치는 어미 — Caring.

KOREAN BRIDGE

표현 "The mother wraps her pup in kelp so they don't drift away." → "어미는 새끼를 켈프로 감싸서 떠내려가지 않게 해."

G2 학생도 이해 가능 — '동물 부모의 책임' 문장.

Q3 Connection DOK 3

In **"At Home in the Wild"** (Over in the Meadow), map who lives in the meadow — and how they DEPEND on each other.

MODEL ANSWER

Frog · what it needs: A wet place near the pond's edge. The frog eats small insects — including some BEES if it can catch them. It needs water for its young (tadpoles). **Bee · what it needs:** Flowers in the meadow grass. The bee drinks nectar and carries pollen. It needs the meadow's many flowers to feed the hive. **Bird · what it needs:** Tall meadow grass for a nest. The bird eats SEEDS (some are GRAINS) and small insects, including bees. The bees and seeds are both food. **Wolf · what it needs:** Open space and other animals to hunt. The wolf does not eat the bee or the grain — it eats larger meadow animals. But it depends on the meadow being healthy enough to feed the smaller animals too. **If the bees disappear:** Flowers do not get pollinated. Fewer flowers means fewer seeds. Fewer seeds means fewer GRAINS for the birds. Birds get hungry and may leave. The frog has one fewer kind of meal. Even the wolf, far away from the bee, is affected — the WHOLE meadow shrinks. One missing piece changes everyone.

KEYWORDS (3)

bees pollinate flowers | flowers feed birds (seeds) | one missing piece changes everyone

SCORING NOTES

- Full credit (3): 4 web cells filled + a chain showing what changes if bees disappear.
- Partial (2): 4 cells but the "what if" chain is too short or skips animals.
- Minimal (1): cells filled with only one-word answers, no chain.

TEACHING STEPS

Step 1 · One need each.

강사: *"In each web cell, write ONE thing that animal needs from the meadow."*

코멘트. 각 웹 칸에 그 동물이 초원에서 필요로 하는 한 가지.

Step 2 · Pull one out.

강사: *"Cross out the BEE cell. Which other animal is affected FIRST? Then second? Then third?"*

코멘트. 벌 칸을 지우자. 가장 먼저 영향받는 동물은? 그 다음은? 그 다음은?

Step 3 · Big idea sentence.

강사: *"Write one sentence: in a habitat, even animals that never meet still depend on each other."*

코멘트. 한 문장으로: 서식지에서 만난 적 없는 동물끼리도 의존한다.

STUDENT PROMPTS

- "How is a meadow like a CITY for animals?"
  초원은 동물에게 어떤 점에서 도시 같은가?
- "Who eats the bees? Who needs the bees alive?"
  벌을 먹는 동물은? 벌이 살아 있어야 하는 동물은?
- "Can a wolf survive in a meadow with no insects?"

벌레가 없는 초원에서 늑대는 살아남을 수 있을까?

DIFFERENTIATION

STRUGGLING Provide a pre-drawn chain (bees → flowers → seeds → birds). Student fills in arrows.

미리 그린 체인에 화살표 채우기.

ADVANCED Imagine a Korean meadow (보리밭). Which Korean meadow animal would be the BEE? The bird? The wolf?

한국 보리밭 — 벌·새·늑대 대응 동물 찾기.

COMMON MISCONCEPTIONS

PITFALL "Only animals that eat each other are connected." Animals are also connected through plants and through space — flowers feed bees that feed birds.

'서로 먹는 동물만 연결된 것 아님' — 식물·공간을 통해도 연결.

PITFALL "Bees are just bugs that sting." Bees pollinate. Without them, the whole food chain weakens.

벌은 그냥 쏘는 곤충이 아님. 수분(pollination) 담당 — 사라지면 먹이 사슬 약화.

LEARNER PROFILE LINK

THINKERS Tracing a chain (bee → flower → seed → bird) is critical thinking about ecosystems.

사슬 추적 사고 — Thinker.

KOREAN BRIDGE

표현 "Even animals that never meet depend on each other." → "서로 만난 적 없는 동물끼리도 의존해."

EQ 직접 답변 — 글쓰기 핵심 문장.

Q4 Perspective DOK 3

In **"Abuelo and the Three Bears,"** trace THREE choices Jerry Tello made to retell the folktale from a Latino home.

MODEL ANSWER

Name · Trencitas: Goldilocks becomes TRENCITAS — "Little Braids" in Spanish. The new name comes from the new family. A name carries a culture, so a new culture means a new name. **Food · Frijoles:** Porridge becomes FRIJOLES — beans. Beans are a Mexican kitchen staple. Papa Bear is STUBBORN about hot frijoles, just like a real Latino abuelo about food at the table. Food shows where the story lives. **Ending · Sharing:** The classic ending has Goldilocks running away in fear. Jerry Tello changes that — everyone walks to Trencitas's house, and her mother shares TORTILLAS and SALSA. Latino family values — sharing, hospitality, comida — replace "running away." **Which change matters most:** The ENDING. A new name and a new food make it sound Latino. But the new ending changes the MORAL of the story: from "be careful and run home" to "a home welcomes everyone." That is the deepest cultural change.

KEYWORDS (3)

Trencitas = little braids | frijoles = beans, hot & stubborn | tortillas + salsa = sharing instead of running

SCORING NOTES

- Full credit (3): 3 choices named with a Latino-culture reason + a "which matters most" reflection with reason.
- Partial (2): 3 choices but no reflection on the deepest change.
- Minimal (1): "the name is different" — no reason.

TEACHING STEPS

Step 1 · Old vs. new.

강사: *"Make 2 columns — classic Goldilocks / Abuelo's version. List the differences (name / food / ending)."*

코멘트. 2열 — 옛 이야기 / 새 이야기. 이름·음식·결말 차이.

Step 2 · Why this choice?

강사: *"For each row, ask WHY Jerry Tello changed it. What does the change tell you about the family?"*

코멘트. 행마다 왜 바꿨나? 가족에 대해 무엇을 알려주는가?

Step 3 · Deepest change.

강사: *"Which change makes the moral DIFFERENT? Star it."*

코멘트. 교훈을 바꾸는 변경은? 별표.

STUDENT PROMPTS

- "Why does Abuelo tell the story instead of just a narrator?"
  왜 그냥 화자가 아닌 할아버지가 이야기하는가?
- "What does the SPANISH in the story add for you?"
  스페인어가 이야기에 무엇을 더하는가?
- "If you retold this story in YOUR home, what 3 things would you change?"
  너의 집에서 다시 쓰면, 3가지를 바꾼다면?

DIFFERENTIATION

STRUGGLING Match 3 Spanish words (Abuelo / Frijoles / Trencitas) to 3 English meanings.

스페인어 3개 + 영어 3개 매칭.

ADVANCED Write a 4-sentence "Halmoni and the Three Bears" — set in a Korean home, with kimbap and 한복 names.

한국 가정 버전 '할머니와 세 마리 곰' 4문장 쓰기.

COMMON MISCONCEPTIONS

PITFALL "It's the same story just with Spanish words." The ending changes the meaning — from running away to sharing. Words AND morals shift.

'스페인어만 바꾼 것 아님' — 결말이 바뀌면 교훈이 바뀜.

PITFALL "Folktales never change." Folktales travel — each home retells them in its own voice.

민담은 변함. 각 가정이 자기 방식으로 다시 이야기.

LEARNER PROFILE LINK

OPEN-MINDED Reading one story told from many cultures — open-minded.

하나의 이야기를 여러 문화 시각에서 — Open-minded.

KOREAN BRIDGE

표현 "A home welcomes everyone." → "집은 누구든 환영해."

M9 핵심 문장 — Abuelo 결말의 교훈을 그대로 한국어로.

Q5 Reflection DOK 4

Essential Question: How do living things in a habitat depend on each other? Use ideas from TWO of the texts in this module.

MODEL ANSWER

Living things in a habitat depend on each other in TWO big ways. They depend on FAMILY — parents and young — AND they depend on the WHOLE COMMUNITY — many species, many plants, one shared place. In **"The Long, Long Journey,"** Sandra Markle shows a tiny godwit chick that cannot fly. Her mother TRILLS warnings; the grass hides her; the flock teaches her the migration ROUTE. Without her family AND her habitat, she could never cross the world to New Zealand. In **"At Home in the Wild,"** the Over-in-the-Meadow poems show many species sharing ONE meadow — frogs, fish, birds, wolves, bees. The bees feed the flowers. The flowers feed the birds. Every animal has a HOME, and every animal depends on the others. **My Big Idea:** A habitat is not just a place. It is a web of LIVING THINGS that hold each other up. When one animal is missing — or when one plant is gone — the whole web is weaker. Living things depend on each other because together they ARE the habitat.

KEYWORDS (3)

family-level care (mother godwit / mother otter) · community-level web (Over in the Meadow) · habitat = the living web

SCORING NOTES

- Full credit (4): two texts named + evidence from each + personal Big Idea + real-world bridge.
- Partial (3): two texts + evidence, Big Idea weak.
- Developing (2): one text only.
- Minimal (1): generic ("animals need each other") without text evidence.

SYNTHESIS FRAME

TEXT 1 EVIDENCE	CONNECTING WORD	TEXT 2 EVIDENCE
One short detail: a godwit chick CROUCHES; a sea otter mother CARRIES her pup; cubs ROMP with mama.	AND / BUT / SO — chooses how family-level and community-level depend.	One short detail: bees + flowers + birds; tortillas shared among bears and family; cricket sings to its meadow.

REAL-WORLD CONNECTION

KOREA Korean 갯벌(mudflat) habitats — Suncheon Bay, Ganghwa-do. Migratory godwits actually stop there! Every spring, godwits fly through Korean mudflats on their long journey from New Zealand back to Alaska.

한국 갯벌(순천만·강화도) — 고드윗이 실제로 들르는 중간 기착지. M9의 새가 한국 하늘을 지나간다.

PERSONAL Pick ONE habitat near where you live (park pond, apartment garden, river). Name 3 living things in it AND one way they depend on each other.

집 근처 서식지 한 곳 — 3가지 생물 + 서로 의존하는 방식 한 가지.

RUBRIC

LEVEL	WHAT IT LOOKS LIKE
Exceeding (4)	Names 2 texts + family-level AND community-level dependence + personal Big Idea + Korean habitat link.
Meeting (3)	Names 2 texts + dependence in each + Big Idea.
Approaching (2)	Names 2 texts but only "animals help each other" — no specific evidence.
Beginning (1)	Generic ("animals need food") without text evidence.

> **Watch out:** Many students will only describe family-level care (mother + young). Push them to also describe community-level dependence — bees + flowers + birds, or the whole meadow / reef / pond. The full EQ needs BOTH scales.

TEACHING STEPS

Step 1 · Two scales.

강사: *"For each text, fill two columns: small scale (parent + young) / big scale (many species + habitat)."*

코멘트. 텍스트별 2열 — 작은 규모(부모·새끼) / 큰 규모(여러 종·서식지).

Step 2 · One link, one chain.

강사: *"Pick one chain from each text (mother trills → chick crouches → fox passes // bee → flower → bird)."*

코멘트. 각 텍스트에서 한 개의 사슬 — 어미→새끼→안전 / 벌→꽃→새.

Step 3 · Big Idea sentence.

강사: *"Write one sentence with the word DEPEND in it. Use both scales."*

코멘트. '의존한다' 단어 포함 한 문장. 두 규모 모두 사용.

STUDENT PROMPTS

- "Can one animal survive in a habitat all by itself?"
  동물 한 마리가 서식지에서 혼자 살아남을 수 있을까?
- "Which habitat in this module felt most like YOUR home?"
  이 모듈의 서식지 중 가장 집처럼 느껴진 곳은?
- "If you had to protect ONE habitat near Korea, which would it be?"
  한국 근처 서식지 하나를 지킨다면 어디?

DIFFERENTIATION

STRUGGLING Sentence frame: "In ____, the ____ depends on ____. In ____, the ____ depends on ____. A habitat is a place where ____."

5단 문장 골격.

ADVANCED Compare a HABITAT in this module to an ecosystem from G2 M5 (Birds, Birds Everywhere) or M8 (plant world). What is the same about how living things depend on each other?

M5/M8의 생태계와 M9 서식지 비교 — 의존 방식의 공통점.

COMMON MISCONCEPTIONS

PITFALL "A habitat is just a place." A habitat is a PLACE + the living things that share it + the way they depend on each other.

서식지는 장소만 아님. 장소 + 생물 + 의존 관계.

PITFALL "Only big animals matter." Bees are tiny, but if they disappear the whole meadow shrinks. Small species are big players.

큰 동물만 중요한 것 아님. 작은 종(벌)이 사라지면 전체가 약해짐.

LEARNER PROFILE LINK

REFLECTIVE Holding both "family scale" and "community scale" together is reflective thinking about living systems.

'가족 규모'와 '공동체 규모'를 함께 잡는 사고 — Reflective.

CARING A child who can name a habitat near home and protect it is caring — for living things that share our space.

집 근처 서식지를 알고 지키려는 마음 — Caring.

KOREAN BRIDGE

표현 "A habitat is a web of living things." → "서식지는 생물들의 그물이야."

EQ에 대한 가장 강한 학생 답변 — 글쓰기 마무리.

관용구 "Home sweet habitat" → "집 같은 서식지."

모듈 제목 — 'home sweet home' 표현의 응용.

Worksheet D — MAP Practice · Answer Key

20 items · RIT 180 → 200 · Lexile 240L–500L

PASSAGE 1 · THE POND AT THE PARK

Q1 RIT 180

A

Lexile 240L · Key Detail. "Soo-ah walked to the park... straight to the small pond."

Q2 RIT 184

C

Lexile 250L · Cause & Effect. Plants, fish, frog, bees, duck all share the water — the habitat is a "world."

Q3 RIT 186

A

Lexile 260L · Inference. Plants are the base — without them, fish, duck, and frog lose food and shelter.

Q4 RIT 188

A

Lexile 270L · Vocabulary. Section A Q2 word reused — "habitat" = place where plants and animals live.

Q5 RIT 189

D

Lexile 290L · Main Idea. Even a small pond is a habitat — every living thing depends on the others. Mirrors the EQ.

PASSAGE 2 · THE BEES AND THE APPLE TREE

Q6 RIT 190

A

Lexile 300L · Key Detail. "In Min-jun's backyard there was one old apple tree."

Q7 RIT 192

B

Lexile 320L · Cause & Effect. Fewer bees = less pollen moved = fewer apples.

Q8 RIT 193

C

Lexile 330L · Vocabulary. "Moving pollen" = carrying yellow powder so flowers turn into fruit.

Q9 RIT 194

D

Lexile 340L · Inference. Flowers attract bees → bees pollinate apple tree → apples return.

Q10 RIT 195

C

Lexile 350L · Main Idea. Tree and bees are a team — mutual dependence.

PASSAGE 3 · THE TIDE POOL

Q11 RIT 195

B

Lexile 360L · Key Detail. "Down to the sea at low tide... small pools of water."

Q12 RIT 196

A

Lexile 370L · Cause & Effect. Each animal eats or feeds another — the whole pool keeps working.

Q13 RIT 197

B

Lexile 380L · Vocabulary. "Darted" = moved past quickly in a short, sudden burst.

Q14 RIT 198

B

Lexile 390L · Inference. "No bigger than a hat" stresses that even tiny habitats hold a full food chain.

Q15 RIT 199

D

Lexile 410L · Main Idea. Sun → plants → fish → crab → starfish — the whole ecosystem fits in a puddle.

PASSAGE 4 · THE CORAL REEF

Q16 RIT 199

A

Lexile 440L · Key Detail. "Tiny animals called corals... build a strong stone wall."

Q17 RIT 200

B

Lexile 460L · Cause & Effect. Big fish gets clean; cleaner fish gets food — both gain.

Q18 RIT 200

C

Lexile 480L · Vocabulary. "Home" in context = habitat — place to live, hide, find food.

Q19 RIT 200

D

Lexile 490L · Inference. If corals die, every other animal loses home and food — whole reef falls apart.

Q20 RIT 200

C

Lexile 500L · Main Idea. Reef = habitat where every living thing depends on the others. Protect one piece, protect the whole.
