Module Overview

Essential Question: What behaviors help animals survive?
Quote: "We each survive in our own way." — Sarah J. Maas
Big Idea Words (4): hatch, universal, span, growth
Main Selections (workbook 4):

- This Is Your Life Cycle · Heather Lynn Miller (illus. Michael Chesworth) · Narrative Nonfiction / Fantasy
- The Nose Awards · (no author byline; illus. Manu Callejón) · Informational Text (magazine article)
- Octopus Escapes Again! · Laurie Ellen Angus (written and illustrated) · Narrative Nonfiction
- T.J. The Siberian Tiger Cub · Ann Whitehead Nagda & Cindy Bickel (illus. Heather Gatley) · Informational Text

Note. The SoT lists 23 core vocabulary items on Worksheet A (4 Big Idea + 6 This Is Your Life Cycle + 3 The Nose Awards + 4 Octopus Escapes Again! + 6 T.J. The Siberian Tiger Cub), in myBook page-order. This G3 Teacher's Guide labels each selection's panel "Critical Vocabulary" (the G3 equivalent of myBook "Power Words") — the string "Power Words" does not appear in the source. The teacher "Words for Using Context Clues / Reference Sources / Homographs-Homophones" boxes are NOT counted as core vocabulary. "Frozen Alive" is the Big-Idea Short Read (no Critical Vocabulary panel) and carries the 4 Big Idea Words; it is excluded from the per-selection workbook units. Worksheet E is intentionally omitted — this workbook series uses 4 worksheets (A·B·C·D). Module 6 has NO video/media selection among its numbered selections.

Answer Distribution (75 Multiple-Choice Items)

Verified counts across Worksheets A (23), B (32), and D (20). Worksheet C is open-response IB and not counted in MCQ balance.

A · 19 · B · 19 · C · 19 · D · 18

These four totals are the count of correct-answer LETTERS (A/B/C/D) across all 75 multiple-choice items — 19 answers are "A", 19 are "B", 19 are "C", 18 are "D" (as even as 75 allows). Balance enforced via choice-order rotation only; correct-answer meanings and option texts are preserved from the Source of Truth. All 23 SoT vocabulary words covered on Worksheet A in myBook page-order (Big Idea → This Is Your Life Cycle → The Nose Awards → Octopus Escapes Again! → T.J. The Siberian Tiger Cub).

Voca Trap Items (Worksheet A)

7 of 23 ≈ 30%, all flagged below. Trap pattern: polysemy / part-of-speech / sound-alike / near-distractor baits drawn from the natural meaning field of each word — no hallucination.

- Q3 **span** — polysemy bait (a bridge "span" / a wing "span" / a cooking "pan") vs. "the length of time something lasts"
- Q7 **unsuspecting** — opposite-meaning bait ("sure that something is wrong" / "looking everywhere for danger") vs. "do not notice something that may happen"
- Q9 **patch** — polysemy bait (cloth patch / eye patch / a quick fix) vs. "a small area of something, such as land"
- Q13 **trumpet** — polysemy bait ("play a brass musical instrument") vs. "to loudly call out or make a sound"
- Q19 **bared** — sound-alike/near-field bait ("lost them one by one" — bared/bald look-and-sound bait) vs. "showed them to others"
- Q7 and Q19 also bait with everyday "rule-breaking" and "brushed clean" distractors from the natural meaning field.
- Note. 7 trap items total (Q3, Q7, Q9, Q13, Q19 carry the explicit Trap flag; the rotation also stress-tests Q2 universal "far away in space" and Q15/Q16 near-field octopus baits).

Reading Trap Items (Worksheet B)

3 of 32 ≈ 9%, all flagged below. Trap pattern for Section B: cross-text confusion (four animal selections — two narrative nonfiction, two informational text), MAIN-idea bait (a true detail mistaken for the main idea), and length-balanced correct answers so a longest-option-wins guess fails. Distractors built from SoT only — no hallucination.

All four selections are RI (informational / narrative nonfiction); codes used are RI.3.1 / .2 / .3 / .5 / .6 / .8 only (RI.3.4, RI.3.7, and RL.3.7 are NOT used).

- Q8 **This Is Your Life Cycle MAIN idea** — "fastest insects" / "game shows" / "lays 800 eggs" are true details, baited against the real main idea: each life-cycle stage's behaviors help a dragonfly survive
- Q16 **The Nose Awards MAIN idea** — "only the elephant" / "noses only breathe" / "moles are blind" bait vs. many animals have special noses that help them survive
- Q24 **Octopus Escapes Again! MAIN idea** — Giant Pacific size / sea turtles eat octopuses / octopuses live alone bait vs. an octopus uses many behaviors to find food and escape predators
- Q32 **T.J. MAIN idea** — "tigers weigh 500 lbs" / "Cindy and Sheila" / "graphs compare weights" bait vs. care plus the cub's own behaviors helped it survive (flagged Trap)

How the Four Worksheets Build Toward the EQ

This module asks **"What behaviors help animals survive?"** Each worksheet adds one layer of the answer, so the teacher can move from word knowledge to deep thinking in order:

- **A · Vocabulary** — students first own the four Big Idea Words of survival (hatch, universal, span, growth) and the words each selection uses (larvae, molt, unsuspecting, deposited, patch, cumbersome, keener, nostrils, trumpet, flexible, siphon, lurking, invisible, nuzzled, bared, assistant, refused, nursery, pounce). Without these words, students cannot describe how an animal's behaviors help it survive.
- **B · Reading Comprehension** — students gather evidence from all four selections: a dual-genre narrative nonfiction/fantasy about a dragonfly's life cycle (This Is Your Life Cycle), an informational magazine article about animal noses (The Nose Awards), a narrative nonfiction adventure about an octopus (Octopus Escapes Again!), and a true informational rescue story (T.J. The Siberian Tiger Cub). Structure and point-of-view items (RI.3.5 / RI.3.6) — headings, dual fonts, chronological order, author's purpose — prepare the thinking that Section C needs. All four selections are informational/nonfiction, so every code is RI.
- **C · IB Critical Thinking** — students synthesize: they trace how a dragonfly CHANGES through its life cycle (This Is Your Life Cycle), how different noses FUNCTION (The Nose Awards), how an octopus's ADAPTATIONS help it escape (Octopus Escapes Again!), how a dragonfly and a tiger cub both survive and grow (compare), and finally answer the EQ with two selections. The C activities grow straight out of the B evidence.
- **D · MAP Practice** — four NEW passages let students apply the same idea to animals they have not studied here (a desert camel, a honeybee colony, the Arctic fox, the monarch butterfly's migration), so the EQ becomes a transferable lens about how behaviors and adaptations help animals survive, not a single-text answer.

Teaching tip. If time is short, the EQ can be reached with Section A (words) + Section C Q5 (synthesis) alone — but Section B supplies the evidence that makes Q5 specific rather than generic.

Source-of-Truth Verification

Into Reading · Grade 3 · Module 6 · For Teacher Use

VERIFIED

How Every Item Is Grounded

Every item on this Answer Key traces to the Source-of-Truth JSON for G3 Module 6, built from the Teaching Pal OCR (4,345 lines, 43 pages) and verified against the PDF intro spreads (every Critical Vocabulary panel was read from a 400dpi crop). No characters, words, or events outside the Source of Truth were added.

- **Vocabulary (Worksheet A):** all 23 words come from the module's Big Idea Words (4: hatch, universal, span, growth) and the four "Critical Vocabulary" panels — This Is Your Life Cycle 6, The Nose Awards 3, Octopus Escapes Again! 4, T.J. The Siberian Tiger Cub 6. Each meaning is checked against the myBook inline definition. The teacher "Words for Using ..." strategy boxes are deliberately NOT counted as core vocabulary.
- **Terminology:** this G3 Teacher's Guide labels each panel "Critical Vocabulary," not "Power Words" — the workbook uses that exact label, matching the source.
- **Reading (Worksheet B):** the 32 items use RI.3 codes only, because all four selections are informational/narrative nonfiction (RI.3.1 / .2 / .3 / .5 / .6 / .8). Each correct answer is grounded in the Source of Truth; distractors are SoT-anchored, never invented. RI.3.4, RI.3.7, and RL.3.7 are not used, and there are no "from the text" snippet boxes.
- **Genre & credits:** This Is Your Life Cycle = Narrative Nonfiction/Fantasy (Heather Lynn Miller, illus. Michael Chesworth); The Nose Awards = Informational Text / magazine article (no author byline — illus. Manu Callejón only); Octopus Escapes Again! = Narrative Nonfiction (written and illustrated by Laurie Ellen Angus); T.J. The Siberian Tiger Cub = Informational Text (Ann Whitehead Nagda & Cindy Bickel, illus. Heather Gatley). Two narrative nonfiction + two informational text — never labeled the same.
- **IB (Worksheet C):** the PYP concepts — Change, Function, Adaptation — follow the Source-of-Truth ib_concepts mappings for this SCIENCE/animal-survival module. The Essential Question text on Q5 matches the workbook word for word.
- **MAP (Worksheet D):** four NEW passages (163 / 162 / 169 / 160 words), RIT 195→215, Lexile 410L–680L. None recall the four anchor selections; each applies the EQ to a fresh animal-survival topic.
- **Answer balance:** 75 multiple-choice items distribute as 19 "A" / 19 "B" / 19 "C" / 18 "D" (as even as 75 allows), achieved by choice-order rotation only — every meaning is preserved from the Source of Truth.

What This Module Does NOT Contain (Guardrails)

- No "Power Words" label — the G3 source says "Critical Vocabulary."
- No Worksheet E — this workbook series uses four worksheets (A · B · C · D).
- The module quote "We each survive in our own way." IS by a NAMED person, Sarah J. Maas. It is NOT anonymous.
- "Frozen Alive" is the Big-Idea Short Read (an informational science article about wood frogs surviving winter, no Critical Vocabulary panel) and is excluded from the per-selection units; it carries the 4 Big Idea Words instead.
- Module 6 has NO video/media selection among its numbered selections. The only video is the module-opener "Get Curious" intro video "Shall We Dance?" — it is not a body selection.
- The Nose Awards has NO author byline — only "illustrated by Manu Callejón" is printed. The author is left uncredited; no author was invented.
- T.J. The Siberian Tiger Cub has TWO co-authors: Ann Whitehead Nagda AND Cindy Bickel — both are recorded (correct as printed). Octopus Escapes Again! is "written and illustrated by Laurie Ellen Angus" — the same person is author and illustrator.
- The teacher "Words for Using ..." boxes (This Is Your Life Cycle: emerge, molted; The Nose Awards: bellow, particles; Octopus Escapes Again!: clever, nooks; T.J.: meat, basis) are strategy-practice words, not student vocabulary items — they are not on Worksheet A. "molted" (strategy) and "molt" (Critical Vocabulary) are related forms in different boxes and are counted once.

- The Nose Awards has only 3 Critical Vocabulary words (keener, nostrils, trumpet) — the smallest panel; Octopus has 4 (flexible, siphon, lurking, invisible). Neither is padded. Counts are 0/6/3/4/6 = 19 Critical Vocabulary; Big Idea (4) + Critical (19) = 23 total.
- Performance Task = "Write an Expository Essay" (compare and contrast two animals' behaviors). It is not an opinion or narrative essay.

Worksheet A — Vocabulary · Answer Key

23 items · CCSS L.3.4 / L.3.5 / L.3.6

BIG IDEA WORDS

Q1 L.3.6

hatch

B

Meaning: an animal can hatch from an egg when it breaks out of the shell by itself. **Source:** SoT Big Idea Word 1 — Vocabulary Card 6.1; highlighted in Frozen Alive. *Distractors A/C/D give grow a tail / swim up / hibernate.*

Q2 L.3.6

universal

C

Meaning: when something is universal, it applies to everyone. **Source:** SoT Big Idea Word 2 — Vocabulary Card 6.2; "no universal way to survive the cold." *Distractor D baits the space sense of "universe."*

Q3 L.3.5 TRAP

span

A

Meaning: a span is the length of time something lasts, like a life span. **Source:** SoT Big Idea Word 3 — Vocabulary Card 6.3; "a frog's life span." **Trap:** B/C/D bait the bridge-span, wing-span, and "pan" senses.

Q4 L.3.6

growth

D

Meaning: growth happens when something gets older and/or bigger. **Source:** SoT Big Idea Word 4 — Vocabulary Card 6.4. *Distractors give stays the same / hides / moves.*

CRITICAL VOCABULARY · THIS IS YOUR LIFE CYCLE

Q5 L.3.4

larvae

C

Evidence: SoT — "Insects that have just hatched and haven't yet changed to their adult form are called larvae" (OCR lines 638–640). *Distractors give adults / eggs / wings.*

Q6 L.3.4

molt

A

Evidence: SoT — "When insects or other animals molt, they lose their outer covering, such as skin or feathers" (OCR lines 641–642). *Distractors dig / lay eggs / call out.*

Q7 L.3.5 TRAP

unsuspecting

D

Evidence: SoT — "If you are unsuspecting, you do not notice something that is happening or may happen" (OCR lines 708–710). **Trap:** A/B reverse it ("sure something is wrong" / "looking for danger").

Q8 L.3.4

deposited

B

Evidence: SoT — "If you deposited something in a place, you left it there" (OCR line 926); the mother deposited her eggs. *Distractors took / broke / ate.*

Q9 L.3.5 TRAP

patch

A

Evidence: SoT — "A patch is a small area of something, such as fabric or land" (OCR lines 970–972); "a perfect patch of swamp grass." **Trap:** B/C/D bait the cloth-patch, eye-patch, and "quick fix" senses.

Q10 L.3.4

cumbersome

C

Evidence: SoT — "Something that is cumbersome is heavy and hard to carry or wear" (OCR lines 1291–1294); "that cumbersome exoskeleton." *Distractors light / shiny / comfortable.*

Q11 L.3.4

keener

B

Evidence: SoT — "If an animal's senses are keener, they are better, sharper, or more developed" (OCR lines 1973–1975); a bear's smell is keener than a dog's. *Distractors weaker / in the mouth / night-only.*

Q12 L.3.4

nostrils

D

Evidence: SoT — "Nostrils are openings in a nose that take in air for breathing or smelling" (OCR lines 2090–2091). *Distractors give arms / teeth / foot pads.*

CRITICAL VOCABULARY · THE NOSE AWARDS (CONTINUED)

Q13 L.3.5 TRAP

trumpet

A

Evidence: SoT — "To trumpet is to loudly call out or make a sound" (OCR lines 2093–2094); an elephant can trumpet with its trunk. **Trap:** B baits the brass-instrument sense; C/D give other trunk uses.

CRITICAL VOCABULARY · OCTOPUS ESCAPES AGAIN!

Q14 L.3.4

flexible

C

Evidence: SoT — "If something is flexible, it can bend or change shape without breaking" (OCR lines 2616–2618); octopuses have no bones. *Distractors hard / straight-line only / floats.*

Q15 L.3.4

siphon

B

Evidence: SoT — "A siphon is a tube or hose that is used to pull liquid in or out" (OCR lines 2794–2795); the octopus blasts water through its siphon. *Distractors shell / ink / plant.*

Q16 L.3.4

lurking

D

Evidence: SoT — "If an animal is lurking, it is hiding while it waits to catch another creature" (OCR lines 2797–2798). *Distractors swimming away / sleeping / calling out.*

Q17 L.3.4

invisible

A

Evidence: SoT — "If something is invisible, it cannot be seen" (OCR line 2922); the octopus uses camouflage. *Distractors bright / loud / heavy.*

CRITICAL VOCABULARY · T.J. THE SIBERIAN TIGER CUB

Q18 L.3.4

nuzzled

C

Evidence: SoT — "If one animal nuzzled another animal, it gently touched the animal with its nose and mouth" (OCR lines 3408–3409); Buhkra nuzzled her cub. *Distractors chased / growled / carried up a tree.*

Q19 L.3.5 TRAP

bared

B

Evidence: SoT — "If an animal bared its teeth, it showed them to others" (OCR line 3397); a scared T.J. bared his teeth. **Trap:** A baits the sound-alike "bald/lost" sense; C/D give brushed / hidden.

Q20 L.3.4

assistant

D

Evidence: SoT — "An assistant is someone who helps another person do his or her work" (OCR lines 3483–3484); Cindy is a veterinary assistant. *Distractors owner / zoo animal / visitor.*

Q21 L.3.4

refused

A

Evidence: SoT — "If you refused something, you did not take it" (OCR line 3637); "the cub still refused to touch the meat." *Distractors ate it / shared it / saved it.*

Q22 L.3.4

nursery

C

Evidence: SoT — "A nursery is a place where babies or young children are cared for" (OCR line 3812); "T.J. is rolling around in the nursery." *Distractors cage / mountain / food bowl.*

Q23 L.3.4

pounce

B

Evidence: SoT — "If you pounce, you jump on something suddenly and hold on to it" (OCR line 3813); T.J. would pounce on Cindy. *Distractors walk away / roll over / curl up.*

Worksheet B — Reading Comprehension · Answer Key

32 items · CCSS RI.3.1 / .2 / .3 / .5 / .6 / .8

Selection 1 · This Is Your Life Cycle

NARRATIVE NONFICTION / FANTASY · 8 ITEMS

Q1 RI.3.2

B

Evidence: Bob Beetle hosts "THIS IS YOUR LIFE CYCLE... the show that follows the life cycle of... the insects," following Dahlia the dragonfly (OCR lines 605–614). *Others pick a stray detail.*

Q2 RI.3.3

C

Evidence: insects "begin their lives as eggs, hatch as nymphs or larvae, and molt into fully developed adults" (OCR lines 612–614). *Others scramble the order.*

Q3 RI.3.3

D

Evidence: Dahlia "managed to escape death by living under the cover of rotting leaves, dead logs, and thick swamp grasses" (OCR lines 719–721). *Others off-text.*

Q4 RI.3.3

A

Evidence: Dahlia ate "an unsuspecting tadpole" and became "a fierce little predator," yet hungry predators chased her — both predator and prey (OCR lines 704–706, 1143–1149). *Others off-text.*

Q5 RI.3.3

B

Evidence: with her gills she "learned to pump water... shot through the water like a torpedo... No one could catch me" (OCR lines 1153–1160). *Others off-text.*

Q6 RI.3.3

C

Evidence: after molting and resting in the sun, Dahlia is a fast adult who can "fly forward, backward, and sideways... hover, dart, and flip" (OCR lines 1486–1494). *Others reverse it.*

Q7 RI.3.6

A

Author's Purpose: the game-show setting lets the author "give scientific information about the life cycle of an insect in a fun, entertaining way" (OCR lines 585–594). *Others misread the purpose.*

Q8 RI.3.2 TRAP

D

Main Idea: the show traces how each life-cycle stage's behaviors (hatch, hide, molt, fly) help a dragonfly survive (OCR lines 1733–1748). **Trap:** A/B/C are true details, not the main idea.

Selection 2 · The Nose Awards

INFORMATIONAL TEXT (MAGAZINE ARTICLE) · 8 ITEMS

Q9 RI.3.2

B

Evidence: the article gives the "Elly" nose award "to some of our favorite noses" and explains the special ways animals use them (OCR lines 1926–1937). *Others off-topic.*

Q10 RI.3.5

C

Text Features: SoT — magazine articles "organize their ideas using headings and subheadings"; headings like "Best Smeller" name each award (OCR lines 1773–1786, 1818–1822). *Others off-text.*

Q11 RI.3.1

A

Evidence: "A bear's sense of smell is even keener than a dog's. Bears have poor eyesight, but they can smell food from miles away... even buried underground or packed inside an unopened can" (OCR lines 1966–1971). *Others off-text.*

Q12 RI.3.3

C

Evidence: a snake "constantly flicks its long tongue... It catches tiny scent particles... Then it carries them to smell detectors in its mouth" (OCR lines 2073–2078). *Others off-text.*

Q13 RI.3.3

D

Evidence: the star-nosed mole tunnels underground, "using those nose fingers, or tentacles, to feel for yummy worms and tiny bugs to eat" (OCR lines 2105–2113). *Others off-text.*

Q14 RI.3.8

A

Evidence/Support: a hippo breathes "because the hippo's nostrils face upward, sticking out of" the water, used "like a snorkel" (OCR lines 2207–2209, 2246–2254). *Others are true but off-point.*

Q15 RI.3.6

B

Author's Craft: "Elly is short for elephant... the author starts the article by telling about the elephant and its magnificent trunk" (OCR lines 1912–1920). *Others off-text.*

Q16 RI.3.2 TRAP

D

Main Idea: many animals have special noses that help them smell, eat, breathe, and survive (OCR lines 1935–1937, 2096–2099). **Trap:** A/B/C overstate one detail.

Selection 3 · Octopus Escapes Again!

NARRATIVE NONFICTION · 8 ITEMS

Q17 RI.3.3

B

Evidence: Octopus is "Hunting for a shellfish or two" while escaping a series of predators — sea turtle, eel, shark, grouper, gull (OCR lines 2691, 2784, 3109–3112). *Others off-text.*

Q18 RI.3.3

C

Evidence: "Octopus squeezes her soft body into a nearby empty shell... Octopuses have no bones, which makes them very flexible" (OCR lines 2602–2613). *Others off-text.*

Q19 RI.3.3

B

Evidence: "an octopus can spray ink. This confuses the attacker and hides the octopus, giving it time to escape" (OCR lines 2687–2689). *Others off-text.*

Q20 RI.3.3

A

Evidence: "an octopus sucks in water and blasts it out through its siphon. The force of the water shoots the octopus away like a rocket" (OCR lines 2789–2792). *Others off-text.*

Q21 RI.3.5

C

Text Features: SoT — "the larger dark font tells the story... the smaller, blue italic font gives facts and information about real-life octopuses" (OCR lines 2358–2363). *Others off-text.*

Q22 RI.3.1

D

Evidence: "Octopuses have eight flexible arms... Octopuses don't have any bones," so its body is "perfectly suited for surviving in the ocean" (OCR lines 3025–3043). *Others off-text.*

Q23 RI.3.8

A

Support: Octopus "can do different things to stay safe: squeeze into a shell... squirt ink, use water jets to blast off, release an arm, use camouflage" (OCR lines 3096–3100). *Others are true but off-point.*

Q24 RI.3.2 TRAP

D

Main Idea: an octopus uses many behaviors and adaptations to find food and escape predators (OCR theme; lines 2602–2613, 3096–3100). **Trap:** A/B/C pick stray facts.

Selection 4 · T.J. The Siberian Tiger Cub

INFORMATIONAL TEXT · 8 ITEMS

Q25 RI.3.2

B

Evidence: a true story — T.J. is a real cub born at the Denver Zoo whose mother dies, so staff hand-raise him until he thrives (OCR lines 3397–3406, 4029–4043). *Others off-text.*

Q26 RI.3.3

C

Evidence: "Without any warning, she had died... she'd died from cancer"; Matthew "couldn't take care of his son" (OCR lines 3386–3395). *Others off-text.*

Q27 RI.3.3

A

Evidence: "Ignoring the food, T.J. walked to a corner... he hadn't touched his food"; he "hadn't gained much weight" (OCR lines 3470–3475). *Others reverse it.*

Q28 RI.3.3

C

Evidence: T.J. played hide-and-seek and "would sneak up... and pounce." "Tiger mothers teach their babies how to hunt by playing games like this" (OCR lines 3793–3800). *Others off-text.*

Q29 RI.3.8

B

Support: "By the time he was fourteen weeks old, he weighed nineteen pounds. The cub was gaining weight at a steady rate, and the vet was pleased" (OCR lines 3786–3791). *Others show the earlier problem.*

Q30 RI.3.3

D

Evidence: "The tiger keeper at ZooMontana estimated that T.J. weighed 500 pounds. T.J. had finally grown bigger than his father!" (OCR lines 4038–4043). *Others off-text.*

Q31 RI.3.5

A

Text Structure: SoT — "The author uses chronological order... the selection starts when T.J. is a cub... and ends when T.J. is four years old" (OCR lines 3979–3989). *Others off-text.*

Q32 RI.3.2 TRAP

D

Main Idea: with people's care and his own behaviors (eating, playing/hunting, adapting) an orphaned cub learns to survive (OCR theme; lines 3625–3635, 3793–3800). **Trap:** A/B/C pick stray details.

Worksheet C — IB Critical Thinking · Answer Key

5 questions · PYP Key Concepts · DOK 2–4

Q1 Change DOK 3

In **"This Is Your Life Cycle,"** show THREE stages of Dahlia the dragonfly's life, then explain how the changes help her survive.

MODEL ANSWER

Stage 1 · Egg: Dahlia begins as a tiny egg. Her mother deposited over 800 eggs inside the blades of swamp grass, which helped keep them safe from hungry fish. Hatching from the egg by itself is the first change. **Stage 2 · Nymph:** After her egg casing splits, Dahlia becomes a nymph that lives underwater. This is the most dangerous stage, when she is both predator and prey. She survives by hiding under rotting leaves, logs, and swamp grasses, and by using her water jet to shoot away from predators like Box Turtle. She also becomes a hunter, eating tadpoles and mosquito larvae. **Stage 3 · Adult:** Dahlia molts out of her cumbersome exoskeleton, rests in the sun, and becomes a fast-flying adult. With four wings she can hover, dart, and flip, flying over 20 miles per hour to catch food and escape birds. **How the changes help her survive:** Each change gives Dahlia a new way to stay alive — hatching starts her life, hiding and the water jet keep her safe as a nymph, and flying lets her hunt and escape as an adult. The dragonfly's body and behaviors change at each stage so it can survive that stage.

KEYWORDS (3)

egg = hatch, hidden in grass

nymph = hide + water jet, predator and prey

adult = molt + fly to hunt and escape

SCORING NOTES

- Full credit (3): all three stages (egg → nymph → adult) + how each change helps Dahlia survive.
- Partial (2): three stages named but no explanation of how they help.
- Minimal (1): only "she grows up" with no stages.

TEACHING STEPS

Step 1 · Three boxes in order.

강사: *"Label three boxes: Egg, Nymph, Adult. What is Dahlia in each?"*

코멘트. 상자 세 칸 — 알·약충(님프)·성충. 각 단계의 달리아 적기.

Step 2 · One survival behavior each.

강사: *"For each stage, underline one behavior that keeps Dahlia alive."*

코멘트. 각 단계에서 달리아를 살아남게 하는 행동 하나에 밑줄.

Step 3 · One sentence on change.

강사: *"Finish: 'Each time Dahlia changes, she can ____.'"*

코멘트. 문장 완성 — '달리아가 변할 때마다, ____할 수 있다.'

STUDENT PROMPTS

- "Why is the nymph stage the most dangerous for Dahlia?"

왜 약충(님프) 시기가 달리아에게 가장 위험할까?

- "How does molting change what Dahlia can do?"
  탈피(molt)는 달리아가 할 수 있는 일을 어떻게 바꿀까?
- "What stages does your favorite animal go through?"
  네가 좋아하는 동물은 어떤 단계를 거치니?

DIFFERENTIATION

STRUGGLING Put 3 cards (egg / nymph / flying adult) in life-cycle order.
카드 3장 — 알·약충·성충 순서 배열.

ADVANCED Compare Dahlia's life cycle to a frog's life cycle in Frozen Alive.
달리아의 생애 주기를 Frozen Alive 개구리와 비교.

COMMON MISCONCEPTIONS

PITFALL "Dahlia is born able to fly." No — she lives underwater as a nymph first and only flies after she molts into an adult.
달리아가 처음부터 날 수 있는 게 아님 — 약충으로 물속에 살다가 탈피 후 성충이 되어야 난다.

PITFALL "The talking insects are real." The fantasy frame is make-believe, but the life-cycle facts are true.
말하는 곤충은 상상(판타지)일 뿐 — 생애 주기 사실은 진짜.

LEARNER PROFILE LINK

KNOWLEDGEABLE Knowing the stages of a life cycle is being knowledgeable.
생애 주기 단계를 아는 것 — Knowledgeable.

INQUIRERS Asking how each change helps survival is inquiry.
각 변화가 생존에 어떻게 도움 되는지 묻기 — Inquirer.

KOREAN BRIDGE

표현 "Every stage of its life cycle helps an animal survive." → "생애 주기의 모든 단계가 동물의 생존을 돕는다."
변화(Change) 핵심 문장.

단어 "egg / 알 — nymph / 약충 — molt / 탈피하다 — life cycle / 생애 주기"
핵심 단어 영-한.

Q2 Function DOK 3

In **"The Nose Awards,"** show THREE animals and explain what each animal's nose does to help it survive.

MODEL ANSWER

Elephant: An elephant's nose is a long trunk. It uses the trunk to breathe and smell, but also to grab food, suck up water for a drink or a shower, and trumpet loud warnings and calls. The trunk does many jobs that help the elephant live. **Bear (or dog):** A bear's sense of smell is even keener than a dog's. Even though bears have poor eyesight, they can smell food from miles away — even food buried underground or sealed in a can. A keen nose helps the bear find enough food to survive. **Snake:** A snake does not use its nostrils to smell. Instead, it flicks its long tongue to catch scent particles in the air and carries them to smell detectors in its mouth. This special way of smelling helps the snake find its food even though it cannot see or hear very well. **Why a special nose helps an animal survive:** Each animal's nose is an adaptation — a body part shaped to do a job. The elephant's trunk, the bear's keen smell, and the snake's tongue-smelling all help the animal find food, stay safe, or breathe. The nose helps each animal survive in its own world.

KEYWORDS (3)

elephant = trunk does many jobs | bear/dog = keen smell finds far-off food | snake = tongue smells for food

SCORING NOTES

- Full credit (3): three animals + what each animal's nose does to help it survive + why a special nose is a helpful adaptation.
- Partial (2): three animals named but no survival reason.
- Minimal (1): only "animals have noses" with no example.

TEACHING STEPS

Step 1 · Pick three animals.

강사: *"From the article, choose three animals and name each one's nose job."*

코멘트. 글에서 동물 셋 고르고 — 각 코가 하는 일 적기.

Step 2 · Survival link.

강사: *"Beside each, write how that nose helps the animal survive."*

코멘트. 각 동물 옆에 — 그 코가 생존을 어떻게 돕는지.

Step 3 · Adaptation sentence.

강사: *"Finish: 'A special nose helps an animal ____.'"*

코멘트. 문장 완성 — '특별한 코는 동물이 ____하도록 돕는다.'

STUDENT PROMPTS

- "Why is an elephant's trunk called the most talented nose?"
  코끼리의 코는 왜 가장 재능 있는 코로 불릴까?
- "How can a snake smell without using its nostrils?"
  뱀은 콧구멍을 안 쓰고 어떻게 냄새를 맡을까?
- "Which animal's nose surprised you most? Why?"

어느 동물의 코가 가장 놀라웠니? 왜?

DIFFERENTIATION

STRUGGLING Match 3 picture cards (trunk / keen smell / tongue) to "helps it survive."

그림 카드 3장을 '생존을 돕는다'와 매칭.

ADVANCED Add the star-nosed mole or hippo as a fourth example and explain its nose job.

별코두더지나 하마를 넷째 예로 추가 — 코의 역할 설명.

COMMON MISCONCEPTIONS

PITFALL "A nose is only for smelling." Many noses also breathe, grab, dig, feel, or make sounds.

코가 냄새만 맡는 게 아님 — 숨쉬기·집기·파기·만지기·소리내기도 함.

PITFALL "People have the best noses." Many animals smell far better than people do.

사람의 코가 가장 좋은 게 아님 — 많은 동물이 훨씬 잘 맡음.

LEARNER PROFILE LINK

KNOWLEDGEABLE Knowing how different noses work is being knowledgeable.

서로 다른 코의 작동을 아는 것 — Knowledgeable.

THINKERS Linking a body part to a survival job is real thinking.

신체 부위를 생존 역할과 연결 — Thinker.

KOREAN BRIDGE

표현 "A special body part helps an animal survive." → "특별한 신체 부위가 동물의 생존을 돕는다."

기능(Function) 핵심 문장.

단어 "trunk / 코끼리 코 — keen / 예민한 — nostril / 콧구멍 — adaptation / 적응"

핵심 단어 영-한.

Q3 Adaptation DOK 3

In **"Octopus Escapes Again!,"** trace THREE of Octopus's escapes and name the adaptation she uses each time.

MODEL ANSWER

Escape 1 · The Shell (the sea turtle): When the sea turtle dives down to eat her, Octopus quickly squeezes her soft body into a nearby empty shell. She can do this because octopuses have no bones, which makes them very flexible. The turtle pushes and pokes, but Octopus is safe. **Escape 2 · The Ink (the eel):** When the eel tries to grab and gobble her, Octopus releases a cloud of dark ink. The ink confuses the attacker and hides the octopus, giving her time to scoot away. **Escape 3 · The Siphon (the shark):** When the prowling shark closes in, Octopus makes a "BLAST OFF." She sucks in water and blasts it out through her siphon, and the force shoots her away like a rocket. **How adaptations help her survive as hunter and prey:** An octopus is both a hunter (she is sneaking up on a crab) and prey (sharks and turtles want to eat her). Her adaptations — being flexible, spraying ink, jetting with her siphon, releasing an arm, and using camouflage — let her catch food and escape being eaten. Many different behaviors help one animal survive in a dangerous ocean.

KEYWORDS (3)

shell = flexible, no bones | ink = confuses + hides | siphon = blast off like a rocket

SCORING NOTES

- Full credit (3): all three escapes + the adaptation named for each + how adaptations help her survive.
- Partial (2): three escapes but no adaptation named.
- Minimal (1): only "she escapes" with no example.

TEACHING STEPS

Step 1 · Three escape boxes.

강사: *"Label three boxes: Shell, Ink, Siphon. Which predator goes with each?"*

코멘트. 상자 세 칸 — 껍데기·먹물·시폰. 각 칸에 맞는 포식자.

Step 2 · Name the adaptation.

강사: *"For each escape, name the body part or behavior Octopus uses."*

코멘트. 각 탈출에서 문어가 쓰는 신체 부위·행동 적기.

Step 3 · Hunter and prey sentence.

강사: *"Finish: 'Octopus's adaptations help her ___ and ___.'"*

코멘트. 문장 완성 — '문어의 적응은 그녀가 ____하고 ____하도록 돕는다.'

STUDENT PROMPTS

- "How does having no bones help Octopus escape?"
  뼈가 없는 것이 문어의 탈출에 어떻게 도움이 될까?
- "Why does the ink cloud work so well?"
  먹물 구름은 왜 그렇게 효과적일까?
- "Which escape would help YOU most if you were an octopus?"

네가 문어라면 어느 탈출법이 가장 도움이 될까?

DIFFERENTIATION

STRUGGLING Match 3 cards (shell / ink / siphon) to the right predator.

카드 3장을 알맞은 포식자와 매칭.

ADVANCED Compare Octopus's hiding to Dahlia's hiding in This Is Your Life Cycle.

문어의 은신을 This Is Your Life Cycle의 달리아 은신과 비교.

COMMON MISCONCEPTIONS

PITFALL "Octopus is only prey." She is also a hunter, sneaking up on a crab and clams.

문어는 먹이만이 아님 — 게·조개를 노리는 사냥꾼이기도 함.

PITFALL "Octopus goes as fast as a real rocket." The text says like a rocket — it is a comparison, not a fact.

진짜 로켓처럼 빠른 게 아님 — '로켓처럼'은 비유.

LEARNER PROFILE LINK

THINKERS Matching each escape to an adaptation is real thinking.

각 탈출을 적응과 연결 — Thinker.

RISK-TAKERS Octopus tries a different trick each time — flexible problem solving.

매번 다른 방법을 시도하는 문어 — Risk-taker.

KOREAN BRIDGE

표현 "Many adaptations help one animal survive." → "여러 적응이 한 동물의 생존을 돕는다."

적응(Adaptation) 핵심 문장.

단어 "flexible / 유연한 — ink / 먹물 — siphon / 물 분사관 — camouflage / 위장"

핵심 단어 영-한.

Q4 Adaptation / Survival DOK 3

Compare HOW the dragonfly in **This Is Your Life Cycle** and the tiger cub in **T.J. The Siberian Tiger Cub** survive and grow.

MODEL ANSWER

Dahlia · A Dragonfly: Dahlia survives mostly on her own, by changing her body and behaviors through her life cycle. As a nymph she hides from predators and uses a water jet to escape; then she molts into an adult and flies fast to hunt and stay safe. No grown-up helps her — her own adaptations keep her alive at each stage. **T.J. · A Tiger Cub:** T.J. survives with a lot of help from people. When his mother dies, he is too young to live alone. At first he refuses to eat, so Cindy and the vets gently force him to eat to save his life. Sheila and Cindy hand-feed him, and he learns to hunt by playing pouncing games. People plus his own growing behaviors keep him alive. **What each shows about survival:** This Is Your Life Cycle shows that an animal can survive by changing on its own through a life cycle. T.J. shows that a young animal can survive when others care for it and it learns the right behaviors. **So:** Both animals survive because of their behaviors, but the dragonfly changes by itself while the tiger cub also needs help from people. Both teach that the right behaviors — your own or with help — keep an animal alive.

KEYWORDS (3)

Dahlia = changes on her own, hide + fly

T.J. = helped by people, learns to eat + hunt

both: behaviors keep an animal alive

SCORING NOTES

- Full credit (3): how EACH animal survives (changes alone / helped by people) + what each shows about survival.
- Partial (2): both described but only one "survival" idea.
- Minimal (1): only "both are animals" with no difference.

TEACHING STEPS

Step 1 · T-chart.

강사: *"Make a T-chart: Dahlia / T.J. How does each one survive?"*

코멘트. T-차트 — 달리아 / T.J. 각자 어떻게 살아남나?

Step 2 · On its own or with help?

강사: *"Mark which one survives mostly alone and which one needs help."*

코멘트. 혼자 살아남는 쪽과 도움이 필요한 쪽 표시.

Step 3 · Both sentence.

강사: *"Finish: 'Both animals survive because of their ____.'"*

코멘트. 문장 완성 — '두 동물은 모두 ____ 덕분에 살아남는다.'

STUDENT PROMPTS

- "Why does Dahlia survive without help, but T.J. needs it?"
  달리아는 도움 없이 살아남는데 T.J.는 왜 도움이 필요할까?
- "What behaviors did T.J. have to learn?"
  T.J.는 어떤 행동을 배워야 했니?

- "When have you needed help to learn something new?"
  새로운 걸 배우는 데 도움이 필요했던 적은 언제니?

DIFFERENTIATION

STRUGGLING Match 2 cards ("changes on its own" / "helped by people") to the right animal.
카드 2장을 알맞은 동물과 매칭.

ADVANCED Add the octopus as a third example and say how it survives.
문어를 셋째 예로 추가 — 어떻게 살아남는지 설명.

COMMON MISCONCEPTIONS

PITFALL "T.J. is a made-up story like Dahlia's game show." T.J. is a true informational story about a real tiger cub.
T.J.는 지어낸 이야기가 아님 — 실제 새끼 호랑이의 실화(정보 글).

PITFALL "Surviving means doing everything alone." Sometimes survival needs help from others, like T.J. did.
생존이 다 혼자 하는 건 아님 — T.J.처럼 도움이 필요할 때도 있음.

LEARNER PROFILE LINK

CARING The people who help T.J. survive show caring.
T.J.의 생존을 돕는 사람들 — Caring.

KNOWLEDGEABLE Knowing two ways animals survive is being knowledgeable.
동물이 살아남는 두 방식을 아는 것 — Knowledgeable.

KOREAN BRIDGE

표현 "Behaviors — your own or with help — keep an animal alive." → "행동은, 스스로든 도움을 받든, 동물을 살아남게 한다."
적응·생존(Adaptation/Survival) 핵심 문장.

단어 "survive / 살아남다 — life cycle / 생애 주기 — care / 돌보다 — thrive / 잘 자라다"
핵심 단어 영-한.

Q5 Function / Survival DOK 4

Essential Question: What behaviors help animals survive? Use ideas from TWO of the selections in this module to answer.

MODEL ANSWER

Animals survive by using special behaviors and body parts that fit the dangers around them. In **"Octopus Escapes Again!,"** Octopus must find food while many predators try to eat her. She survives by using clever behaviors: she squeezes her flexible body into an empty shell, sprays a cloud of ink to confuse an attacker, and blasts away through her siphon "like a rocket." Each behavior helps her either catch food or escape being eaten. In **"T.J. The Siberian Tiger Cub,"** an orphaned tiger cub survives a very different way. At first T.J. refuses to eat, but with people's care he learns to eat, and by playing pouncing and hide-and-seek games he learns to hunt — "tiger mothers teach their babies how to hunt by playing games like this." His growing behaviors, plus help from Sheila and Cindy, keep him alive until he grows bigger than his father. **My Big Idea:** Behaviors help animals survive by letting them find food, escape danger, and grow — whether an animal does this on its own, like the octopus, or with help, like the tiger cub. As Sarah J. Maas wrote, "We each survive in our own way."

KEYWORDS (3)

Octopus = shell, ink, siphon to escape

T.J. = learns to eat + hunt with help

Big Idea: behaviors find food, escape, and grow

SCORING NOTES

- Full credit (4): two selections named + what behavior helps each animal survive + WHY it matters + a Big Idea answering the EQ.
- Partial (3): two selections + behaviors + Big Idea weak.
- Developing (2): one selection only.
- Minimal (1): generic ("animals are strong") without naming a behavior from a selection.

SYNTHESIS FRAME

SELECTION 1 BEHAVIOR

Name a behavior that helps the animal survive: This Is Your Life Cycle = hide/molt/fly through a life cycle; The Nose Awards = use a special nose to smell, eat, or breathe; Octopus Escapes Again! = shell/ink/siphon to escape; T.J. = learn to eat and hunt with help.

CONNECTING WORD

BOTH / AND — joins two survival behaviors (escaping and growing, hiding and getting help) into one Big Idea about how behaviors keep animals alive.

SELECTION 2 BEHAVIOR

A behavior from a DIFFERENT selection than Selection 1 — so the two show two ways behaviors help animals survive.

REAL-WORLD CONNECTION

KOREA 우리 주변 동물도 행동으로 살아남는다 — 제주 들판의 노루는 숨고, 텃밭의 까치는 먹이를 숨겨 두고, 길고양이는 추위에 몸을 웅크린다. 문어의 탈출, T.J.의 사냥 학습처럼.

내가 본 동물이 살아남기 위해 한 행동 하나 떠올리기.

PERSONAL When have you changed what you do to stay safe or to solve a problem?

안전하려고 또는 문제를 풀려고 행동을 바꿔 본 적이 언제였니?

RUBRIC

LEVEL	WHAT IT LOOKS LIKE
Exceeding (4)	Names 2 selections + the behavior that helps each animal survive (escape / use a body part / hide / learn with help) + WHY it matters + a Big Idea answering the EQ.
Meeting (3)	Names 2 selections + a survival behavior in each + a Big Idea.
Approaching (2)	Names 2 selections but only retells the plot — no survival behavior named.
Beginning (1)	Generic ("animals survive") without text evidence.

Watch out: Many G3 students will just retell what happened (Octopus escapes; T.J. grows up) and stop. Push them to name the BEHAVIOR that helps the animal survive — escaping with a siphon (Octopus), changing through a life cycle (This Is Your Life Cycle), using a special nose (The Nose Awards), learning to eat and hunt (T.J.) — and to say WHY it keeps the animal alive. The full EQ needs what BEHAVIORS help animals survive, not just what happens in the story.

TEACHING STEPS

Step 1 · Two selection cards.

강사: *"Pick 2 selections. For each, write the survival behavior it shows."*

코멘트. 선택지 둘 — 각자 보여 주는 '생존 행동' 적기.

Step 2 · Why it matters.

강사: *"Under each, write WHY that behavior keeps the animal alive."*

코멘트. 각각 아래 — 그 행동이 동물을 왜 살아남게 하는지.

Step 3 · Big Idea sentence.

강사: *"Write one sentence answering the EQ. Use both selections."*

코멘트. EQ에 답하는 한 문장 — 두 선택지 모두 사용.

STUDENT PROMPTS

- "Can escaping danger and learning to hunt both help an animal survive?"
  위험에서 도망치기와 사냥 배우기, 둘 다 동물의 생존을 도울 수 있을까?
- "Which animal's survival behavior surprised YOU the most?"
  어느 동물의 생존 행동이 너에게 가장 놀라웠니?
- "Why do different animals survive in different ways?"
  동물마다 살아남는 방식이 왜 다를까?

DIFFERENTIATION

STRUGGLING Sentence frame: "In ____, the animal survives by ____. In ____, the animal survives by ____. Both show that ____ helps animals survive."

3단 문장 골격.

ADVANCED Use THREE selections and sort them by the kind of behavior each shows (escape / use a body part / change / learn).

선택지 셋 사용 — 행동 종류별 분류(도망·신체 부위·변화·학습).

COMMON MISCONCEPTIONS

PITFALL "Only big, strong animals survive." A tiny dragonfly and a small octopus survive with smart behaviors, not size.

크고 힘센 동물만 살아남는 게 아님 — 작은 잠자리·문어도 영리한 행동으로 살아남음.

PITFALL "Retelling the plot answers the EQ." The EQ asks what BEHAVIORS help animals survive, not just what happens.

줄거리 요약은 EQ 답이 아님 — 어떤 '행동'이 생존을 돕는지 물음.

LEARNER PROFILE LINK

THINKERS Synthesizing two selections into one Big Idea about survival is the heart of critical thinking.

두 선택지를 한 Big Idea로 종합 — Thinker.

COMMUNICATORS Explaining how behaviors help animals survive makes you a communicator.

행동이 생존을 어떻게 돕는지 설명 — Communicator.

KOREAN BRIDGE

표현 "Behaviors help animals find food, escape danger, and grow." → "행동은 동물이 먹이를 찾고, 위험을 피하고, 자라도록 돕는다."

M6 마무리 문장 — 학생 글쓰기 핵심.

인용 "We each survive in our own way." — Sarah J. Maas → "우리는 저마다의 방식으로 살아남는다."

에피그래프 — 생존의 다양성.

Worksheet D — MAP Practice · Answer Key

20 items · RIT 195 → 215 · Lexile 410L–680L

MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Camel's Hump · **163 words** · Lexile 410–460L · RIT 195–201
- Passage 2 · How Bees Talk · **162 words** · Lexile 470–530L · RIT 202–207
- Passage 3 · The Arctic Fox · **169 words** · Lexile 540–600L · RIT 208–212
- Passage 4 · The Monarch's Long Trip · **160 words** · Lexile 610–680L · RIT 213–215

All four passages within target band 120–200 words; RIT 195→215; Lexile 410L–680L. Each passage models a different way an animal's behaviors or adaptations help it survive — a desert camel, a honeybee colony, the Arctic fox, and the monarch butterfly's migration. Passages are NEW — no recall of the four anchor selections.

PASSAGE 1 · THE CAMEL'S HUMP

Q1 RIT 195

A

Lexile 410L · Key Detail. "The hump is full of fat, not water." *Distractors B/C/D name water, sand, air.*

Q2 RIT 197

B

Lexile 420L · Key Detail. "They have long eyelashes that keep blowing sand out of their eyes." *Trap A/C/D off-text.*

Q3 RIT 199

C

Lexile 440L · Cause & Effect. "When food is hard to find, the camel's body uses the fat in the hump for energy." *Trap A/B/D off-text.*

Q4 RIT 200

D

Lexile 450L · Vocabulary. "a thirsty camel can gulp down many gallons in just a few minutes" — swallows a large amount quickly. *Trap A/B/C give the wrong picture.*

Q5 RIT 201

A

Lexile 460L · Main Idea. "All of these parts help the camel live where few other animals can." *Trap B/C/D narrow or off-topic.*

PASSAGE 2 · HOW BEES TALK

Q6 RIT 202

B

Lexile 470L · Key Detail. "they 'talk' by dancing... does a special dance called the waggle dance." *Trap A/C/D off-text.*

Q7 RIT 204

D

Lexile 490L · Key Detail. "The length of the waggle tells them how far away the flowers are." *Trap A/B/C name color, number, time.*

Q8 RIT 205

D

Lexile 500L · Cause & Effect. "Then they fly off to find the same flowers." *Trap A/B/C off-text.*

Q9 RIT 206

B

Lexile 510L · Inference. "Bees cannot speak with words, so they 'talk' by dancing" — the marks show it is not really speaking. *Trap A/C/D take it literally.*

Q10 RIT 207

C

Lexile 530L · Main Idea. "By dancing, one bee helps the whole colony find food and survive." *Trap A/B/D narrow it.*

PASSAGE 3 · THE ARCTIC FOX

Q11 RIT 208

C

Lexile 540L · Key Detail. "In winter, the fox grows a thick coat of white fur." *Trap A/B/D name summer colors.*

Q12 RIT 209

A

Lexile 560L · Cause & Effect. "Hidden this way, the fox can sneak up on prey." *Trap B/C/D off-text.*

Q13 RIT 210

B

Lexile 570L · Key Detail. "the white fur falls out. A new coat of brown or gray fur grows in." *Trap A/C/D off-text.*

Q14 RIT 211

D

Lexile 580L · Inference. "These keep its body heat from escaping into the cold air." *Trap A/B/C miss the purpose.*

Q15 RIT 212

C

Lexile 600L · Main Idea. "Thanks to these adaptations, the Arctic fox can live where winters are long and harsh." *Trap A/B/D narrow it.*

PASSAGE 4 · THE MONARCH'S LONG TRIP

Q16 RIT 213

A

Lexile 610L · Key Detail. "The weather in the north grows too cold for them to live. So the monarchs fly south." *Trap B/C/D off-text.*

Q17 RIT 214

B

Lexile 630L · Vocabulary. "This long trip is called migration." *Trap A/C/D name a forest, a tool, a wing.*

Q18 RIT 214

C

Lexile 650L · Inference. "an insect that weighs less than a paper clip" — it is amazing such a tiny, light insect travels so far. *Trap A/B/D take it literally.*

Q19 RIT 215

D

Lexile 670L · Cause & Effect. "Scientists believe they use the sun like a compass to find their direction." *Trap A/B/C off-text.*

Q20 RIT 215

A

Lexile 680L · Main Idea. "By migrating, monarchs escape the deadly cold and find a safe place to wait for spring." *Trap B/C/D are true details (paper-clip weight, the Mexico forests, the sun compass), not the big idea.*
