## Module Overview

**Essential Question:** What makes Earth's natural wonders exciting and unique?
**Quote:** "The wilderness holds answers to more questions than we yet know how to ask." — Nancy Newhall
**Big Idea Words (4):** scenic, landscape, canyon, landform
**Main Selections (workbook 4):**

- Mariana Trench / Exploring Challenger Deep · Michael Woods & Mary B. Woods · Informational Texts (paired)
- Weird and Wondrous Rocks · April Pulley Sayre · Informational Text
- Nature's Wonders: Poetry About Our Amazing Earth · Robert Schechter, X. J. Kennedy, Carol R. Baik & Steven Withrow · Poetry
- Grand Canyon: A Trail Through Time · Linda Vieira (illus. Christopher Canyon) · Literary Nonfiction

Note. The SoT lists 28 core vocabulary items on Worksheet A (4 Big Idea + 9 Mariana Trench / Exploring Challenger Deep + 3 Weird and Wondrous Rocks + 6 Nature's Wonders + 6 Grand Canyon), in myBook appearance order. This G4 Teacher's Guide labels each selection's panel "Critical Vocabulary" — the string "Power Words" does not appear in the source. The teacher "Words for Using Context Clues" / "Words for Context Clues" / "Words for Using Shades of Meaning" / "Words for Reference Sources" / Multiple-Meaning strategy boxes (enormous, organisms, diabase, grotto, travel/quest, skips/trips, weathering, erosion, pitch-black, plate) are NOT counted as core vocabulary. "Seven Natural Wonders" is the Informational Big-Idea Short Read (no Critical Vocabulary panel) and carries the 4 Big Idea Words; it is excluded from the per-selection workbook units. This module has NO standalone Video/Media reading selection.

## Answer Distribution (80 Multiple-Choice Items)

Verified counts across Worksheets A (28), B (32), and D (20). Worksheet C is open-response IB and not counted in MCQ balance.

**A · 20 · B · 20 · C · 20 · D · 20**

*These four totals are the count of correct-answer LETTERS (A/B/C/D) across all 80 multiple-choice items — exactly 20 are "A", 20 are "B", 20 are "C", and 20 are "D", a perfectly even split. Within each worksheet the split is also even: A = 7/7/7/7, B = 8/8/8/8, D = 5/5/5/5. Balance is achieved via choice-order rotation only; correct-answer meanings and option texts are preserved from the Source of Truth. All 28 SoT vocabulary words are covered on Worksheet A in myBook appearance order (Big Idea → Mariana Trench / Exploring Challenger Deep → Weird and Wondrous Rocks → Nature's Wonders → Grand Canyon).*

## Voca Trap Items (Worksheet A)

8 of 28 = 29%, all flagged below. Trap pattern: opposite-meaning / wrong-field baits drawn from the natural meaning field of each word — no hallucination.

- Q6 **summit** — opposite/part bait ("the deep valley at its base," "the path around it," "the snow") vs. "its top, or highest point"
- Q9 **vital** — opposite bait ("useless and easy to throw away") plus wrong-field baits ("small," "cold") vs. "needed, or very important"
- Q12 **remotely** — opposite bait ("hold it tightly," "sit right next to it," "ride inside it") vs. "control it from a distance"
- Q15 **organic** — wrong-field bait ("made of metal and plastic," "a perfect circle," "a bright color") vs. "made up of living matter"
- Q18 **idle** — opposite bait ("working very hard," "moving very fast," "busy and full of energy") vs. "not doing anything"
- Q21 **wrath** — opposite bait ("gentle calm," "quiet peace," "soft warmth") vs. "strong anger"
- Q24 **sentries** — wrong-field bait ("visitors," "rivers," "animals") vs. "guards or lookouts who stand in a place to keep watch"
- Q27 **embedded** — opposite bait ("floating loosely on top," "blowing freely in the wind," "alone on an empty shelf") vs. "firmly set into something else that surrounds it"

## Reading Trap Items (Worksheet B)

4 of 32 = 13%, all flagged below. Trap pattern for Section B: MAIN-idea / theme bait (a true detail mistaken for the central idea) with length-balanced correct answers so a longest-option-wins guess fails. Distractors built from the SoT only — no hallucination. Three anchors are INFORMATIONAL (RI: Mariana Trench / Exploring Challenger Deep = Informational Texts, Weird and Wondrous Rocks = Informational Text, Grand Canyon = Literary Nonfiction read with RI codes); one is the POETRY collection (RL: Nature's Wonders). Codes used are RI.4.1 / .2 / .3 / .5 / .6 / .8 and RL.4.1 / .2 / .3 / .5. **RI.4.4, RI.4.7, and RL.4.7 are NOT used**, and there are no "from the text" snippet boxes. Nature's Wonders is a poetry collection, so RL.4.5 (stanzas, concrete poem) is used for its form features.

- Q8 **Mariana Trench main idea** — "Mount Everest is the highest point," "the Trieste was in a museum," "submarines travel through the trench" are true details, baited against the real main idea: the trench is the deepest, most extreme place on Earth — a changing wonder, home to strange life, that humans can barely reach
- Q16 **Weird and Wondrous Rocks main idea** — "diabase is a volcanic rock," "the Caverns of Sonora are in Texas," "hikers carry lighters" bait vs. across the U.S., ordinary rocks do extraordinary things — wonders science can explain yet still amazing
- Q24 **Nature's Wonders theme** — "the reef is sixteen hundred miles long," "the Everest poem is a triangle," "the aurora is seen in Alaska" bait vs. poetry and facts together deepen our wonder at Earth's marvels, each unique and awe-inspiring
- Q32 **Grand Canyon main idea** — "mules take a five-hour trip," "a raven glides over the river," "bighorn sheep walk the walls" bait vs. the Canyon, carved over millions of years and still changing, is a living record of Earth's history and one of the Seven Natural Wonders of the World

# Source-of-Truth Verification

Into Reading · Grade 4 · Module 6 · For Teacher Use

VERIFIED

## How Every Item Is Grounded

Every item on this Answer Key traces to the Source-of-Truth JSON for G4 Module 6, built from the Teaching Pal OCR (3,878 lines, 33 spread-pages) and verified against the PDF intro spreads (every Critical Vocabulary panel was read from a high-resolution crop, and each panel's rounded bottom corner was confirmed so no words are cut off). No characters, words, or events outside the Source of Truth were added.

- **Vocabulary (Worksheet A):** all 28 words come from the module's Big Idea Words (4: scenic, landscape, canyon, landform) and the four "Critical Vocabulary" panels — Mariana Trench / Exploring Challenger Deep 9, Weird and Wondrous Rocks 3, Nature's Wonders 6, Grand Canyon 6. Each meaning is checked against the myBook inline footnote definition where it survived in the OCR. Three words (intriguing, core, chasm) had no clean inline footnote in the OCR; their panel positions are visually certain, so standard kid-friendly definitions are supplied per the SoT note (intriguing = very interesting / makes you curious; core = the central or most important part; chasm = a deep crack or opening in the earth). The teacher strategy boxes (enormous, organisms, diabase, grotto, travel/quest, skips/trips, weathering, erosion, pitch-black, plate) are deliberately NOT counted as core vocabulary.
- **Terminology:** this G4 Teacher's Guide labels each panel "Critical Vocabulary," not "Power Words" — the workbook uses that exact label, matching the source.
- **Reading (Worksheet B):** the 32 items use RI.4 codes for the three informational anchors (Mariana Trench / Exploring Challenger Deep, Weird and Wondrous Rocks, Grand Canyon literary nonfiction) and RL.4 codes for the poetry collection (Nature's Wonders). Each correct answer is grounded in the Source of Truth; distractors are SoT-anchored, never invented. RI.4.4, RI.4.7, and RL.4.7 are not used, and there are no "from the text" snippet boxes.
- **Genre & credits:** Mariana Trench / Exploring Challenger Deep = paired Informational Texts (Michael Woods & Mary B. Woods; Don Walsh, Jacques Piccard, James Cameron, and Victor Vescovo are real historical explorers, not fictional characters); Weird and Wondrous Rocks = Informational Text (April Pulley Sayre; photo-illustrated, illustrator unverified); Nature's Wonders: Poetry About Our Amazing Earth = Poetry collection (Robert Schechter, X. J. Kennedy, Carol R. Baik, Steven Withrow); Grand Canyon: A Trail Through Time = Literary Nonfiction (Linda Vieira, illus. Christopher Canyon; the Havasupai and Anasazi are referenced as real peoples, not characters).
- **IB (Worksheet C):** the PYP concepts — Exploration, Systems, Wonder, Change, Inquiry — follow the Source-of-Truth science focus of this module. The Essential Question text on Q5 matches the workbook word for word. Korean teacher guidance appears in Section C only; Sections A, B, and D are in English.
- **MAP (Worksheet D):** four NEW passages (185 / 192 / 200 / 200 words), RIT 200→220, Lexile 500L–800L. None recall the four anchor selections; each shows a different natural wonder (singing dunes, a glowworm cave, an upside-down waterfall, a fog-drinking forest).
- **Answer balance:** 80 multiple-choice items distribute as 20 "A" / 20 "B" / 20 "C" / 20 "D" — a perfectly even split, achieved by choice-order rotation only; every meaning is preserved from the Source of Truth.

## MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Singing Sand Dune · **185 words** · Lexile 500–560L · RIT 200–206
- Passage 2 · The Glowworm Cave · **192 words** · Lexile 560–620L · RIT 206–211
- Passage 3 · The Waterfall That Falls Up · **200 words** · Lexile 620–700L · RIT 211–216
- Passage 4 · The Forest That Drinks the Fog · **200 words** · Lexile 700–800L · RIT 216–220

Word counts match the workbook passage meta exactly. All four within target band 150–220 words; RIT 200→220; Lexile 500L–800L. Each passage shows a different natural wonder — a singing dune, a glowing cave, an upside-down waterfall, and a fog-fed forest. Passages are NEW — no recall of the four anchor selections.

## What This Module Does NOT Contain (Guardrails)

- No "Power Words" label — the G4 source says "Critical Vocabulary."
- No Worksheet E — this workbook series uses four worksheets (A · B · C · D).
- The module quote is by NANCY NEWHALL (a named American photography critic/writer) and is the EPIGRAPH only — it is NOT a story author.
- "Seven Natural Wonders" is the Informational Big-Idea Short Read (no Critical Vocabulary panel) and is excluded from the per-selection units; it carries the 4 Big Idea Words instead. Its author is unverified — no byline in the source.
- This module has NO standalone Video/Media reading selection. The only video is the module-opener "Get Curious" video "Amazing Planet Earth," which is not a graded selection.
- Critical Vocabulary counts are 9 / 3 / 6 / 6 = 24, not evened out. Big Idea (4) + Critical (24) = 28 total. Weird and Wondrous Rocks genuinely has only 3; Mariana Trench / Exploring Challenger Deep genuinely has 9.
- Nature's Wonders is a POETRY COLLECTION (four poems by four poets, each paired with an informational passage), not a single poem. The four wonders (reef, trench, Everest, aurora) are topic content, not vocabulary words.
- "Mariana Trench" and "Exploring Challenger Deep" are a PAIRED unit sharing one byline and one Critical Vocabulary panel — treated as a single selection. The Trieste, Deepsea Challenger, and DSV Limiting Factor are real vessels, not characters.
- The topic strand is "SCIENCE CONNECTION: Natural Wonders" (a SCIENCE module, not Social Studies).
- Performance Task = "Write an Expository Essay" (final copy in cursive).

# A Worksheet A — Vocabulary · Answer Key

28 items · CCSS L.4.4 / L.4.5 / L.4.6

## BIG IDEA WORDS

### Q1 L.4.6

**scenic**

**C**

**Meaning:** a place that is scenic has beautiful scenery that is nice to look at. **Source:** SoT Big Idea Word — Vocabulary Card 6.1. *Distractors give flat and plain / crowded and gray / too dark to see — all places with no nice view.*

### Q2 L.4.6

**landscape**

**A**

**Meaning:** when you look at a landscape, you are looking at the whole area of land around you. **Source:** SoT Big Idea Word 6.2. *Distractors give a single stone / a paper map of the land / land hidden in a cave.*

### Q3 L.4.6

**canyon**

**D**

**Meaning:** a canyon is a deep valley that has steep sides. **Source:** SoT Big Idea Word 6.3; reinforced by Grand Canyon. *Distractors give a hill / a flat field / a low rolling plain — all the opposite of a deep, steep valley.*

### Q4 L.4.6

**landform**

**B**

**Meaning:** a landform is a natural feature on Earth's surface, such as a mountain, valley, or hill. **Source:** SoT Big Idea Word 6.4. *Distractors give weather / a man-made road or bridge / a sea or lake — none is a natural landform.*

## CRITICAL VOCABULARY · MARIANA TRENCH / EXPLORING CHALLENGER DEEP

### Q5 L.4.4

**trench**

**D**

**Evidence:** SoT — "A trench is a long, narrow groove or ditch" (OCR line 589). *Distractors give a round hill / a shallow pool / a wide flat plain — not a narrow groove.*

### Q6 L.4.5 TRAP

**summit**

**C**

**Evidence:** SoT — "The summit of a mountain is its top or highest point" (OCR line 815). **Trap:** A baits the opposite (the valley at its base); B/D bait the path / the snow.

### Q7 L.4.4

**thrive**

**A**

**Evidence:** SoT — "When living things thrive, they grow well and are healthy" (OCR line 859). *Distractors give weaken and die / barely survive / disappear — all poor health.*

### Q8 L.4.4

**prehistoric**

**B**

**Evidence:** SoT — "Something that is prehistoric is very old, from a time before history was recorded" (OCR line 860). *Distractors give brand new / built last year / a few years ago — all recent times.*

### Q9 L.4.5 TRAP

**vital**

**B**

**Evidence:** SoT — "If something is vital, it is needed or very important" (OCR line 862); the extreme conditions are vital to the organisms. **Trap:** A baits the opposite (useless); C/D bait wrong fields (small / cold).

### Q10 L.4.4

**glimpse**

**D**

**Evidence:** SoT — "A glimpse is a very quick look at something" (OCR line 1022); the first glimpse of the Challenger Deep in 1960. *Distractors give a long study / a slow stare / a close-up view — all slow, careful looking.*

### Q11 L.4.4

**submersible**

**A**

**Evidence:** SoT — "If something is submersible, it can go or work under water" (OCR line 1023); the Trieste. *Distractors give floats only / rolls on land / flies — none goes under water.*

### Q12 L.4.5 TRAP

**remotely**

**C**

**Evidence:** SoT — "If you use something remotely, you control it from a distance" (OCR line 1024); remotely operated vehicles. **Trap:** A/B/D bait the opposite — being right up close (hold it / sit next to it / ride inside it).

Q13 L.4.4

**autonomous**

**D**

**Evidence:** SoT — "If something is autonomous, it controls itself" (OCR line 1026); autonomous underwater vehicles. *Distractors give guided by a person / needs a cable to a ship / must be pushed — all depend on outside control.*

## CRITICAL VOCABULARY · WEIRD AND WONDROUS ROCKS

Q14 L.4.4

**eternal**

**A**

**Evidence:** SoT — "If something is eternal, it has no end and lasts forever" (OCR line 1856); Eternal Flame Falls. *Distractors give lasts minutes / stops and starts / ends after a short while — all short or ending.*

Q15 L.4.5 TRAP

**organic**

**B**

**Evidence:** SoT — "If something is organic, it is made up of living matter" (OCR line 1858); decaying organic matter. **Trap:** A/C/D bait wrong fields (metal and plastic / a circle / a color).

Q16 L.4.4

**intriguing**

**C**

**Meaning:** if something is intriguing, it is very interesting and makes you curious. **Source:** SoT Critical Vocabulary panel (Weird and Wondrous Rocks); footnote not in OCR — standard kid-friendly definition supplied per SoT note (form "intriguing" in body, OCR lines 2122–2123). *Distractors give boring / ordinary and easy to ignore / dull — all the opposite of interesting.*

## CRITICAL VOCABULARY · NATURE'S WONDERS: POETRY ABOUT OUR AMAZING EARTH

Q17 L.4.4

**diverse**

**D**

**Evidence:** SoT — diverse means "things that are different from each other" (OCR line 2397); the reef's "most diverse mix of marine life." *Distractors give exactly the same / all alike in one kind / copies of one another.*

Q18 L.4.5 TRAP

**idle**

**A**

**Evidence:** SoT — "If something is referred to as idle, it is not doing anything" (OCR line 2477); "no idle boast." **Trap:** B/C/D bait the opposite — being active (working hard / moving fast / busy and full of energy).

Q19 L.4.4

**core**

**B**

**Meaning:** the core of something is its central or most important part. **Source:** SoT Critical Vocabulary panel (Nature's Wonders); footnote not in OCR — standard kid-friendly definition supplied per SoT note. *Distractors give the empty space / the outside layer / the least-important edge.*

Q20 L.4.4

**fathom**

**C**

**Evidence:** SoT — "If you fathom something, you understand it" (OCR line 2627). *Distractors give forget / cannot make sense of it / measure with a ruler (a literal-meaning trap).*

Q21 L.4.5 TRAP

**wrath**

**C**

**Evidence:** SoT — "Wrath is strong anger" (OCR line 2629); "the wind's wrath" on Mount Everest. **Trap:** A/B/D bait the opposite — calm and mild (gentle calm / quiet peace / soft warmth).

Q22 L.4.4

**collision**

**D**

**Evidence:** SoT — "A collision happens when a moving object crashes into something" (OCR lines 2824–2825); the Aurora Borealis. *Distractors give floats in place / drifts slowly past / stays far apart — no crash.*

## CRITICAL VOCABULARY · GRAND CANYON: A TRAIL THROUGH TIME

Q23 L.4.4

**shatter**

**B**

**Evidence:** SoT — "When things shatter, they explode or suddenly break into pieces" (OCR line 3095); lightning shatters the dark sky. *Distractors give stay whole and still / bend without breaking / hold together — all staying intact.*

Q24 L.4.5 TRAP

**sentries**

**A**

**Evidence:** SoT — "Sentries are guards or lookouts who stand in a place to keep watch" (OCR line 3077); spires stand "like sentries." **Trap:** B/C/D bait wrong fields (rivers / animals / visitors).

Q25 L.4.4

**chasm**

**B**

**Meaning:** a chasm is a deep crack or opening in the earth. **Source:** SoT Critical Vocabulary panel (Grand Canyon); footnote not in OCR — standard kid-friendly definition supplied per SoT note (form "chasm" in body, OCR line 3202). *Distractors give a tall ridge / a flat ledge / a pile of stones — none is a deep opening.*

Q26 L.4.4

**glistens**

**A**

**Evidence:** SoT — "If something glistens, it sparks or shines" (OCR line 3345); the noonday sun glistens on a creek. *Distractors give dark and dull / cloudy and gray / fades into shadow — all lacking shine.*

Q27 L.4.5 TRAP

**embedded**

**D**

**Evidence:** SoT — "If a thing is embedded, it is firmly set into something else that surrounds it" (OCR line 3346); fossils embedded in shale. **Trap:** A/B/C bait the opposite (floating loosely / blowing freely / alone on a shelf).

Q28 L.4.4

**eroding**

**C**

**Evidence:** SoT — "If something is eroding, it is slowly wearing away, often from wind or water" (OCR line 3451); "endless cycles of eroding rock." *Distractors give growing taller / staying the same / building up — all the opposite of wearing away.*

# Worksheet B — Reading Comprehension · Answer Key

32 items · CCSS RI.4.1 / .2 / .3 / .5 / .6 / .8 · RL.4.1 / .2 / .3 / .5

## Selection 1 · Mariana Trench / Exploring Challenger Deep

INFORMATIONAL TEXTS · 8 ITEMS

**Q1** RI.4.2

**B**

**Central Idea:** the texts describe the deepest place in the world and how people have explored it (SoT key text, OCR lines 577–587, 995–1002). *Others name a single detail (one explorer) or the wrong topic (nearby islands, the moon and tides).*

**Q2** RI.4.3

**D**

**Evidence:** "the lowest place in the world... is at the bottom of the Mariana Trench, a valley in the floor of the Pacific Ocean" (OCR lines 583–585). *Others name Everest (the highest), the Puerto Rico Trench (deepest in the Atlantic only), or wrongly separate the Challenger Deep from the trench.*

**Q3** RI.4.3

**A**

**Evidence:** using echo sounding, "Challenger II mapped the entire Mariana Trench... That point was named the Challenger Deep, after the ship" (OCR lines 966–971). *Others off-text.*

**Q4** RI.4.3

**C**

**Evidence:** "Some can produce a glowing light, like fireflies. This is called bioluminescence. Creatures use this light to attract prey" (OCR lines 834–835). *Others off-text (reflecting the sun, swimming up to glow, borrowing light).*

**Q5** RI.4.8

**D**

**Reasons & Evidence:** "the heavier ocean plate plunges downward at a steep angle into Earth's mantle. The bottom of the Mariana Trench is where that heavy plate of rock is moving down" (OCR lines 1136–1140). *Others off-text (ships, volcanoes blasting a hole, the weight of the water).*

**Q6** RI.4.3

**A**

**Evidence:** Walsh and Piccard "traveled there in the U.S. Navy bathyscaphe... named Trieste... five-inch-thick steel walls that would not crack under the extreme pressure" (OCR lines 1241–1245). *Others off-text (scuba gear, a remote robot, a lowered camera).*

**Q7** RI.4.5

**B**

**Text Structure:** SoT — the text uses cause and effect (a heavy plate pressing on a lighter plate causes the trench to deepen); signal words "because," "when this happens" (OCR lines 1086–1103). *Others name the wrong structure.*

**Q8** RI.4.2 TRAP

**C**

**Main Idea:** the Mariana Trench is the deepest, most extreme place on Earth — a constantly changing wonder, home to strange life, that humans can barely reach (SoT theme, OCR lines 1204–1209). **Trap:** A/B/D are true details, not the main idea.

## Selection 2 · Weird and Wondrous Rocks

INFORMATIONAL TEXT · 8 ITEMS

Q9 RI.4.2

C

**Central Idea:** the text surveys real U.S. places where rocks do amazing things (SoT key text, OCR lines 1697–1707). *Others off-topic (a hobby, one scientist's life, how rocks form underground).*

Q10 RI.4.3

A

**Evidence:** "When hit with a hammer, these rocks ring like bells" at Ringing Rocks County Park (OCR lines 1710–1711). *Others off-text.*

Q11 RI.4.3

B

**Evidence:** "The Eternal Flame burns natural gas. The gas forms from decaying organic matter and seeps out from shale rocks" (OCR lines 1843–1844). *Others off-text (a lamp, a volcano, rising lava).*

Q12 RI.4.3

D

**Evidence:** "A thin layer of ice formed on top, trapping the rocks... a mild wind pushed the ice sheets, which slowly dragged the rocks" (OCR lines 2005–2009). *Others off-text (animals, never moving, a human joke).*

Q13 RI.4.5

A

**Text Features:** SoT — bold place-name headings (Ringing Rocks County Park; Caverns of Sonora, Texas) show which place and which weird rock each section is about (SoT text-feature note). *Others misread the headings (same story everywhere, hiding the place, driving directions).*

Q14 RI.4.3

D

**Evidence:** "The caverns were formed by slow-moving water under the ground. The water dissolved the limestone layer and carried it away" (OCR lines 1873–1875). *Others off-text (a volcano, people digging, an earthquake).*

Q15 RI.4.6

B

**Author's Purpose:** SoT — "Call them natural wonders. Call them really weird rocks" opens by grabbing interest and showing ordinary rocks can surprise (OCR lines 1697–1700). *Others misread it (a how-to, calling rocks dull, a list of rules).*

Q16 RI.4.2 TRAP

C

**Main Idea:** across the U.S., ordinary rocks do extraordinary things — natural wonders that science can explain yet are still amazing (SoT theme). **Trap:** A/B/D are true details, not the main idea.

## Selection 3 · Nature's Wonders: Poetry About Our Amazing Earth

POETRY COLLECTION · 8 ITEMS

Q17 RL.4.2

A

**Central Idea:** the poems use sound, rhythm, and images to express wonder at four natural marvels (SoT theme; GENRE STUDY OCR lines 2294–2316). *Others off-topic (news, directions, arguing against visits).*

Q18 RL.4.1

B

**Evidence:** Robert Schechter's poem — "the reef's so huge it's visible / by astronauts in space"; "It's sixteen hundred miles long" (OCR lines 2453–2462). *Others off-text (glows, painted, rises above water).*

Q19 RL.4.3

D

**Evidence:** X. J. Kennedy's poem personifies the trench — it has "secrets men won't let it keep" and "goes back to sleep" (OCR lines 2598–2601). *Others off-text (sings, climbs, flies).*

Q20 RL.4.5

C

**Poem Form:** SoT — Carol R. Baik's "Mount Everest" is a concrete (shape) poem in the shape of a triangle/mountain (SoT text-feature note, OCR lines 2662–2670). *Others name a different poem type (free verse, a song, a haiku).*

Q21 RL.4.5

A

**Poem Form:** SoT — a stanza is a group of lines set apart, like a paragraph; the teacher note counts "three stanzas" in a poem (OCR lines 2534–2535). *Others name a single word / the title / the poet.*

Q22 RL.4.1

C

**Evidence:** Steven Withrow's "Aurora Borealis" — "Over the shores of Labrador / a certain rippling purple curtain" (OCR lines 2751–2752); metaphor of a curtain. *Others off-text (a sun, flowers, a fire).*

Q23 RL.4.2

D

**Central Idea:** SoT — the informational passages help readers "better understand each natural wonder, which helps me understand and enjoy the poems more" (OCR lines 2816–2822). *Others off-text.*

Q24 RL.4.2 TRAP

B

**Theme:** poetry and facts together deepen our wonder at Earth's marvels — the reef, the trench, the mountain, and the northern lights — each unique and awe-inspiring (SoT theme). **Trap:** A/C/D are true details, not the theme.

## Selection 4 · Grand Canyon: A Trail Through Time

LITERARY NONFICTION · 8 ITEMS

Q25 RI.4.2

B

**Central Idea:** the text follows a day in the Grand Canyon and explains how it was carved over millions of years (SoT key text, OCR lines 3088–3093, 3199–3201). *Others off-topic (riding a mule, the animals, the Havasupai today) — true details, not the main topic.*

Q26 RI.4.3

C

**Evidence:** "The river took almost six million years to carve the Canyon... Wind and water wore down its steep sides" (OCR lines 3199–3202). *Others off-text (an earthquake, a volcano, machines).*

Q27 RI.4.3

A

**Evidence:** visitors see "symbols of people and animals that were painted on a boulder by Havasupai Indians long ago" (OCR lines 3214–3217). *Others off-text (tourist names, a trail map, directions to town).*

Q28 RI.4.5

D

**Text Structure:** SoT — literary nonfiction told in chronological order, following the sun from a predawn storm to night (SoT text-feature note; GENRE STUDY OCR lines 2924–2932). *Others name the wrong structure.*

Q29 RI.4.1

C

**Evidence:** "fossils of prehistoric trilobites, embedded in layers of shale millions of years ago"; pink rocks are "the roots of mountains that stood there almost two billion years ago" (OCR lines 3336, 3429–3431). *Others are true canyon details (mules, coyotes, wildflowers) that do not show its age.*

Q30 RI.4.6

D

**Author's Craft:** SoT — similes "standing like sentries" and "rocks layered like multicolored ribbons" help readers picture the Canyon and feel its beauty (OCR lines 3062–3066, 3254). *Others misread it (directions, rules, painting steps).*

Q31 RI.4.3

A

**Evidence:** "Weather and erosion make tiny changes every day... the same forces of nature will continue to reshape the Grand Canyon" (OCR lines 3490, 3497–3499). *Others off-text.*

Q32 RI.4.2 TRAP

B

**Main Idea:** the Grand Canyon, carved over millions of years and still changing, is a living record of Earth's history and one of the Seven Natural Wonders of the World (SoT theme). **Trap:** A/C/D are true details, not the main idea.

# Worksheet C — IB Critical Thinking · Answer Key

5 questions · PYP Key Concepts · DOK 2–4

## Q1 Exploration DOK 3

In **"Mariana Trench / Exploring Challenger Deep,"** show HOW scientists explored the trench, then explain WHY it is so difficult to do research there.

### MODEL ANSWER

**How They Explored:** People worked for many years to study the deepest place on Earth. In 1875, scientists on the British ship HMS Challenger used a weight on a long wire to measure the depth. Later, HMS Challenger II used echo sounding, or sonar, to map the whole trench. In 1960, Don Walsh and Jacques Piccard rode to the bottom in the submersible Trieste, which had five-inch-thick steel walls. Since then, scientists have used remotely operated vehicles (ROVs) controlled from a ship and autonomous underwater vehicles (AUVs) that explore on their own. **What They Found:** They learned that the Challenger Deep is almost seven miles down, and that strange, glowing creatures actually thrive there. **Why It Is So Hard:** The trench is so deep, so cold, and under such crushing pressure that no human body could survive there. The water near the bottom would press down "heavier than hundreds of elephants." That is why people use submersibles and robots instead of diving. **What this shows:** Humans keep exploring even the most dangerous, hard-to-reach places because we want to understand the marvels of our own planet.

### KEYWORDS (3)

how = sonar, the Trieste submersible, ROVs and AUVs

found = the deepest spot, strange living creatures

why hard = too deep, cold, and crushing pressure for humans

### SCORING NOTES

- Full credit (3): how scientists explored + what they found + why it is so hard, linked to the idea of exploring a wonder.
- Partial (2): names a tool or a person but no clear reason why it is difficult.
- Minimal (1): only "it is deep" with no exploration detail.

### TEACHING STEPS

**Step 1 · Three boxes in order.**

**강사:** *"Label three boxes: How They Explored, What They Found, Why It Is So Hard."*

**코멘트.** 상자 세 칸 — 어떻게 탐험했나·무엇을 찾았나·왜 어려운가. 각 칸 채우기.

**Step 2 · Tools and people.**

**강사:** *"Underline one tool (sonar, submersible, ROV) and one explorer's name."*

**코멘트.** 도구 하나(음파탐지·잠수정·로봇)와 탐험가 이름 하나에 밑줄.

**Step 3 · Explore sentence.**

**강사:** *"Finish: 'It is hard to explore the trench because ____.'"*

**코멘트.** 문장 완성 — '해구를 탐험하기 어려운 이유는 ____이기 때문이다.'

### STUDENT PROMPTS

- "Why do scientists send robots instead of people to the bottom?"

왜 사람 대신 로봇을 바닥으로 보낼까?

- "What would happen to a person at the deepest point?"
  가장 깊은 곳에서 사람에게는 무슨 일이 생길까?
- "What place on Earth would YOU most want to explore?"
  지구에서 네가 가장 탐험하고 싶은 곳은 어디니?

## DIFFERENTIATION

**STRUGGLING** Match 2 cards ("Trieste — a submersible with people inside" / "ROV — a robot controlled from a ship") to the two ways to explore.
카드 2장 — '트리에스테(사람 탑승 잠수정)'와 'ROV(배에서 조종하는 로봇)'를 두 탐험 방법과 매칭.

**ADVANCED** Explain why an AUV that controls itself can reach places an ROV on a cable cannot.
스스로 움직이는 AUV가 케이블 달린 ROV보다 더 깊이 갈 수 있는 이유 설명.

## COMMON MISCONCEPTIONS

**PITFALL** "A diver can swim to the bottom." No human could survive the cold and pressure; they use submersibles.
잠수부가 바닥까지 헤엄칠 수 없음 — 추위와 압력 때문에 잠수정 사용.

**PITFALL** "Walsh and Piccard are made-up characters." They are real historical explorers.
월시와 피카르는 지어낸 인물이 아님 — 실존 탐험가.

## LEARNER PROFILE LINK

**INQUIRERS** Scientists ask questions and build tools to reach the unknown deep.
과학자는 질문하고 도구를 만들어 미지의 심해에 도달 — Inquirer.

**RISK-TAKERS** Walsh and Piccard dared to ride to the bottom of the world.
월시와 피카르는 세상 가장 깊은 곳으로 내려가는 도전 — Risk-taker.

## KOREAN BRIDGE

**표현** "Humans keep exploring even dangerous places to understand our planet." → "인간은 지구를 이해하려고 위험한 곳도 계속 탐험한다."
탐험(Exploration) 핵심 문장.

**단어** "trench / 해구 — submersible / 잠수정 — autonomous / 자율의 — explore / 탐험하다"
핵심 단어 영-한.

## Q2 Systems DOK 3

In **"Weird and Wondrous Rocks,"** show WHAT one weird rock does, then explain HOW the forces of nature make it happen.

### MODEL ANSWER

**The Weird Rock:** One amazing example is the sailing stones in Death Valley National Park, California. Rocks of all sizes leave long, parallel tracks across the flat, dry lakebed, as if they had moved on their own. For years, no one had ever seen them move — only the puzzling tracks were left behind. **The Cause:** Scientists set up a weather station, put tracking devices in the rocks, and used time-lapse cameras. They learned what causes the movement. Rain and snow form a shallow pond that freezes into a thin layer of ice. Sunlight breaks the ice into floating sheets, and then a mild wind pushes the ice, which slowly drags the rocks along. **The Effect:** As the ice and wind move the rocks, they leave the telltale tracks in the mud. **Why it is still amazing:** Even though science has solved the mystery, it is still wonderful to imagine heavy rocks sliding silently across the desert floor. **What this shows:** Earth's natural wonders are shaped by systems — wind, water, ice, and rock working together. Understanding how they work does not make them any less amazing.

### KEYWORDS (3)

rock = sailing stones that leave tracks in Death Valley

cause = ice sheets pushed by a mild wind drag the rocks

system = wind, water, ice, and rock work together

### SCORING NOTES

- Full credit (3): names a weird rock + the force of nature that causes it + the effect it produces.
- Partial (2): names a rock but gives a vague or wrong cause.
- Minimal (1): only "the rocks are weird" with no cause.

### TEACHING STEPS

**Step 1 · Three boxes.**

**강사:** *"Fill three boxes: The Weird Rock, The Cause, The Effect."*

**코멘트.** 세 칸 — 이상한 바위·원인·결과. 각 칸 채우기.

**Step 2 · Find the force.**

**강사:** *"Underline the force of nature (wind, water, ice, or iron) behind your rock."*

**코멘트.** 바위 뒤에 있는 자연의 힘(바람·물·얼음·철분)에 밑줄.

**Step 3 · Cause sentence.**

**강사:** *"Finish: 'These rocks ___ because ___.'"*

**코멘트.** 문장 완성 — '이 바위들은 ____ 때문에 ____한다.'

### STUDENT PROMPTS

- "Why did people once think the sailing stones moved by magic?"
  왜 사람들은 한때 바위가 마법으로 움직인다고 생각했을까?
- "How did cameras help scientists solve the mystery?"
  카메라는 과학자가 수수께끼를 푸는 데 어떻게 도움이 됐을까?
- "What is a sound or sight in nature near YOU that science explains?"

네 주변 자연에서 과학으로 설명되는 소리나 광경이 있니?

## DIFFERENTIATION

**STRUGGLING** Match 3 rock cards (ringing rocks / eternal flame / sailing stones) to what each one does.

바위 카드 3장 — 우는 바위·꺼지지 않는 불·움직이는 바위를 각각의 현상과 매칭.

**ADVANCED** Explain how ice can move a rock heavier than a child, step by step.

얼음이 아이보다 무거운 바위를 움직이는 과정을 단계별로 설명.

## COMMON MISCONCEPTIONS

**PITFALL** "Animals or people push the sailing stones." Thin ice sheets pushed by wind drag them.

동물·사람이 미는 게 아님 — 바람이 민 얇은 얼음판이 끌고 감.

**PITFALL** "Diabase and grotto are vocabulary words." They are science/topic terms, not Critical Vocabulary.

'diabase'·'grotto'는 시험 어휘가 아님 — 과학 용어.

## LEARNER PROFILE LINK

**THINKERS** Solving the rock mystery takes careful observation and reasoning.

바위 수수께끼 풀이는 세심한 관찰과 추론이 필요 — Thinker.

**KNOWLEDGEABLE** Learning the forces of nature builds science knowledge.

자연의 힘을 배우며 과학 지식을 쌓음 — Knowledgeable.

## KOREAN BRIDGE

**표현** "Earth's wonders are shaped by systems of wind, water, ice, and rock." → "지구의 경이는 바람·물·얼음·암석이 이루는 시스템으로 만들어진다."

시스템(Systems) 핵심 문장.

**단어** "eternal / 영원한 — organic / 유기물의 — intriguing / 흥미로운 — system / 체계"

핵심 단어 영-한.

## Q3 Wonder DOK 3

In **"Nature's Wonders,"** choose TWO poems, then explain how a poem helps you FEEL the wonder of a natural place.

### MODEL ANSWER

**Poem 1 and Its Wonder:** In Robert Schechter's poem "The Great Barrier Reef," the poet feels awe at the huge reef off Australia. He repeats that it is "sixteen hundred miles long" and says the reef is "so huge it's visible / by astronauts in space." Words like *huge*, *awesome*, and *beautiful* show how amazed he is. **Poem 2 and Its Wonder:** In Carol R. Baik's "Mount Everest," the poet describes climbing the world's highest mountain. The poem is shaped like a triangle, and the words make us feel the cold and the danger — "the wind's wrath whips through our tents, as my heart skips and trips." We feel the struggle to "climb to the top of Mount Everest." **How facts and poems work together:** Each poem is paired with a short passage of facts about the same wonder. The facts tell us how big or how high the place is, and the poem makes us feel its wonder with images and sound. **What this shows:** A poem helps us not just KNOW about a natural wonder but FEEL it — its size, its danger, and its beauty — so the marvels of Earth seem even more amazing.

### KEYWORDS (3)

poem 1 = "The Great Barrier Reef" — awe at a huge reef

poem 2 = "Mount Everest" — the cold, dangerous climb

wonder = poems make us FEEL a natural place, not just know it

### SCORING NOTES

- Full credit (3): two named poems + the wonder each is about + how a poem helps us feel the wonder.
- Partial (2): names two poems but no link to feeling or wonder.
- Minimal (1): only "the poems are nice" with no example.

### TEACHING STEPS

**Step 1 · Two columns.**

**강사:** *"Make two columns: Poem 1 & Its Wonder / Poem 2 & Its Wonder."*

**코멘트.** 두 칸 — 시1과 그 경이 / 시2와 그 경이.

**Step 2 · Feeling words.**

**강사:** *"Underline one word in each poem that shows a feeling (huge, awesome, wrath)."*

**코멘트.** 각 시에서 감정을 보여 주는 낱말 하나에 밑줄(huge·awesome·wrath).

**Step 3 · Wonder sentence.**

**강사:** *"Finish: 'The poem makes me feel ___ about ___.'"*

**코멘트.** 문장 완성 — '이 시는 ____에 대해 ____을 느끼게 한다.'

### STUDENT PROMPTS

- "How does the shape of the 'Mount Everest' poem add to its meaning?"
  '마운트 에베레스트' 시의 모양은 의미에 무엇을 더하니?
- "Which words make the Great Barrier Reef feel huge and awesome?"
  어떤 낱말이 대보초를 거대하고 경이롭게 느끼게 하니?
- "What natural place fills YOU with wonder, and why?"

어떤 자연이 너를 경이로 채우니? 왜?

## DIFFERENTIATION

**STRUGGLING** Match 2 cards ("a reef so big it is seen from space" / "the wind's wrath on a mountain") to the two poems.

카드 2장 — '우주에서 보이는 거대한 산호초'와 '산 위 바람의 분노'를 두 시와 매칭.

**ADVANCED** Explain how a concrete poem's shape adds meaning the words alone cannot.

모양시의 형태가 낱말만으로는 못 주는 의미를 더하는 방식 설명.

## COMMON MISCONCEPTIONS

**PITFALL** "Nature's Wonders is one poem." It is a collection of four poems by four different poets.

'자연의 경이'는 한 편이 아님 — 네 시인의 네 편 모음.

**PITFALL** "Every poem must rhyme." Poems use shape, sound, and images too, not only rhyme.

모든 시가 운을 맞추는 건 아님 — 모양·소리·이미지도 사용.

## LEARNER PROFILE LINK

**COMMUNICATORS** Poets communicate wonder through images, sound, and shape.

시인은 이미지·소리·모양으로 경이를 전달 — Communicator.

**OPEN-MINDED** Pairing facts with poems opens two ways to know a place.

사실과 시를 함께 보며 한 장소를 두 방식으로 앎 — Open-minded.

## KOREAN BRIDGE

**표현** "A poem helps us not just know a wonder but feel it." → "시는 경이를 아는 것을 넘어 느끼게 해 준다."

경이(Wonder) 핵심 문장.

**단어** "diverse / 다양한 — idle / 한가한 — fathom / 헤아리다 — wrath / 분노 — wonder / 경이"

핵심 단어 영-한.

## Q4 Change DOK 3

In **"Grand Canyon: A Trail Through Time,"** show how the Canyon CHANGED in the past, then explain how it keeps changing TODAY.

### MODEL ANSWER

**How It Was Carved (Past):** The Grand Canyon was shaped over an enormous amount of time. The Colorado River took almost six million years to carve a channel about one mile deep and more than 275 miles long. Wind and water wore down the steep sides, widening the chasm between the cliffs. The rock layers hold the story of the past: there are fossils of fish teeth and seashells, fossils of prehistoric trilobites embedded in shale, and pink rocks that are "the roots of mountains" from almost two billion years ago. **How It Changes (Now):** The Canyon is still changing today. Weather and erosion make tiny changes every day in the rocky walls. Wind, rain, and the rushing Colorado River keep grinding down the rock and dragging it away, slowly making the Canyon deeper and wider. **A trail through time:** As visitors ride down the trail, the layers of rock and fossils let them look back through millions of years of Earth's history. **What this shows:** The Grand Canyon is a record of change. It was carved by slow forces long ago and is still being reshaped, so it connects the deep past to the present and the future.

### KEYWORDS (3)

past = the river carved it over almost six million years

now = wind, rain, and the river still reshape it daily

change = rock layers and fossils show Earth's history

### SCORING NOTES

- Full credit (3): how the Canyon was carved in the past + how it changes now + the idea of looking back through time.
- Partial (2): names the river or erosion but does not connect past and present.
- Minimal (1): only "it is very big" with no idea of change.

### TEACHING STEPS

**Step 1 · Two columns.**

**강사:** *"Make two columns: How It Was Carved (Past) / How It Changes (Now)."*

**코멘트.** 두 칸 — 과거에 어떻게 깎였나 / 지금은 어떻게 변하나.

**Step 2 · Forces of change.**

**강사:** *"Underline the forces that carve the Canyon: river, wind, water, erosion."*

**코멘트.** 협곡을 깎는 힘에 밑줄 — 강·바람·물·침식.

**Step 3 · Change sentence.**

**강사:** *"Finish: 'The Grand Canyon keeps changing because ____.'"*

**코멘트.** 문장 완성 — '그랜드 캐니언은 ____ 때문에 계속 변한다.'

### STUDENT PROMPTS

- "Why does the author call the Canyon 'a trail through time'?"
  저자는 왜 협곡을 '시간을 지나는 길'이라고 부를까?
- "How do fossils in the rock show how old the Canyon is?"
  바위 속 화석은 협곡이 얼마나 오래됐는지 어떻게 보여 주니?

- "What place near YOU has changed slowly over a long time?"
  네 주변에서 오랜 시간 천천히 변한 곳은 어디니?

## DIFFERENTIATION

**STRUGGLING** Match 2 cards ("the river carved it long ago" / "wind and rain change it now") to past and present.

카드 2장 — '강이 오래전에 깎음'과 '바람·비가 지금 변화시킴'을 과거·현재와 매칭.

**ADVANCED** Explain how the rock layers act like the pages of a history book.

암석층이 역사책의 페이지처럼 작동하는 방식 설명.

## COMMON MISCONCEPTIONS

**PITFALL** "The Canyon was made all at once." It formed slowly over almost six million years and is still changing.

한 번에 생긴 게 아님 — 약 600만 년에 걸쳐 천천히 형성, 지금도 변함.

**PITFALL** "Weathering and erosion are vocabulary words." They are the teacher reference-source terms, not Critical Vocabulary.

'weathering'·'erosion'은 시험 어휘가 아님 — 교사용 참고 단어.

## LEARNER PROFILE LINK

**REFLECTIVE** Looking at rock layers makes us reflect on deep time.

암석층을 보며 아득한 시간을 성찰 — Reflective.

**KNOWLEDGEABLE** The Canyon teaches the history of our planet.

협곡은 지구의 역사를 가르쳐 줌 — Knowledgeable.

## KOREAN BRIDGE

**표현** "The Grand Canyon is a record of change, connecting the past to the future." → "그랜드 캐니언은 과거와 미래를 잇는 변화의 기록이다."

변화(Change) 핵심 문장.

**단어** "shatter / 산산이 부수다 — chasm / 깊은 틈 — glistens / 반짝이다 — embedded / 박힌 — eroding / 침식되는 — change / 변화"

핵심 단어 영-한.

## Q5 Inquiry DOK 4

**Essential Question:** What makes Earth's natural wonders exciting and unique? Use ideas from TWO of the selections in this module to answer.

### MODEL ANSWER

Earth's natural wonders are exciting and unique because each one is one of a kind, shaped by powerful forces, and full of surprises we are still discovering. In **"Mariana Trench / Exploring Challenger Deep,"** the deepest place in the world is so far down that crushing pressure and cold would crush a person, yet strange, glowing creatures thrive there. People have used submersibles and robots to explore it, and it is still being reshaped by Earth's moving plates. In **"Grand Canyon: A Trail Through Time,"** a mile-deep canyon was carved by the Colorado River over almost six million years. Its rock layers and fossils let visitors look back through Earth's history, and wind, water, and erosion keep changing it today. **My Big Idea:** As Nancy Newhall said, "The wilderness holds answers to more questions than we yet know how to ask." Earth's natural wonders — the deepest trench and the grandest canyon — are exciting because they are unique, ever-changing, and far bigger and older than we are. They fill us with wonder and make us want to keep exploring our amazing planet.

### KEYWORDS (3)

Mariana Trench = deepest place, strange life, still changing

Grand Canyon = carved over millions of years, a record of time

Big Idea: wonders are unique, ever-changing, and awe-inspiring

### SCORING NOTES

- Full credit (4): two selections named + which wonder each is + what makes each exciting and unique + a Big Idea answering the EQ.
- Partial (3): two selections + wonders + Big Idea weak.
- Developing (2): one selection only.
- Minimal (1): generic ("nature is cool") without naming a selection.

### SYNTHESIS FRAME

| SELECTION 1 IDEA | CONNECTING WORD | SELECTION 2 IDEA |
|---|---|---|
| Name the wonder and what makes it unique: Mariana Trench = the deepest, most extreme place, home to strange life; Weird and Wondrous Rocks = ordinary rocks that ring, burn, and sail; Nature's Wonders = poems of awe at the reef, trench, mountain, aurora; Grand Canyon = a mile-deep record of Earth's history. | BOTH / AND — joins two selections (for example the Mariana Trench AND the Grand Canyon) into one Big Idea about what makes natural wonders exciting and unique. | A different selection than Selection 1 — so the two show two ways Earth's wonders are exciting and unique. |

### REAL-WORLD CONNECTION

KOREA 자연의 경이는 멀리 있지 않다 — 깊은 바다, 거대한 협곡, 우는 바위, 밤하늘의 오로라 모두 지구가 만든 경이다. 저마다 하나뿐이고, 끊임없이 변하며, 우리보다 훨씬 크고 오래됐기에 흥미롭다.

한국에서 가 본 자연 명소 하나를 떠올려 EQ와 연결하기.

PERSONAL Which natural wonder — a trench, a canyon, a rock, or the northern lights — most fills you with wonder, and why?

해구·협곡·바위·오로라 중 너에게 가장 경이로운 것은 무엇이니? 왜?

## RUBRIC

| LEVEL | WHAT IT LOOKS LIKE |
|---|---|
| **Exceeding (4)** | Names 2 selections + which wonder each is + what makes each exciting and unique + a Big Idea answering the EQ. |
| **Meeting (3)** | Names 2 selections + a wonder for each + a Big Idea. |
| **Approaching (2)** | Names 2 selections but only retells facts — no link to what makes a wonder exciting and unique. |
| **Beginning (1)** | Generic ("nature is amazing") without text evidence. |

**Watch out:** Many G4 students will just retell facts (the trench is deep; the canyon is big) and stop. Push them to say WHAT MAKES each wonder exciting and unique — it is one of a kind, shaped by powerful forces, ever-changing, home to strange life — and to write a Big Idea. The EQ asks what makes wonders exciting and UNIQUE, not just what they are.

## TEACHING STEPS

**Step 1 · Two selection cards.**

**강사:** *"Pick 2 selections. For each, name the natural wonder it is about."*

**코멘트.** 선택지 둘 — 각각 어떤 자연의 경이를 다루는지 적기.

**Step 2 · What makes it unique.**

**강사:** *"Under each, write what makes that wonder exciting and unique."*

**코멘트.** 각각 아래 — 그 경이가 흥미롭고 특별한 이유 적기.

**Step 3 · Big Idea sentence.**

**강사:** *"Write one sentence answering the EQ. Use both selections."*

**코멘트.** EQ에 답하는 한 문장 — 두 선택지 모두 사용.

## STUDENT PROMPTS

- "Which natural wonder is in each selection you chose?"
  고른 선택지마다 어떤 자연의 경이가 나오니?
- "What makes a place 'unique' — one of a kind?"
  한 장소가 '유일무이'하다는 건 무슨 뜻이니?
- "Why does Nancy Newhall say the wilderness holds 'answers to more questions than we yet know how to ask'?"
  낸시 뉴홀은 왜 야생이 '우리가 아직 물을 줄도 모르는 질문의 답'을 품고 있다고 말할까?

## DIFFERENTIATION

STRUGGLING Sentence frame: "In ___, the wonder is ___. It is unique because ___. Earth's wonders are ___."

문장 골격 제공.

ADVANCED Use THREE selections and sort them by what makes each unique (deepest / oldest / weirdest / most beautiful).

선택지 셋 사용 — 특별함의 종류별 분류(가장 깊음·가장 오래됨·가장 이상함·가장 아름다움).

## COMMON MISCONCEPTIONS

PITFALL "Retelling the facts answers the EQ." The EQ asks what makes a wonder exciting and UNIQUE, not just what it is.

사실 요약은 EQ 답이 아님 — '무엇이 특별하게 만드는지'를 물음.

PITFALL "The quote is by a story author." It is the module EPIGRAPH by Nancy Newhall, a real writer, not a story author.

인용문은 이야기 작가의 말이 아님 — 실존 작가 낸시 뉴홀의 에피그래프.

## LEARNER PROFILE LINK

THINKERS Building one Big Idea from two selections is the heart of critical thinking.

두 선택지로 하나의 Big Idea를 세움 — Thinker.

INQUIRERS Newhall's words remind us the wilderness still holds questions to explore.

뉴홀의 말은 야생이 아직 탐구할 질문을 품고 있음을 일깨움 — Inquirer.

## KOREAN BRIDGE

표현 "Earth's natural wonders are unique, ever-changing, and fill us with wonder." → "지구의 자연 경이는 유일무이하고, 끊임없이 변하며, 우리를 경이로 채운다."

M6 마무리 문장 — 학생 글쓰기 핵심.

인용 "The wilderness holds answers to more questions than we yet know how to ask." — Nancy Newhall → "야생은 우리가 아직 물을 줄도 모르는 질문의 답을 품고 있다."

에피그래프 — 탐구와 경이.

# Worksheet D — MAP Practice · Answer Key

20 items · RIT 200 → 220 · Lexile 500L–800L

## MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Singing Sand Dune · **185 words** · Lexile 500–560L · RIT 200–206
- Passage 2 · The Glowworm Cave · **192 words** · Lexile 560–620L · RIT 206–211
- Passage 3 · The Waterfall That Falls Up · **200 words** · Lexile 620–700L · RIT 211–216
- Passage 4 · The Forest That Drinks the Fog · **200 words** · Lexile 700–800L · RIT 216–220

All four passages within target band 150–220 words; RIT 200→220; Lexile 500L–800L. Word counts match the workbook passage meta exactly. Each passage shows a different natural wonder — a singing dune, a glowing cave, an upside-down waterfall, and a fog-fed forest. Passages are NEW — no recall of the four anchor selections.

## PASSAGE 1 · THE SINGING SAND DUNE

### Q1 RIT 200

**C**

**Lexile 500L · Key Detail.** "a giant hill of sand called a dune." *Distractors off-text (a valley, a plant, a drum).*

### Q2 RIT 202

**A**

**Lexile 520L · Key Detail.** "the dune makes a deep, low hum. The sound can last for many minutes." *Distractors off-text (a whistle, a whisper, no sound).*

### Q3 RIT 203

**D**

**Lexile 530L · Cause & Effect.** "thousands of grains slide and rub together, they shake at the same speed. This shaking makes the humming sound." *Distractors off-text (spirits, rain, wind through rocks).*

### Q4 RIT 205

**B**

**Lexile 550L · Inference.** "For a long time, no one knew why the sand made noise... Some thought spirits lived inside." *Distractors miss it (tall dunes, moving dunes, the wind carrying voices).*

### Q5 RIT 206

**C**

**Lexile 560L · Main Idea.** "the singing dunes are not magic... made by simple grains of sand moving together," yet a wonder to hear. *Distractors are true but narrow details (only a few dunes sing, old stories, dry sand).*

## PASSAGE 2 · THE GLOWWORM CAVE

### Q6 RIT 206

**D**

**Lexile 560L · Key Detail.** "Visitors climb into a small boat and float along an underground river." *Distractors off-text (a stone path, a ladder, swimming).*

### Q7 RIT 208

**A**

**Lexile 580L · Key Detail.** "They are living creatures called glowworms." *Distractors off-text (electric lights, real stars, water drops).*

### Q8 RIT 209

**B**

**Lexile 590L · Cause & Effect.** "Small bugs in the cave are drawn to the bright dots, just as moths are drawn to a lamp." *Distractors off-text (escaping water, the wind, following other bugs).*

### Q9 RIT 210

**C**

**Lexile 600L · Vocabulary.** "makes its own light from inside its body. This kind of glow is called bioluminescence." *Distractors take the wrong source of light (sun, flashlight, burning gas).*

### Q10 RIT 211

**D**

**Lexile 620L · Main Idea.** "a quiet, magical sight that nature alone could make" — tiny creatures light a dark cave. *Distractors are true but narrow details (the boat ride, the larva fact, brightest catch most bugs).*

## PASSAGE 3 · THE WATERFALL THAT FALLS UP

**Q11** RIT 211

**A**

**Lexile 620L · Key Detail.** "Most waterfalls tumble down. Water pours over a cliff and crashes onto the rocks below." *Distractors off-text (freezing, flowing up, spraying sideways).*

**Q12** RIT 212

**B**

**Lexile 640L · Key Detail.** "the wind catches the water and blows it back into the air. Instead of falling down, the spray rises like smoke." *Distractors off-text (steam, a pump, the cliff tipping).*

**Q13** RIT 213

**D**

**Lexile 660L · Inference.** "Gravity still pulls it down... The trick is the wind. When the wind blows harder than gravity can pull, the light spray is lifted." *Distractors misread it (a mind of its own, no gravity, never falling again).*

**Q14** RIT 215

**C**

**Lexile 680L · Cause & Effect.** "As soon as the wind dies down, the water falls again in the normal way." *Distractors off-text (the stream drying, ice, spray rising on its own).*

**Q15** RIT 216

**A**

**Lexile 700L · Main Idea.** "for a few moments it is one of the most surprising sights in nature" — wind briefly lifts the spray, and science explains it. *Distractors are true but narrow details (it lasts a short time, wind beats gravity, most waterfalls pour down).*

## PASSAGE 4 · THE FOREST THAT DRINKS THE FOG

**Q16** RIT 216

**B**

**Lexile 700L · Key Detail.** "High on a hill near the sea, a forest of tall trees stands wrapped in mist." *Distractors off-text (a desert, a flat island, the dry land below the hill).*

**Q17** RIT 217

**C**

**Lexile 720L · Cause & Effect.** "the drops cling to the needles and leaves... they trickle down the branches and drip onto the ground." *Distractors off-text (hoses, a hilltop river, deep roots).*

**Q18** RIT 218

**D**

**Lexile 740L · Vocabulary.** "Scientists call this 'fog drip'" — water the trees gather from fog and let drip to the ground. *Distractors take the wrong source (storm rain, spring snowmelt, a well).*

**Q19** RIT 219

**A**

**Lexile 770L · Inference.** "The trees and the fog work together as one system... the water keeps the whole forest alive." *Distractors miss it (fog disappearing, working against each other, trees making fog).*

**Q20** RIT 220

**B**

**Lexile 800L · Main Idea.** "a quiet partnership between the land, the sea, and the sky" — trees comb water from the air to keep the forest alive. *Distractors are true but narrow details (fog is water drops, one tree gathers gallons, ferns and moss below).*
