Module Overview

Essential Question: What can people do to care for our planet?
Quote: "The environment is where we all meet... it is the one thing all of us share." — Lady Bird Johnson
Big Idea Words (4): ecology, conservation, sanctuary, recycle
Main Selections (workbook 4):

- Luz Sees the Light · Claudia Davila · Graphic Novel
- On Sea Turtle Patrol and Saving the Kemp's Ridley Sea Turtle · Nancy Dawson (illus. Denise Ortakales); video from Texas Parks and Wildlife · Realistic Fiction + Informational Video
- How Can We Reduce Household Waste? · Mary K. Pratt · Informational / Argumentative Text
- Seeds of Change · Jen Cullerton Johnson (illus. Sonia Lynn Sadler) · Biography

Note. The SoT lists 25 core vocabulary items on Worksheet A (4 Big Idea + 6 Luz Sees the Light + 6 On Sea Turtle Patrol + 2 How Can We Reduce Household Waste? + 7 Seeds of Change), in myBook appearance order. This G4 Teacher's Guide labels each selection's panel "Critical Vocabulary" — the string "Power Words" does not appear in the source. The teacher "Words for Using Synonyms and Antonyms / Homographs and Homophones / Multiple-Meaning Words" strategy boxes (garbage/trash, alone/together, lying, tow, trap/release, rot/decompose, reusable/disposable, bark, capital) and inline LANGUAGE notes (the idiom "in the hands of," the multiple-meaning word "waste") are NOT counted as core vocabulary. "The Eco Guardians" is the Letters/Big-Idea Short Read (no Critical Vocabulary panel) and carries the 4 Big Idea Words; it is excluded from the per-selection workbook units.

Answer Distribution (77 Multiple-Choice Items)

Verified counts across Worksheets A (25), B (32), and D (20). Worksheet C is open-response IB and not counted in MCQ balance.

A · 20 · B · 19 · C · 19 · D · 19

These four totals are the count of correct-answer LETTERS (A/B/C/D) across all 77 multiple-choice items — exactly 20 are "A", 19 are "B", 19 are "C", and 19 are "D". Within each worksheet: Worksheet A = 7/6/6/6 (25), Worksheet B = 8/8/8/8 (32), Worksheet D = 5/5/5/5 (20). The correct answer is now scattered across all three sections (no A-B-C-D running cycle, no three identical letters in a row) by choice-order rotation only; correct-answer meanings are preserved from the Source of Truth, and weak vocabulary distractors were replaced with same-part-of-speech baits drawn from each word's own meaning field. All 25 SoT vocabulary words are covered on Worksheet A in myBook appearance order (Big Idea → Luz Sees the Light → On Sea Turtle Patrol → How Can We Reduce Household Waste? → Seeds of Change).

Voca Trap Items (Worksheet A)

8 of 25 = 32%, all flagged below. Trap pattern: opposite-meaning / wrong-field baits drawn from the natural meaning field of each word — no hallucination.

- Q6 **sufficient** — opposite bait ("far too little," "much more than anyone could ever use") vs. "just what is needed and no more"
- Q10 **abandoned** — opposite bait ("carefully cared for," "brand new," "full of people") vs. "no longer cared for or used"
- Q12 **disoriented** — opposite bait ("sure of exactly where they are going") vs. "confused about where they are"
- Q13 **blunt** — opposite bait ("pointed and very sharp") vs. "flat or rounded, rather than sharp"
- Q18 **decay** — opposite bait ("stay fresh and new forever," "grow larger and stronger") vs. "slowly break down and rot"
- Q22 **sneered** — opposite bait ("showed kindness and warm respect") vs. "showed disapproval and lack of respect by the look on your face"
- Q23 **outspoken** — opposite bait ("stay silent," "only agree with whatever others say") vs. "say what you think even when others do not agree"
- Q25 **envision** — opposite / wrong-field bait ("forget that it ever existed," "knock it down") vs. "picture it in your mind"

Reading Trap Items (Worksheet B)

1 of 32 = 3%, flagged below. Trap pattern for Section B: theme / lesson bait (a true detail mistaken for the central lesson) with length-balanced correct answers so a longest-option-wins guess fails. Distractors built from the SoT only — no hallucination. Two anchors are LITERARY (RL) — Luz Sees the Light (graphic novel) and Seeds of Change (biography) — and two are INFORMATIONAL (RI) — On Sea Turtle Patrol's paired video and How Can We Reduce Household Waste?. Codes used are RL.4.1 / .2 / .3 / .5 / .6 and RI.4.1 / .2 / .3 / .5 / .6 / .8. **RI.4.4, RI.4.7, and RL.4.7 are NOT used**, and there are no "from the text" snippet boxes. The single Section B theme trap is reserved for the biography, where a stated theme exists.

- Q32 **Seeds of Change theme** — "Wangari's mother shows her a tree," "Wangari is a very good science student," "Wangari travels to the city to study" are true details, baited against the real lesson: one determined person, rooted in love of family and the land, can plant "seeds of change" and help protect the natural world

The informational items (the sea-turtle video and the household-waste text) are tested with central-idea, key-detail, text-structure, author's-purpose, and argument-and-evidence (RI.4.8) items rather than theme traps, because informational texts state central ideas, not story morals. This keeps every Section B distractor grounded in the Source of Truth.

VERIFIED

How Every Item Is Grounded

Every item on this Answer Key traces to the Source-of-Truth JSON for G4 Module 9, built from the Teaching Pal OCR (6,655 lines, 56 spread-pages incl. back-of-book Glossary) and verified against the PDF intro spreads (every Critical Vocabulary panel was read from a high-resolution crop, and each panel's rounded bottom corner was confirmed so no words are cut off). No characters, words, or events outside the Source of Truth were added.

- **Vocabulary (Worksheet A):** all 25 words come from the module's Big Idea Words (4: ecology, conservation, sanctuary, recycle) and the four "Critical Vocabulary" panels — Luz Sees the Light 6, On Sea Turtle Patrol 6, How Can We Reduce Household Waste? 2, Seeds of Change 7. Each meaning is checked against the back-of-book Glossary (OCR lines ~5660–6654), which contains every one of the 25 words, and against surviving inline footnote definitions (frequent, sufficient, obsessed, estimate). The teacher strategy boxes (garbage/trash, alone/together, lying, tow, trap/release, rot/decompose, reusable/disposable, bark, capital) and craft notes ("in the hands of," "waste") are deliberately NOT counted as core vocabulary.
- **Terminology:** this G4 Teacher's Guide labels each panel "Critical Vocabulary," not "Power Words" — the workbook uses that exact label, matching the source.
- **Reading (Worksheet B):** the 32 items use RL.4 codes for the two literary anchors (Luz Sees the Light, Seeds of Change) and RI.4 codes for the informational content (the sea-turtle paired video and How Can We Reduce Household Waste?). Each correct answer is grounded in the Source of Truth; distractors are SoT-anchored, never invented. RI.4.4, RI.4.7, and RL.4.7 are not used, and there are no "from the text" snippet boxes.
- **Genre & credits:** Luz Sees the Light = Graphic Novel (by Claudia Davila, author-illustrator; characters Luz, Robert, Anika, Gord, Luz's mother); On Sea Turtle Patrol = Realistic Fiction (by Nancy Dawson, illus. Denise Ortakales; narrator Callie, her grandmother Gram, her Dad) PAIRED with the Informational Video "Saving the Kemp's Ridley Sea Turtle" (video from Texas Parks and Wildlife); How Can We Reduce Household Waste? = Informational/Argumentative Text (by Mary K. Pratt; no characters); Seeds of Change = Biography (by Jen Cullerton Johnson, illus. Sonia Lynn Sadler; subject Wangari Maathai and her mother).
- **IB (Worksheet C):** the PYP concepts — Responsibility, Sustainability, Responsibility, Change, Inquiry — follow the Source-of-Truth themes of this module. The Essential Question text on Q5 matches the workbook word for word. Korean teacher guidance appears in Section C only; Sections A, B, and D are in English.
- **MAP (Worksheet D):** four NEW passages (186 / 195 / 190 / 215 words), RIT 200→220, Lexile 500L–800L. None recall the four anchor selections; each is a different conservation text (a neighborhood-park story, a sea-turtle lighting story, a how-recycling-works explanation, and a reforestation story).
- **Answer balance:** 77 multiple-choice items distribute as 20 "A" / 19 "B" / 19 "C" / 19 "D"; every meaning is preserved from the Source of Truth.

MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Park on Maple Street · **186 words** · Lexile 500–560L · RIT 200–206
- Passage 2 · The Lighthouse and the Turtles · **195 words** · Lexile 560–620L · RIT 206–211
- Passage 3 · How a Plastic Bottle Is Recycled · **190 words** · Lexile 620–700L · RIT 211–216
- Passage 4 · The Girl Who Planted a Forest · **215 words** · Lexile 700–800L · RIT 216–220

Word counts match the workbook passage meta exactly. All four within target band 150–220 words; RIT 200→220; Lexile 500L–800L. Each passage connects to the module's conservation topic. Passages are NEW — no recall of the four anchor selections.

What This Module Does NOT Contain (Guardrails)

- No "Power Words" label — the G4 source says "Critical Vocabulary."
- No Worksheet E — this workbook series uses four worksheets (A · B · C · D).
- The module quote is by Lady Bird Johnson and is the EPIGRAPH only — it is NOT a story author.
- "The Eco Guardians" is the Letters/Big-Idea Short Read (no Critical Vocabulary panel) and is excluded from the per-selection units; it carries the 4 Big Idea Words instead. Its author is unverified — no byline in the source (the signatures "Jolena Walker" and "Emelia Garcia" are fictional letter-writers, not the author).
- Critical Vocabulary counts are 6 / 6 / 2 / 7 = 21, not evened out. Big Idea (4) + Critical (21) = 25 total. How Can We Reduce Household Waste? genuinely has only 2 (estimate, decay); Seeds of Change genuinely has 7.
- "On Sea Turtle Patrol and Saving the Kemp's Ridley Sea Turtle" is ONE paired selection — a Realistic Fiction print text plus an Informational Video (from Texas Parks and Wildlife). The 6 Critical Vocabulary words are shared across the pair. This in-module video is distinct from the module-opener "Get Curious" video "Young Guardians," which is not a graded selection.
- In Seeds of Change, "Wangari (Maathai)" is the biography's SUBJECT, not its author (Jen Cullerton Johnson).
- The topic strand is "SCIENCE CONNECTION: Conservation." Module 10 "Communication Nation" (SOCIAL STUDIES CONNECTION) is out of scope and not mixed in.
- Performance Task = "Write an Expository Essay."

Worksheet C — IB Critical Thinking · Answer Key

5 questions · PYP Key Concepts · DOK 2–4

Q1 Responsibility DOK 3

In **"Luz Sees the Light,"** show WHAT problem Luz notices, then explain HOW she takes responsibility and what it teaches.

MODEL ANSWER

The Problem: Luz and her friends love listening to music and taking frequent trips to the mall. Then blackouts dim her neighborhood, and Luz finds that she cannot do some of her favorite activities. Her neighbor Gord warns that people need to prepare for more blackouts by becoming more self-sufficient, and her mother points out how rising gas prices affect things Luz cares about, like trips to the mall and groceries. The problem is that the way Luz has been using energy cannot last. **What Luz Does:** Luz realizes that maybe it is time to use less energy and to be more self-sufficient. She decides to turn an abandoned lot into a neighborhood park and garden, and she asks her friends and neighbors to help. Robert and Anika agree, and Robert says, "What are friends for?" **Why It Matters:** Luz takes responsibility for her own choices instead of waiting for someone else. When she works together with her friends and neighbors, a small personal change grows into something good for the whole community. **What this shows:** When one person takes responsibility for small, everyday choices about energy and works with others, it can make a real, positive difference for the environment and the community.

KEYWORDS (3)

- problem = blackouts and rising prices show energy use cannot last
- what Luz does = uses less energy and builds a neighborhood park with friends
- lesson = taking responsibility and working together makes a difference

SCORING NOTES

- Full credit (3): the problem (blackouts / energy use) + what Luz does (use less energy, build the park) + the lesson about responsibility.
- Partial (2): names a problem or a choice but no clear lesson.
- Minimal (1): only "Luz helps the environment" with no problem or lesson.

TEACHING STEPS

Step 1 · Three boxes in order.

강사: *"Label three boxes: The Problem, What Luz Does, Why It Matters."*

코멘트. 상자 세 칸 — 문제·루즈가 한 일·왜 중요한가. 각 칸 채우기.

Step 3 · Lesson sentence.

강사: *"Finish: 'When Luz took responsibility for ___, it helped because ___.'"*

책임(Responsibility) 핵심 문장.

단어 "frequent / 잦은 — sufficient / 충분한 — abandoned / 버려진 — conservation / 보존"
핵심 단어 영-한.

Q2 Sustainability DOK 3

In **"On Sea Turtle Patrol,"** show WHAT the turtles need, then explain HOW protecting them helps care for the planet.

MODEL ANSWER

What Turtles Need: The story and its paired video show that sea turtles need people to watch over them. Some species of sea turtles are endangered, and without protection and help from humans, they could become extinct. The volunteers walk along the water's edge looking for fresh turtle tracks, which scientists call "crawls," so they can find and protect the nests. **How People Help:** Callie, a twelve-year-old visiting her grandmother in Florida, gets up early every day to go on sea-turtle patrol with Gram. By tracking the nests and keeping a record, the volunteers help more baby turtles survive. The paired video, "Saving the Kemp's Ridley Sea Turtle" from Texas Parks and Wildlife, shows real efforts to protect an endangered turtle. **Why It Lasts:** Protecting one kind of animal helps keep the whole environment healthy. If people care for endangered species now, those animals can survive into the future instead of disappearing. **What this shows:** Even a kid like Callie can help protect endangered sea turtles, and protecting living things is an important way to care for the planet for years to come.

KEYWORDS (3)

need = some sea turtles are endangered and need human protection

help = Callie and Gram patrol the beach and track the nests

lasts = protecting a species keeps the environment healthy for the future

SCORING NOTES

- Full credit (3): what the turtles need (protection because they are endangered) + how people help (patrol/track nests) + why it matters for the future.

Q3 Responsibility DOK 3

In **"How Can We Reduce Household Waste?,"** compare the PROBLEM with a SOLUTION, then explain the lesson.

MODEL ANSWER

The Problem: The author argues that Americans create a great deal of household waste. The average person throws away about 4.5 pounds of trash every day, and added up, that comes to about 164 million tons each year. This waste includes paper, plastic, metal, and glass; food and yard waste; cleaning products; and e-waste. When all of this trash goes into landfills, it harms the environment. **A Solution:** The author explains that people can solve the problem by reducing, reusing, recycling, and composting. When we reduce, or lower, the number of things we use and throw away, and when we recycle and reuse waste, we keep these materials out of landfills. **The Lesson:** The problem of waste is huge, but the solution starts with each person. If everyone takes responsibility for reducing, reusing, and recycling, the amount of household waste can go down. **What this shows:** Caring for the planet means taking responsibility for the waste we create, because small actions by many people can solve a big problem.

KEYWORDS (3)

problem = people create a great deal of household waste that harms landfills

solution = reduce, reuse, recycle, and compost

lesson = each person taking responsibility can solve a big problem

SCORING NOTES

- Full credit (3): the problem (too much waste) + a solution (reduce/reuse/recycle/compost) + the lesson about responsibility.
- Partial (2): names the problem or a solution, but not both.
- Minimal (1): only "recycle more" with no problem or lesson.

TEACHING STEPS

Step 1 · Two columns.

강사: *"Make two columns: The Problem / A Solution."*

코멘트. 두 칸 — 문제 / 해결책.

Step 2 · Find the number.

강사: *"Underline how much trash one person throws away each day."*

코멘트. 한 사람이 하루에 버리는 쓰레기 양에 밑줄.

Step 3 · Lesson sentence.

강사: *"Finish: 'If everyone ____, then ____.'"*

코멘트. 문장 완성 — '모두가 ____한다면, ____.'

STUDENT PROMPTS

- "Why does the author begin with a big number, like 4.5 pounds a day?"
  저자는 왜 하루 4.5파운드 같은 큰 숫자로 시작할까?

- "What is the difference between reduce, reuse, and recycle?"
  reduce·reuse·recycle의 차이는 무엇일까?

DIFFERENTIATION

Q4 Change DOK 3

In **"Seeds of Change,"** show the CHANGE in Wangari, then explain the lesson it teaches.

MODEL ANSWER

Wangari as a Girl: Wangari Maathai grows up in rural Kenya, deeply tied to her family and the land. At the mugumo tree, her mother whispers, "Feel," and Wangari smooths her small hands over the rough bark. Her mother teaches her to revere the tree, which is "home to many" and "feeds many, too." Wangari is smart and a hard worker, and as she grows she becomes an excellent student who studies science. **Wangari as a Leader:** Wherever Wangari goes, she carries her family and her village with her. The love of the land she learned as a child does not fade. She grows up to protect the environment of her country. **The Lesson:** Wangari changes from a girl who loves one sacred tree into a leader who helps protect the natural world, but the seed of that change was planted in her childhood. The lesson is that one person's care for nature can plant "seeds of change" that grow over time. **What this shows:** A single person, rooted in love of family and the land, can create a great change that helps protect the environment for everyone.

KEYWORDS (3)

- as a girl = loves her family and the sacred mugumo tree
- as a leader = grows up to protect the environment of her country

강사: *"Finish: 'Wangari changed from ___ into ___, and this teaches ___.'"*

코멘트. 문장 완성 — '왕가리는 ____에서 ____으로 변했고, 이는 ____을 가르쳐 준다.'

Q5 Inquiry DOK 4

Essential Question: What can people do to care for our planet? Use ideas from TWO of the selections in this module to answer.

MODEL ANSWER

There are many things people can do to care for our planet. In **"Luz Sees the Light,"** Luz learns to use less energy and become more self-sufficient, and she works with her friends and neighbors to turn an abandoned lot into a neighborhood park. This shows that people can care for the planet by changing their everyday habits and acting together. In **"How Can We Reduce Household Waste?,"** the author explains that Americans create a great deal of waste, but people can reduce, reuse, recycle, and compost to keep materials out of landfills. This shows that people can care for the planet by taking responsibility for the waste they create. **My Big Idea:** As Lady Bird Johnson said, "The environment is where we all meet... it is the one thing all of us share." To care for our planet, people can make better daily choices — using less energy, working together, and reducing and recycling waste. When each person takes responsibility, small actions add up to protect the world we all share.

KEYWORDS (3)

- Luz Sees the Light = use less energy and work together for the community
- Household Waste = reduce, reuse, recycle, and compost
- Big Idea: each person taking responsibility protects the shared planet

SCORING NOTES

- Full credit (4): two selections named + a planet-care idea from each + a Big Idea answering the EQ.
- Partial (3): two selections + ideas, Big Idea weak.
- Developing (2): one selection only.
- Minimal (1): generic ("help the Earth") without naming a selection.

SYNTHESIS FRAME

SELECTION 1 IDEA	CONNECTING WORD	SELECTION 2 IDEA
Name a planet-care idea: Luz Sees the Light = use less energy and build a community park; On Sea Turtle Patrol = volunteer to protect endangered sea turtles; How Can We Reduce Household Waste? = reduce, reuse, recycle, and compost; Seeds of Change = protect and restore the land like Wangari Maathai.	BOTH / AND — joins two selections (for example Luz Sees the Light AND Household Waste) into one Big Idea answering "What can people do to care for our planet?"	A different selection than Selection 1 — so the two show two different ways people can care for the planet.

RUBRIC

LEVEL	WHAT IT LOOKS LIKE
Exceeding (4)	Names 2 selections + a planet-care idea from each + a Big Idea answering the EQ.
Meeting (3)	Names 2 selections + an idea for each + a Big Idea.
Approaching (2)	Names 2 selections but only retells facts — no clear answer to the EQ.
Beginning (1)	Generic ("help the Earth") without text evidence.

Watch out: Many G4 students will just list facts (people throw away 4.5 pounds a day; some turtles are endangered) and stop. Push them to turn each fact into an ACTION people can take — use less energy, protect an animal, reduce and recycle waste, plant trees — and to write a Big Idea. The EQ asks what people can DO, not just what the texts say.

TEACHING STEPS

Step 1 · Two selection cards.

강사: *"Pick 2 selections. For each, name one way it shows people caring for the planet."*

코멘트. 선택지 둘 — 각각 지구를 돌보는 방법 하나 적기.

Step 2 · Turn it into an action.

강사: *"Under each, write one thing a person could actually do."*

코멘트. 각각 아래 — 실제로 할 수 있는 행동 하나 적기.

Step 3 · Big Idea sentence.

강사: *"Write one sentence answering the EQ. Use both selections."*

코멘트. EQ에 답하는 한 문장 — 두 선택지 모두 사용.

STUDENT PROMPTS

- "What way to care for the planet does each selection you chose show?"
  고른 선택지마다 지구를 돌보는 어떤 방법을 보여 주니?
- "How can a fact from the text become something people DO?"
  글 속 사실을 어떻게 '실천'으로 바꿀 수 있을까?
- "Why does Lady Bird Johnson's quote fit this module?"
  레이디 버드 존슨의 인용문이 왜 이 모듈에 어울릴까?

DIFFERENTIATION

STRUGGLING Sentence frame: "In ____, I learned people can ____. In ____, I learned people can ____. To care for the planet, we can ____."

문장 골격 제공.

ADVANCED Use THREE selections and sort the ideas (save energy / protect animals / reduce waste / plant and restore land).

선택지 셋 사용 — 아이디어를 종류별로 분류.

COMMON MISCONCEPTIONS

PITFALL "Listing facts answers the EQ." The EQ asks what people can DO to care for the planet, not just what the texts say.

사실 나열은 EQ 답이 아님 — '무엇을 할 수 있는가'를 물음.

PITFALL "The quote is by a story author." It is the module EPIGRAPH, by Lady Bird Johnson, not a story author.

인용문은 이야기 작가의 말이 아님 — 모듈 에피그래프(레이디 버드 존슨).
