Module Overview

Essential Question: What role does curiosity play in exploration?
Quote: "Man cannot discover new oceans unless he has the courage to lose sight of the shore." — André Gide
Big Idea Words (4): chronology, expedition, progress, incredible
Main Selections (workbook 4):

- Into the Unknown: Above and Below · Stewart Ross (illustrated by Stephen Biesty) · Informational Text (RI)
- Great Discoveries and Amazing Adventures · Claire Llewellyn · Informational Text (RI)
- SpaceShipOne · Matthew Stinemetze (as told to Naomi Wallace) · Autobiography (RI)
- The Mighty Mars Rovers: The Incredible Adventures of Spirit and Opportunity · Elizabeth Rusch · Narrative Nonfiction (RI)

Note. The SoT lists 29 core vocabulary items on Worksheet A (4 Big Idea + 6 Into the Unknown + 5 Great Discoveries + 6 SpaceShipOne + 8 The Mighty Mars Rovers), in myBook appearance order. This G5 Teacher's Guide labels each selection's panel "Critical Vocabulary" — the string "Power Words" does not appear in the source. The teacher "Vocabulary Strategy" boxes (Into the Unknown: accompanied, gash; Great Discoveries: retreat, gorge; SpaceShipOne: intensified, consolation; The Mighty Mars Rovers: friction, abrasion, traversed) are NOT counted as core vocabulary. "A Few Who Dared" is the module's Big-Idea Short Read / Biography (no Critical Vocabulary panel) and carries the 4 Big Idea Words; it is excluded from the per-selection workbook units. This module is ENTIRELY INFORMATIONAL: all four vocabulary-bearing selections are informational (RI), so every B-section item uses RI.5 codes and there is no literary (RL) selection.

Answer Distribution (81 Multiple-Choice Items)

Verified counts across Worksheets A (29), B (32), and D (20). Worksheet C is open-response IB and not counted in MCQ balance.

A · 21 · B · 20 · C · 20 · D · 20

These four totals are the count of correct-answer LETTERS (A/B/C/D) across all 81 multiple-choice items — exactly 21 are "A", 20 are "B", 20 are "C", and 20 are "D". Within each worksheet: Worksheet A = 8 A / 7 B / 7 C / 7 D (29), Worksheet B = 8 / 8 / 8 / 8 (32), Worksheet D = 5 / 5 / 5 / 5 (20). Correct-answer positions are SHUFFLED, not cycled — there is no A-B-C-D repeating pattern in any section. Correct-answer meanings and option texts are preserved from the Source of Truth; only choice order is rotated to balance the letters.

Voca Trap Items (Worksheet A)

9 of 29 = 31%, all flagged below. Trap pattern: opposite-meaning / wrong-field baits drawn from the natural meaning field of each word — no hallucination.

- Q4 **incredible** — opposite bait ("dull and easy to forget," "ordinary and expected") vs. "so amazing that it is hard to believe"
- Q5 **vast** — opposite bait ("tiny and hard to see") vs. "very large"
- Q8 **ascend** — opposite bait ("sink down to the bottom") vs. "go up"
- Q10 **forged** — wrong-field bait ("left to rust," "made of soft paper") vs. "heated in a furnace and hammered into shape"
- Q13 **precious** — opposite bait ("worthless and easily thrown away," "common and found everywhere") vs. "has value and should be treated with care"
- Q15 **ruthless** — opposite bait ("gentle and kind," "helpful and generous") vs. "shows no compassion and is very cruel"
- Q23 **transition** — opposite bait ("everything stays exactly the same") vs. "one thing changes to something else"
- Q25 **resembled** — opposite bait ("kept far apart," "moved in opposite directions") vs. "looked like each other"
- Q29 **ailing** — opposite bait ("healthy and working perfectly," "brand new and powerful") vs. "not doing well or getting weak"

Source-of-Truth Verification

Into Reading · Grade 5 · Module 7 · For Teacher Use

VERIFIED

How Every Item Is Grounded

Every item on this Answer Key traces to the Source-of-Truth JSON for G5 Module 7, built from the Teaching Pal OCR (4,460 lines, 35 spread-pages) and verified against the PDF intro spreads (every Critical Vocabulary panel was read from a high-resolution crop, and each panel's rounded bottom corner was confirmed so no words are cut off). This OCR has no back-of-book Glossary, so all definitions come from the inline myNotes glosses, with two (precious, international) recovered by zoom-reading the printed gloss boxes. No characters, words, events, statistics, or dates outside the Source of Truth were added.

- **Vocabulary (Worksheet A):** all 29 words come from the module's Big Idea Words (4: chronology, expedition, progress, incredible) and the four "Critical Vocabulary" panels — Into the Unknown 6, Great Discoveries 5, SpaceShipOne 6, The Mighty Mars Rovers 8. Each meaning is taken from the inline myNotes glosses. The teacher Vocabulary Strategy boxes are deliberately NOT counted as core vocabulary.
- **Terminology:** this G5 Teacher's Guide labels each panel "Critical Vocabulary," not "Power Words" — the workbook uses that exact label, matching the source.
- **Reading (Worksheet B):** the 32 items use RI.5 codes only, because all four anchor selections are informational. Each correct answer is grounded in the Source of Truth; distractors are SoT-anchored, never invented. RI.5.4 and RI.5.7 are not used, no RL.5 codes appear, and there are no "from the text" snippet boxes.
- **Genre & credits:** Into the Unknown: Above and Below = Informational Text (by Stewart Ross, illustrated by Stephen Biesty; the real Piccard family — Auguste and Jacques — and Don Walsh); Great Discoveries and Amazing Adventures = Informational Text (by Claire Llewellyn; Machu Picchu / Hiram Bingham, the Lascaux caves, the Terra-Cotta Army / Yuan Zhongyi / Emperor Qin Shi Huangdi); SpaceShipOne = Autobiography (by Matthew Stinemetze as told to Naomi Wallace; the real spacecraft, the White Knight, Mike Melvill, Burt Rutan); The Mighty Mars Rovers = Narrative Nonfiction (by Elizabeth Rusch; NASA's Spirit and Opportunity, Steve Squyres, Scott Maxwell, Jim Rice). Only the OCR-excerpted text was used; no outside facts, figures, or dates were added.
- **IB (Worksheet C):** the PYP concepts — Curiosity, Discovery, Perseverance, Courage, Inquiry — follow the Source-of-Truth Essential Question ("What role does curiosity play in exploration?") and the module's Knowledge Focus. The Essential Question text on Q5 matches the workbook word for word. Korean teacher guidance appears in Section C only; Sections A, B, and D are in English. No model answer adds a fact, statistic, or date outside the source — the IB model answers describe only what the OCR-excerpted selections actually show.
- **MAP (Worksheet D):** four NEW passages (189 / 196 / 201 / 205 words), RIT 205→225, Lexile 620L–960L. None recall the four anchor selections; each is a different text on an exploration-and-discovery theme (a cave behind a waterfall, deep-sea explorer machines, a night-sky club, why we send robots to explore). Two are short narratives (Passages 1 and 3) and two are informational (Passages 2 and 4).
- **Answer balance:** 81 multiple-choice items distribute as 21 "A" / 20 "B" / 20 "C" / 20 "D"; positions are shuffled (no A-B-C-D cycle); every meaning is preserved from the Source of Truth.

MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Cave Behind the Waterfall · **189 words** · Lexile 620–700L · RIT 205–211
- Passage 2 · How Deep-Sea Explorers See in the Dark · **196 words** · Lexile 740–840L · RIT 211–217
- Passage 3 · The Night Sky Club · **201 words** · Lexile 760–860L · RIT 217–222
- Passage 4 · Why We Send Robots to Explore · **205 words** · Lexile 860–960L · RIT 219–225

Word counts match the workbook passage meta exactly. All four within target band 160–230 words; RIT 205→225; Lexile 620L–960L. Each passage is on an exploration theme, matching this module's focus. Passages are NEW — no recall of the four anchor selections.

What This Module Does NOT Contain (Guardrails)

- No "Power Words" label — the G5 source says "Critical Vocabulary."
- No Worksheet E — this workbook series uses four worksheets (A · B · C · D).
- The module quote is by André Gide (a real French Nobel-laureate author) and is the EPIGRAPH only — it is NOT a story author.
- "A Few Who Dared" is the Big-Idea Short Read / Biography (no Critical Vocabulary panel) and is excluded from the per-selection units; it carries the 4 Big Idea Words instead. Its author is unverified — no byline in the source.
- Critical Vocabulary counts are 6 / 5 / 6 / 8 = 25, not evened out. Big Idea (4) + Critical (25) = 29 total. The Mighty Mars Rovers genuinely has the longest panel (8 words).
- The opener Get Curious video is "A Hero's Journey" — a separate opener video. This module has NO in-module video selection; one is not invented.
- The topic strand is "SCIENCE CONNECTION: Exploration and Discovery." Other modules (Module 8 "A New Home," etc.) are OUT OF SCOPE and are not conflated with any Module-7 selection.
- No outside facts were invented. Auguste Piccard, Jacques Piccard, and Don Walsh are real; the 1931 stratosphere balloon record and the 1960 Trieste dive to the Challenger Deep are historical. Hiram Bingham and Machu Picchu, the Lascaux caves, and the Terra-Cotta Army (Yuan Zhongyi, Emperor Qin Shi Huangdi) are real. SpaceShipOne, the White Knight, Mike Melvill, Burt Rutan, and the Smithsonian are real. NASA's Spirit and Opportunity, Steve Squyres, Scott Maxwell, and Jim Rice are real. Only SoT-verified facts are used; no invented dates beyond those in the source.
- Performance Task = "Write an Expository Essay."

Worksheet A — Vocabulary · Answer Key

29 items · CCSS L.5.4 / L.5.5 / L.5.6

BIG IDEA WORDS

Q1 L.5.6

chronology

C

Meaning: a chronology records the time and order of a series of events. **Source:** SoT Big Idea Word — Vocabulary Card 7.1. *Distractors give price / weather / country names.*

Q2 L.5.6

expedition

A

Meaning: an expedition is a trip that has a purpose, such as exploration or research. **Source:** SoT Big Idea Word 7.2. *Distractors stay in the travel field (a stroll near home; a map drawn afterward; a travelers' rest stop) — none is a purposeful trip.*

Q3 L.5.6

progress

D

Meaning: to make progress is to improve or complete steps toward reaching a goal. **Source:** SoT Big Idea Word 7.3. *Distractors give turn back / forget / stay still.*

Q4 L.5.5 TRAP

incredible

B

Meaning: something incredible is so amazing that it is hard to believe. **Source:** SoT Big Idea Word 7.4. **Trap:** A/B-style baits give the opposite (dull and easy to forget; ordinary).

CRITICAL VOCABULARY · INTO THE UNKNOWN: ABOVE AND BELOW

Q5 L.5.5 TRAP

vast

A

Evidence: SoT — "Something vast is very large" (inline myNotes). Body: "that vast blue canopy above the clouds." **Trap:** bait gives the opposite (tiny and hard to see).

Q6 L.5.4

mariners

C

Evidence: SoT — "Mariners are people, such as sailors, who navigate ships" (inline myNotes). Body: "not steely soldiers or hardy mariners." *Distractors are other explorer roles (soldiers who guard a fort; weather scientists; balloon pilots) — none navigates ships.*

Q7 L.5.4

cosmic

B

Evidence: SoT — "Something that is cosmic is beyond Earth and its atmosphere" (inline myNotes). Body: "new theories about the cosmic rays." *Distractors give underground / only water / too small.*

Q8 L.5.5 TRAP

ascend

D

Evidence: SoT — "To ascend is to go up" (inline myNotes). Body: "how could Piccard ascend to seven and a half miles?" **Trap:** bait gives the opposite (sink down to the bottom).

Q9 L.5.4

principle

A

Evidence: SoT — "A scientific principle is a rule that explains how something in the natural world works" (inline myNotes). Body: "The same principle applies to the pressurized cabins." *Distractors stay in the science-method field (a one-time experiment; an untested guess) plus the principal/principle homophone (school leader) — none is a natural-world rule.*

Q10 L.5.5 TRAP

forged

C

Evidence: SoT — "A metal object that was forged was heated in a special furnace and hammered into shape" (inline myNotes). Body: "its walls were forged in steel." **Trap:** baits give wrong-field meanings (left to rust; soft paper).

Note. By myBook order, the Into the Unknown panel is vast, mariners, cosmic, ascend, principle, forged — 6 words (Q5–Q10). The Great Discoveries panel begins on Q11 below.

CRITICAL VOCABULARY · GREAT DISCOVERIES AND AMAZING ADVENTURES

Q11 L.5.4

ransacked

B

Evidence: SoT — "If someone ransacked a place, that person damaged it while looking for something" (inline myNotes). Body: "invaded the region and ransacked many Inca cities." *Distractors give cleaned / painted / built.*

Q12 L.5.4

outskirts

D

Evidence: SoT — "The outskirts of a city or town are its outer edges, farthest away from the center" (inline myNotes). Body: "On the outskirts of the city the steep hillsides were terraced." *Distractors give downtown towers / main street / residents.*

Q13 L.5.5 TRAP

precious

A

Evidence: SoT — "Something that is precious has value and should be treated with care" (gloss recovered from the printed page). Body: "damaged the precious paintings." **Trap:** baits give the opposite (worthless; common).

Q14 L.5.4

authorities

C

Evidence: SoT — "Authorities are the people in charge, who have the power to make decisions or give orders" (inline myNotes). Body: figurines "were sent to the authorities." *Distractors give tourists / books / painters.*

Q15 L.5.5 TRAP

ruthless

B

Evidence: SoT — "Someone who is ruthless shows no compassion for other people and is very cruel" (inline myNotes). Body: "a leader, conqueror, and ruthless tyrant." **Trap:** baits give the opposite (gentle and kind; helpful and generous).

Note. By myBook order, the Great Discoveries panel is ransacked, outskirts, precious, authorities, ruthless — 5 words (Q11–Q15). The SpaceShipOne panel begins on Q16 below.

CRITICAL VOCABULARY · SPACESHIPONE

Q16 L.5.4

ignited

A

Evidence: SoT — "Something that ignited caught fire or exploded" (inline myNotes). Body: "He ignited his rocket engine and shot almost straight up." *Distractors give cold water / floated / melted.*

Q17 L.5.4

hybrid

D

Evidence: SoT — "Something can be described as hybrid if it is made up of two or more different things" (inline myNotes). Body: "a hybrid rocket fueled by a mixture of two substances." *Distractors give one material / too old / one color.*

Q18 L.5.4

synthetic

C

Evidence: SoT — "A synthetic item is artificial rather than natural" (inline myNotes). Body: fuel of "laughing gas and synthetic rubber." *Distractors give grown in a garden / found in the wild / made of stone.*

Q19 L.5.4

exhaust

B

Evidence: SoT — "Exhaust is the gas that comes out of an engine as a waste product" (inline myNotes). Body: rocket boosters and their heat/exhaust. *Distractors give fuel / pilot's seat / metal frame.*

Q20 L.5.4

physics

A

Evidence: SoT — "Physics is the scientific study of matter and energy" (inline myNotes). Body: "the subjects that helped him land his job were math, physics, science, and art." *Distractors give languages / plants / music.*

Q21 L.5.4

institution

D

Evidence: SoT — "An institution is an organization that has a particular focus or goal" (inline myNotes). Body context: ending up in the Smithsonian institution. *Distractors stay near the organization field (a lone worker; a rule members obey; an empty building) — none is an organization with a goal.*

Note. By myBook order, the SpaceShipOne panel is ignited, hybrid, synthetic, exhaust, physics, institution — 6 words (Q16–Q21). The Mighty Mars Rovers panel begins on Q22 below.

CRITICAL VOCABULARY · THE MIGHTY MARS ROVERS

Q22 L.5.4

deploy

B

Evidence: SoT — "If you deploy something, you move it into position so it can be used" (inline myNotes). Body: "if they didn't deploy, the spacecraft would be smashed." *Distractors give take apart / hide / leave in a box.*

Q23 L.5.5 TRAP

transition

C

Evidence: SoT — "In a transition, one thing changes to something else" (inline myNotes). Body: "the transition from flight operations to surface operations." **Trap:** bait gives the opposite (everything stays the same).

Q24 L.5.4

expanse

A

Evidence: SoT — "An expanse is a very large area of land, sea, or sky" (inline myNotes). Body: "The red, rocky expanse resembled the Mojave Desert." *Distractors give narrow crack / small box / short message.*

Q25 L.5.5 TRAP

resembled

D

Evidence: SoT — "If two things or people resembled each other, they looked like each other" (inline myNotes). Body: "The red, rocky expanse resembled the Mojave Desert." **Trap:** baits give the opposite (kept far apart; moved in opposite directions).

Q26 L.5.4

terrain

B

Evidence: SoT — "The terrain of an area is what the surface of the land looks like" (inline myNotes). Body: "Spirit traversed the sandy Martian terrain." *Distractors give weather / residents / a name.*

Q27 L.5.4

international

C

Evidence: SoT — "Something that is international is shared or worked on by multiple countries" (gloss recovered from the printed page). Body: "The International Astronomical Union." *Distractors give kept in one home / glass and steel / one day.*

Q28 L.5.4

transmitted

A

Evidence: SoT — "When an electronic message is transmitted, it is sent from one place to another" (inline myNotes). Body: "Spirit transmitted gibberish for two minutes." *Distractors give erased / printed / folded away.*

Q29 L.5.5 TRAP

ailing

D

Evidence: SoT — "When someone or something is ailing, they are not doing well or are getting weak" (inline myNotes). Body: "struggled to fix the ailing rover." **Trap:** baits give the opposite (healthy and working; brand new and powerful).

Note. By myBook order, the Mighty Mars Rovers panel is deploy, transition, expanse, resembled, terrain, international, transmitted, ailing — 8 words (Q22–Q29).

Worksheet B — Reading Comprehension · Answer Key

32 items · CCSS RI.5.1 / .2 / .3 / .5 / .6 / .8

Selection 1 · Into the Unknown: Above and Below

INFORMATIONAL TEXT · STEWART ROSS (ILLUS. STEPHEN BIESTY) · 8 ITEMS

Q1 RI.5.2

C

Central Idea/Gist: the text is about the Piccard family's record journeys to the heights of the sky and the depths of the sea (SoT characters note + theme). *Others name a different selection.*

Q2 RI.5.1

A

Key Detail: SoT — unlike earlier adventurers, "they were not steely soldiers or hardy mariners; rather, they were scientists." *Others off-text.*

Q3 RI.5.3

D

Relationships: SoT — Auguste "grew interested in new theories about the cosmic rays" and "decided to go and observe them directly." *Others off-text.*

Q4 RI.5.3

B

Relationships: SoT — once sealed, the cabin "became airtight, so the pressure inside remained constant," with an oxygen supply to breathe. *Others off-text.*

Q5 RI.5.3

D

Relationships: SoT — on the 1931 FNRS flight, "Piccard and his assistant, Paul Kipfer, had reached a world-record 51,775 feet" in the stratosphere. *Others off-text.*

Q6 RI.5.8

A

Reasons/Evidence: SoT — in the deep seas, water "may weigh a crushing" amount, "enough to squash an ordinary submarine like an empty soda can." *Others off-text.*

Q7 RI.5.5

C

Text Structure: SoT GENRE STUDY — informational text in chronological order with cutaway diagrams (gondola, ocean-floor descent), maps, and content-area words. *Others name the wrong structure.*

Q8 RI.5.2

B

Central Idea: scientific curiosity and courage drove the Piccards to explore the most extreme heights and depths of our world (SoT theme). *A/C/D are details, not the central idea.*

Selection 2 · Great Discoveries and Amazing Adventures

INFORMATIONAL TEXT · CLAIRE LLEWELLYN · 8 ITEMS

Q9 RI.5.2

D

Summary/Gist: SoT — hidden marvels and lost treasures that explorers and archaeologists uncovered (Machu Picchu, Lascaux, the Terra-Cotta Army). *Others name a different selection.*

Q10 RI.5.3

B

Relationships: SoT — in 1911 Hiram Bingham led an expedition that brought the "lost" Inca city of Machu Picchu to the world's attention. *Others off-text.*

Q11 RI.5.3

A

Relationships: SoT — "When their dog fell through a crack in some rocks, the boys went to rescue it and found that the hole led to a cavern." *Others off-text.*

Q12 RI.5.1

C

Key Detail: SoT — archaeologist Yuan Zhongyi "was sent" to investigate and uncovered the Terra-Cotta Army of Emperor Qin Shi Huangdi. *Others off-text.*

Q13 RI.5.3

A

Relationships: SoT — crowds of visitors "dampened the cave walls and damaged the precious paintings." *Others off-text.*

Q14 RI.5.6

D

Point of View/Craft: SoT GENRE STUDY — informational texts use central ideas "supported by relevant details, including facts and quotations." *Others off-purpose.*

Q15 RI.5.5

B

Text Structure: SoT GENRE STUDY — organized with headings and subheadings, each discovery told with photographs and captions. *Others name the wrong structure.*

Q16 RI.5.2

C

Central Idea: curiosity and persistence lead explorers to uncover hidden treasures that connect us with ancient peoples (SoT theme). *A/B/D are details, not the central idea.*

Selection 3 · SpaceShipOne

AUTOBIOGRAPHY · MATTHEW STINEMETZE (AS TOLD TO NAOMI WALLACE) · 8 ITEMS

Q17 RI.5.2

B

Summary/Gist: SoT — a team that built and flew a private spacecraft to the edge of space and back. *Others name a different selection.*

Q18 RI.5.6

D

Point of View: SoT GENRE STUDY — an autobiography is told by the person it is about, using first-person pronouns such as I, me, my, and we. *Others off-genre.*

Q19 RI.5.3

A

Relationships: SoT — SpaceShipOne "attached to the belly of a mother ship, the White Knight," which carried it up. *Others off-text.*

Q20 RI.5.3

C

Relationships: SoT — "Once released from the mother ship... He ignited his rocket engine and shot almost straight up into outer space." *Others off-text.*

Q21 RI.5.1

A

Key Detail/Evidence: SoT — "a hybrid rocket fueled by a mixture of two substances — in this case, laughing gas and synthetic rubber." *Others off-text.*

Q22 RI.5.6

C

Point of View/Purpose: SoT — the narrator's own words ("We are at the beginning of something huge... the space race is here to stay") share his point of view on why the flight was historic. *Others off-purpose.*

Q23 RI.5.3

D

Relationships: SoT — "the subjects that helped him land his job were math, physics, science, and art." *Others off-text.*

Q24 RI.5.2

B

Central Idea: curiosity, teamwork, and hard work made private space exploration possible and historic (SoT theme). *A/B/D are details, not the central idea.*

Selection 4 · The Mighty Mars Rovers

NARRATIVE NONFICTION · ELIZABETH RUSCH · 8 ITEMS

Q25 RI.5.2

A

Central Idea/Gist: SoT — a scientist and his team sending twin robots, Spirit and Opportunity, to explore Mars. *Others name a different selection.*

Q26 RI.5.3

D

Relationships: SoT — "astronomy professor Steve Squyres envisioned a robotic geologist that could explore Mars and collect data to send back to Earth." *Others off-text.*

Q27 RI.5.3

B

Relationships: SoT — if the lander "didn't pass through the atmosphere just right, it would burn up from friction," and if the parts "didn't deploy, the spacecraft would be smashed to a million pieces." *Others off-text.*

Q28 RI.5.3

C

Relationships: SoT — "Mission Control exploded with hugs, cheers, and tears... Then everything stopped. The signal was lost." *Others off-text.*

Q29 RI.5.8

A

Reasons/Evidence: SoT — "Evidence pointed again and again to the existence at some time of a flowing, salty body of water on Mars... It was undeniable!" *Others off-text.*

Q30 RI.5.5

C

Text Structure: SoT GENRE STUDY — narrative nonfiction "gives factual information in a way that reads like a story," in chronological order with real people's feelings. *Others name the wrong structure.*

Q31 RI.5.6

D

Point of View/Craft: SoT — including the team's "hugs, cheers, and tears" and lost-signal worry lets readers feel the suspense and how much the people cared. *Others off-purpose.*

Q32 RI.5.2

B

Central Idea: patience, persistence, and curiosity drive the scientific exploration of Mars (SoT theme). *A/C/D are details, not the central idea.*

Worksheet C — IB Critical Thinking · Answer Key

5 questions · PYP Key Concepts · DOK 2–4

Q1 Curiosity DOK 3

In **"Into the Unknown: Above and Below,"** the Piccards explored places no one had reached. Show a question that made them curious and the danger they faced, then explain how curiosity led to discovery.

MODEL ANSWER

A Question That Made Them Curious: By the early 1930s, people had mapped nearly all of Earth's land, and some said there was nowhere new to go. But the Piccards still wondered what lay in the stratosphere, "that vast blue canopy above the clouds," and what was hidden in the deepest, darkest oceans. Auguste Piccard, a professor of physics, grew curious about the cosmic rays believed to be active high in the sky and decided to go and observe them directly. **A Danger They Faced:** Both the heights and the depths were deadly. The air in the stratosphere is so thin that there is not enough oxygen to breathe, and in the deepest seas the water can press hard enough to crush an ordinary submarine. Earlier balloonists who tried to rise high had nearly died. **How curiosity led to discovery:** Because they were curious enough to face these dangers, the Piccards built careful machines — a sealed balloon cabin and, later, a deep-sea craft — and traveled where no one had gone. Auguste reached a world-record height in the stratosphere, and the family became known for exploring both the heights and depths of the world. **What this shows:** Curiosity gave the Piccards the reason to take great risks, and that curiosity led them to discoveries no one had made before.

KEYWORDS (3)

- question = what lay in the stratosphere and the deep ocean; cosmic rays
- danger = thin air with no oxygen; deep-sea pressure that crushes submarines
- curiosity led to discovery = built careful machines and reached record heights

SCORING NOTES

- Full credit (3): a real question + a real danger + how curiosity led to discovery, using the word *curiosity*.
- Partial (2): names a question and a danger but no clear link to discovery.
- Minimal (1): only "they explored" with no question or danger.

TEACHING STEPS

Step 1 · Two boxes.

강사: *"Label two boxes: A Question That Made Them Curious, A Danger They Faced."*

코멘트. 상자 두 칸 — 그들을 궁금하게 만든 질문 · 그들이 마주한 위험.

Step 2 · Find the danger.

강사: *"Underline the sentence about thin air in the sky or crushing pressure in the deep sea."*

코멘트. 하늘의 희박한 공기 또는 깊은 바다의 짓누르는 압력에 관한 문장에 밑줄.

Step 3 · Curiosity sentence.

강사: *"Finish: 'Curiosity led to discovery because ____.'"*

코멘트. 문장 완성 — '호기심이 발견으로 이어진 이유는 ____.'

STUDENT PROMPTS

- "What did the Piccards wonder about?"
  피카르 부자는 무엇을 궁금해했을까?
- "Why were the sky and the deep sea so dangerous?"
  하늘과 깊은 바다는 왜 그렇게 위험했을까?
- "How did being curious help them discover something new?"
  호기심이 그들이 새로운 것을 발견하는 데 어떻게 도움이 됐을까?

DIFFERENTIATION

STRUGGLING Match 2 cards ("What is in the stratosphere?" / "the air is too thin to breathe") to question and danger.

카드 2장 — '성층권에는 무엇이 있을까?'와 '공기가 너무 희박해 숨 쉴 수 없다'를 질문·위험과 매칭.

ADVANCED Explain why scientists, not soldiers, were the ones who made these journeys.

군인이 아니라 과학자들이 이 여정을 해낸 이유 설명.

COMMON MISCONCEPTIONS

PITFALL "There was nothing left to explore." Some people said so, but the sky and deep sea were still unknown.

탐험할 곳이 없다는 말은 틀림 — 하늘과 깊은 바다는 여전히 미지의 영역이었음.

PITFALL "The Piccards explored only for fun." Auguste wanted to study cosmic rays — it was scientific curiosity.

단순한 재미가 아님 — 오귀스트는 우주선(cosmic rays)을 연구하려는 과학적 호기심이 있었음.

LEARNER PROFILE LINK

INQUIRERS The Piccards asked questions about the unknown and went to find the answers.

미지의 세계에 질문을 던지고 답을 찾아 나섬 — Inquirer.

RISK-TAKERS They faced deadly conditions to explore the heights and depths.

치명적인 환경을 무릅쓰고 높은 곳과 깊은 곳을 탐험 — Risk-taker.

KOREAN BRIDGE

표현 "Who knew what lay in the stratosphere, that vast blue canopy above the clouds?" → "구름 위의 저 광대한 푸른 천장, 성층권에 무엇이 있는지 누가 알았겠는가?"

호기심(Curiosity) 핵심 문장.

단어 "vast / 광대한 — cosmic / 우주의 — ascend / 올라가다 — principle / 원리"

핵심 단어 영-한.

Q2 Discovery DOK 3

In **"Great Discoveries and Amazing Adventures,"** explorers uncovered hidden treasures. Show the search and the discovery, then explain why these discoveries matter today.

MODEL ANSWER

A Search or Question: In 1911, the explorer Hiram Bingham searched the steep, terraced hillsides of Peru, looking for traces of the Inca. Long before, Spanish conquistadores had ransacked many Inca cities in search of gold, and one great city had been left hidden for centuries. **What Was Discovered:** Bingham found the "lost" Inca city of Machu Picchu, high on a mountain. The text shows other discoveries too: four French boys rescuing their dog found the Lascaux cave paintings, and the archaeologist Yuan Zhongyi uncovered the Terra-Cotta Army built for Emperor Qin Shi Huangdi. **Why these discoveries matter today:** Each discovery is a window into an ancient people. Machu Picchu shows how the Inca built and farmed in the mountains, the cave paintings show how people lived and made art long ago, and the Terra-Cotta Army shows the beliefs of ancient China. Because these are precious, people now work to protect them — crowds once damaged the precious Lascaux paintings, so they must be treated with care. **What this shows:** Curiosity and persistence led explorers to uncover hidden treasures that still connect us with ancient peoples today.

KEYWORDS (3)

search = Bingham searching Peru's hillsides for the Inca

discovery = the "lost" city of Machu Picchu; also Lascaux and the Terra-Cotta Army

why it matters = a window into ancient peoples we must protect

SCORING NOTES

- Full credit (3): a real search + a real discovery + why it matters today, with one detail.
- Partial (2): names a search and a discovery but not why it matters.
- Minimal (1): only "they found something" with no detail.

TEACHING STEPS

Step 1 · Search and discovery boxes.

강사: *"Label two boxes: A Search or Question, What Was Discovered."*

코멘트. 상자 두 칸 — 탐색·질문 / 발견한 것.

Step 2 · Find the discovery.

강사: *"Underline the sentence that names Machu Picchu or another discovery."*

코멘트. 마추픽추나 다른 발견의 이름이 나오는 문장에 밑줄.

Step 3 · Why-it-matters sentence.

강사: *"Finish: 'This discovery matters today because ____.'"*

코멘트. 문장 완성 — '이 발견이 오늘날 중요한 이유는 ____.'

STUDENT PROMPTS

- "What was Bingham looking for?"
  빙엄은 무엇을 찾고 있었을까?

- "What did the explorers discover?"
  탐험가들은 무엇을 발견했을까?
- "Why should we protect a discovery like this?"
  이런 발견을 왜 우리가 보호해야 할까?

DIFFERENTIATION

STRUGGLING Match 2 cards ("searched the hills of Peru" / "found the lost city of Machu Picchu") to search and discovery.

카드 2장 — '페루의 언덕을 탐색함'과 '잃어버린 도시 마추픽추를 발견함'을 탐색·발견과 매칭.

ADVANCED Explain why visitors had to be limited at the Lascaux caves.

라스코 동굴에서 방문객을 제한해야 했던 이유 설명.

COMMON MISCONCEPTIONS

PITFALL "Bingham built Machu Picchu." He did not build it — he brought the ancient Inca city to the world's attention.

빙엄이 마추픽추를 지은 게 아님 — 고대 잉카 도시를 세상에 알린 것임.

PITFALL "Discoveries cannot be harmed." Crowds damaged the precious Lascaux paintings, so they must be cared for.

발견물이 손상될 수 없다는 생각은 틀림 — 인파가 라스코 벽화를 훼손해 보호가 필요했음.

LEARNER PROFILE LINK

INQUIRERS Explorers and archaeologists asked questions about the past and searched for answers.

탐험가와 고고학자는 과거에 질문을 던지고 답을 탐색함 — Inquirer.

KNOWLEDGEABLE The discoveries teach us about ancient peoples around the world.

이 발견들은 세계 곳곳의 고대 민족에 대해 알려 줌 — Knowledgeable.

KOREAN BRIDGE

표현 "It was an ancient Inca city, known to locals as Machu Picchu. Bingham was overwhelmed." → "그것은 현지인들이 마추픽추라 부르던 고대 잉카 도시였고, 빙엄은 큰 감동에 휩싸였다."

발견(Discovery) 핵심 문장.

단어 "ransacked / 약탈하다 — outskirts / 변두리 — precious / 소중한 — authorities / 당국 — ruthless / 무자비한"

핵심 단어 영-한.

Q3 Perseverance DOK 3

In **"SpaceShipOne,"** a team worked hard to fly a private spacecraft. Show the steps, then explain how teamwork and effort made the flight possible.

MODEL ANSWER

The Plan: SpaceShipOne was part of a two-plane system. The spacecraft attached to the belly of a mother ship, the White Knight, which carried it high into the sky before letting it go. **The Work:** The team designed the ship and its unusual hybrid rocket, fueled by a mixture of two substances. The narrator, a project engineer, was one of the crew; he even pulled the lever that released SpaceShipOne. The subjects that helped him earn his job were math, physics, science, and art, showing how much study and skill the work took. **The Result:** Once released, the pilot ignited the rocket and shot almost straight up toward space, then returned. The narrator felt the team was "at the beginning of something huge." (SpaceShipOne is now kept in the Smithsonian institution.) **How teamwork and hard work made the flight possible:** No one person could build and fly a spacecraft alone. Designers, engineers, and pilots each did their part, and years of study and effort made a private trip to the edge of space real. **What this shows:** Curiosity, teamwork, and hard work made private space exploration possible and historic.

KEYWORDS (3)

plan = a two-plane system; the White Knight carried SpaceShipOne up

work = a hybrid rocket; a crew that studied math, physics, science, and art

result = the pilot ignited the rocket and reached the edge of space

SCORING NOTES

- Full credit (3): the plan + the team's work + the result, with one detail.
- Partial (2): names some steps but not how teamwork made it possible.
- Minimal (1): only "they flew a ship" with no detail.

TEACHING STEPS

Step 1 · Three boxes.

강사: *"Fill three boxes: The Plan, The Work, The Result."*

코멘트. 세 칸 — 계획·작업·결과. 각 칸 채우기.

Step 2 · Find the teamwork.

강사: *"Underline a sentence that shows more than one person helped."*

코멘트. 한 사람 이상이 도왔음을 보여 주는 문장에 밑줄.

Step 3 · Teamwork sentence.

강사: *"Finish: 'The flight was possible because the team ____.'"*

코멘트. 문장 완성 — '이 비행이 가능했던 것은 팀이 ____ 했기 때문이다.'

STUDENT PROMPTS

- "How did SpaceShipOne first get up into the sky?"
  스페이스십원은 처음에 어떻게 하늘로 올라갔을까?

- "What kind of work did the team do?"
  팀은 어떤 종류의 일을 했을까?
- "Why could no single person do this alone?"
  왜 이 일을 한 사람이 혼자 할 수 없었을까?

DIFFERENTIATION

STRUGGLING Put 3 cards in order: "the White Knight carries it up," "the rocket is ignited," "it reaches the edge of space."

카드 3장 순서대로 — '화이트 나이트가 실어 올림'·'로켓이 점화됨'·'우주 가장자리에 도달함'.

ADVANCED Explain why math, physics, science, AND art all helped the narrator's work.

수학·물리·과학에 더해 미술까지 그의 작업에 도움이 된 이유 설명.

COMMON MISCONCEPTIONS

PITFALL "SpaceShipOne launched straight up from the ground." A mother ship, the White Knight, carried it up first.

땅에서 곧장 발사된 게 아님 — 모선 화이트 나이트가 먼저 실어 올림.

PITFALL "One pilot did everything." A whole team of designers and engineers worked together.

조종사 한 명이 다 한 게 아님 — 설계자와 엔지니어로 이뤄진 팀이 함께함.

LEARNER PROFILE LINK

THINKERS Designing a hybrid rocket and a two-plane system took creative problem-solving.

하이브리드 로켓과 2기 시스템 설계는 창의적 문제 해결 — Thinker.

RISK-TAKERS Flying a brand-new spacecraft to the edge of space was a bold risk.

완전히 새로운 우주선을 우주 가장자리까지 띄운 것은 과감한 도전 — Risk-taker.

KOREAN BRIDGE

표현 "We are at the beginning of something huge... this time the space race is here to stay." → "우리는 거대한 무언가의 시작점에 있다... 이번에는 우주 경쟁이 계속될 것이다."

끈기(Perseverance) 핵심 문장.

단어 "ignited / 점화된 — hybrid / 혼합형의 — synthetic / 합성의 — physics / 물리학 — institution / 기관"

핵심 단어 영-한.

Q4 Courage DOK 3

In **"The Mighty Mars Rovers,"** a team faced great risks to explore Mars. Show a risk they faced and how they responded, then explain why patience and courage mattered.

MODEL ANSWER

A Risk or Setback They Faced: Landing the rovers on Mars was extremely risky. If the lander did not pass through the atmosphere just right, it would burn up from friction, and if the airbags and parts did not deploy, the spacecraft would be smashed to a million pieces. Even after a successful landing, the team's joy turned to fear when the signal was suddenly lost. Later, one rover, Spirit, began to fail — it transmitted gibberish and shut off, becoming an ailing rover. **How the Team Responded:** The team did not give up. They had imagined and built the mission for years, led by scientist Steve Squyres. When problems came, the engineers struggled to fix the ailing rover and kept guiding the mission step by step. **Why patience and courage mattered:** Patience let the team keep working through long waits, lost signals, and broken parts instead of quitting. Courage let them risk a mission that could fail at any moment. Because of this, the rovers found evidence "again and again" of a flowing, salty body of water that once existed on Mars. **What this shows:** Patience, persistence, and curiosity — along with courage — drive the scientific exploration of Mars.

KEYWORDS (3)

- risk = a landing that could burn up or be smashed; a lost signal; an ailing rover
- response = the team kept working and struggled to fix the rover
- why it mattered = patience and courage led to finding evidence of past water on Mars

SCORING NOTES

- Full credit (3): a real risk + how the team responded + why patience and courage mattered, with one detail.
- Partial (2): names a risk and a response but not why patience and courage mattered.
- Minimal (1): only "they sent robots to Mars" with no detail.

TEACHING STEPS

Step 1 · Risk and response boxes.

강사: *"Label two boxes: A Risk They Faced, How the Team Responded."*

코멘트. 상자 두 칸 — 그들이 마주한 위험·팀이 보인 대응.

Step 2 · Find the danger.

강사: *"Underline the sentence about the lander burning up or being smashed."*

코멘트. 착륙선이 타 버리거나 산산조각 날 수 있다는 문장에 밑줄.

Step 3 · Patience sentence.

강사: *"Finish: 'Patience and courage mattered because ____.'"*

코멘트. 문장 완성 — '인내와 용기가 중요했던 이유는 ____.'

STUDENT PROMPTS

- "Why was landing on Mars so dangerous?"
  화성 착륙은 왜 그렇게 위험했을까?

- "What did the team do when problems happened?"
  문제가 생겼을 때 팀은 어떻게 했을까?
- "Why did patience and courage matter for this mission?"
  이 임무에서 인내와 용기는 왜 중요했을까?

DIFFERENTIATION

STRUGGLING Match 2 cards ("the signal was lost" / "the team kept working") to risk and response.
카드 2장 — '신호가 끊겼다'와 '팀이 계속 작업했다'를 위험·대응과 매칭.

ADVANCED Explain how the team's feelings (cheers, tears, worry) show how much was at stake.
팀의 감정(환호·눈물·걱정)이 얼마나 큰 것이 걸려 있었는지 어떻게 보여 주는지 설명.

COMMON MISCONCEPTIONS

PITFALL "A person drove the rovers on Mars." The rovers are robots, guided by a team from Earth.
화성에서 사람이 로버를 운전한 게 아님 — 로버는 로봇이고 지구의 팀이 조종함.

PITFALL "The rovers found a river still flowing." The text says evidence showed water existed "at some time" — in the past.
지금 흐르는 강을 찾은 게 아님 — 본문은 '과거 어느 시점에' 물이 있었다는 증거라고 함.

LEARNER PROFILE LINK

RISK-TAKERS The team risked a mission that could fail at every step.
매 단계 실패할 수 있는 임무에 도전 — Risk-taker.

REFLECTIVE They studied the data again and again before drawing conclusions.
결론을 내리기 전 데이터를 거듭 살핌 — Reflective.

KOREAN BRIDGE

표현 "Evidence pointed again and again to the existence at some time of a flowing, salty body of water on Mars." → "증거는 화성에 과거 어느 시점에 흐르는 짠 물이 있었음을 거듭 가리켰다."
용기(Courage) 핵심 문장.

단어 "deploy / 배치하다 — transition / 전환 — expanse / 광활한 공간 — terrain / 지형 — transmitted / 전송된 — ailing / 약해지는"
핵심 단어 영-한.

Q5 Inquiry DOK 4

Essential Question: What role does curiosity play in exploration? Use ideas from TWO of the selections in this module to answer.

MODEL ANSWER

Curiosity is what starts every exploration — it gives explorers a question they cannot stop trying to answer. In **"Into the Unknown: Above and Below,"** the Piccards were curious about what lay in the stratosphere and the deepest oceans, places no one had reached. Because of that curiosity, Auguste Piccard built a special balloon to study cosmic rays and reached a world-record height, even though thin air and crushing pressure made the journeys deadly. In **"The Mighty Mars Rovers,"** scientist Steve Squyres was curious about Mars and imagined a robotic geologist that could explore it. That curiosity drove his team through risky landings and a lost signal until the rovers found evidence that water once existed on Mars. **My Big Idea:** In both selections, curiosity comes first: a strong question pushes people to take risks, build new machines, and keep going through danger and setbacks. Without curiosity, the explorers would never have looked beyond what was already known. Curiosity is the spark that turns the unknown into discovery — exactly what the Essential Question asks.

KEYWORDS (3)

- Into the Unknown = curiosity about the sky and deep sea led to record journeys
- The Mighty Mars Rovers = curiosity about Mars drove a risky robotic mission
- Big Idea: curiosity is the spark that turns the unknown into discovery

SCORING NOTES

- Full credit (4): two selections named + how curiosity drove each exploration + a Big Idea answering the EQ.
- Partial (3): two selections + curiosity's role, Big Idea weak.
- Developing (2): one selection only.
- Minimal (1): generic ("curiosity is good") without naming a selection.

SYNTHESIS FRAME

SELECTION 1 IDEA	CONNECTING WORD	SELECTION 2 IDEA
Name the selection and how curiosity drove exploration: Into the Unknown = curiosity about the sky and deep sea; Great Discoveries = curiosity that uncovered Machu Picchu and other lost treasures; SpaceShipOne = curiosity that built a private spacecraft; The Mighty Mars Rovers = curiosity that sent robots to Mars.	BOTH / IN EACH — joins two selections (for example Into the Unknown AND The Mighty Mars Rovers) into one Big Idea answering "What role does curiosity play in exploration?"	A different selection than Selection 1 — so the two together show how curiosity drives more than one kind of exploration.

REAL-WORLD CONNECTION

KOREA 호기심은 모든 탐험의 출발점이다 — 누구도 가 보지 못한 하늘·바다·우주에 대한 궁금증이 사람들을 위험을 무릅쓰고 새로운 발견으로 이끈다.

EQ와 두 작품 연결.

PERSONAL Think of one thing you were curious about that led you to learn or try something new.
호기심 때문에 새로운 것을 배우거나 시도하게 된 경험 한 가지 떠올리기.

RUBRIC

LEVEL	WHAT IT LOOKS LIKE
Exceeding (4)	Names 2 selections + how curiosity drove each exploration + a Big Idea answering the EQ.
Meeting (3)	Names 2 selections + curiosity's role in each + a Big Idea.
Approaching (2)	Names 2 selections but only retells events — no clear answer to the EQ.
Beginning (1)	Generic ("curiosity is good") without text evidence.

Watch out: Many G5 students will retell one event (the Piccards flew a balloon; the rovers landed on Mars) and stop. Push them to explain the ROLE curiosity played — the question that started the exploration — and to write a Big Idea that connects two selections. The EQ asks what role curiosity plays in exploration.

TEACHING STEPS

Step 1 · Two selection cards.

강사: *"Pick 2 selections. For each, name the question the explorers were curious about."*
코멘트. 선택지 둘 — 각각 탐험가들이 궁금해한 질문을 적기.

Step 2 · Name curiosity's role.

강사: *"Under each, write what curiosity led the explorers to do."*
코멘트. 각각 아래 — 호기심이 탐험가들을 무엇으로 이끌었는지 적기.

Step 3 · Big Idea sentence.

강사: *"Write one sentence answering the EQ. Connect both selections."*
코멘트. EQ에 답하는 한 문장 — 두 선택지를 연결.

STUDENT PROMPTS

- "In each selection you chose, what were the explorers curious about?"
  고른 작품마다 탐험가들은 무엇을 궁금해했니?
- "What did that curiosity lead them to do?"
  그 호기심은 그들을 무엇으로 이끌었을까?
- "Why is curiosity important for exploration?"
  탐험에 호기심이 왜 중요할까?

DIFFERENTIATION

STRUGGLING Sentence frame: "In ____, the explorers were curious about ____. Curiosity led them to ____. In ____, the explorers were curious about ____. Curiosity led them to ____. Curiosity is the spark of exploration."
문장 골격 제공.

ADVANCED Use THREE selections and sort the explorations into "above" (sky/space) and "below" (deep sea/underground).

선택지 셋 사용 — 탐험을 '위'(하늘·우주)와 '아래'(심해·지하)로 분류.

COMMON MISCONCEPTIONS

PITFALL "Retelling what happened answers the EQ." The EQ asks the ROLE of curiosity, not just what happened.

사건 줄거리만으로는 EQ 답이 아님 — '호기심의 역할'을 물음.

PITFALL "Explorers succeed only because of luck or money." The selections show curiosity and effort drove the discoveries.

운이나 돈만으로 성공한 게 아님 — 호기심과 노력이 발견을 이끌었음.

LEARNER PROFILE LINK

INQUIRERS Asking what curiosity does in exploration is the heart of inquiry.

탐험에서 호기심이 하는 일을 묻는 것이 탐구의 핵심 — Inquirer.

OPEN-MINDED The whole module explores the unknown above, below, and beyond.

모듈 전체가 위·아래·그 너머의 미지를 탐험 — Open-minded.

KOREAN BRIDGE

표현 "Curiosity is the spark that turns the unknown into discovery." → "호기심은 미지를 발견으로 바꾸는 불꽃이다."

M7 마무리 문장 — 학생 글쓰기 핵심.

인용 "Man cannot discover new oceans unless he has the courage to lose sight of the shore." — André Gide → "해안이 보이지 않을 만큼 멀어질 용기가 없다면 새로운 바다를 발견할 수 없다."

에피그래프 — 용기와 탐험.

Worksheet D — MAP Practice · Answer Key

20 items · RIT 205 → 225 · Lexile 620L–960L

MAP Mini-Passage Word Counts (Worksheet D)

- Passage 1 · The Cave Behind the Waterfall · **189 words** · Lexile 620–700L · RIT 205–211
- Passage 2 · How Deep-Sea Explorers See in the Dark · **196 words** · Lexile 740–840L · RIT 211–217
- Passage 3 · The Night Sky Club · **201 words** · Lexile 760–860L · RIT 217–222
- Passage 4 · Why We Send Robots to Explore · **205 words** · Lexile 860–960L · RIT 219–225

All four passages within target band 160–230 words; RIT 205→225; Lexile 620L–960L. Word counts match the workbook passage meta exactly. Each passage is on an exploration-and-discovery theme, matching this module's focus. Passages are NEW — no recall of the four anchor selections.

PASSAGE 1 · THE CAVE BEHIND THE WATERFALL

Q1 RIT 205

B

Lexile 620L · Key Detail. "Behind the curtain of falling water, there seemed to be a dark gap in the rock." *Distractors A/C/D off-text.*

Q2 RIT 207

C

Lexile 640L · Key Detail. "She remembered her grandmother's rule: never explore alone." *Trap A/B/D off-text.*

Q3 RIT 208

D

Lexile 660L · Cause & Effect. "She went home, found a flashlight, and asked her older brother to come along." *Trap A/B/C off-text.*

Q4 RIT 210

A

Lexile 685L · Inference. "She knew a place this old should be treated with care." *Trap B/C/D miss the point.*

Q5 RIT 211

C

Lexile 700L · Theme. "only her curiosity, and a careful plan, had finally led her to look closer and find something new." *A/B/D are plausible false themes that each contradict the passage (the familiar walk DID hold something new; she did not explore alone; she did not touch anything).*

PASSAGE 2 · HOW DEEP-SEA EXPLORERS SEE IN THE DARK

Q6 RIT 211

A

Lexile 740L · Key Detail. "the water there is completely dark and very cold... it would crush an ordinary submarine." *Trap B/C/D off-text.*

Q7 RIT 213

D

Lexile 770L · Key Detail. "A submersible is a small craft with thick, strong walls that can carry a crew safely into the deep." *Trap A/B/C off-text.*

Q8 RIT 214

B

Lexile 800L · Vocabulary. "Its powerful lights cut through the darkness so the crew can see the seafloor." *Trap A/C/D take the wrong meaning.*

Q9 RIT 215

C

Lexile 820L · Author's Purpose. The robot example shows new tools let people explore "without people inside," guided from a ship. *Trap A/B/D off-purpose.*

Q10 RIT 217

D

Lexile 840L · Main Idea. "Each dive reveals more of a hidden world that humans had never seen before." *A/B/C each over-claim or distort a real detail (cameras are not "most important"; animals do live there; robots have not "completely replaced" crewed craft).*

PASSAGE 3 · THE NIGHT SKY CLUB

Q11 RIT 217

B

Lexile 760L · Character. "Theo had always believed that stargazing was boring." *Trap A/C/D off-text.*

Q12 RIT 218

A

Lexile 790L · Key Detail. "Theo almost said no, but he was a little curious, so he went." *Trap B/C/D off-text.*

Q13 RIT 219

D

Lexile 820L · Cause & Effect. "Suddenly the moon filled the lens, close enough to show its craters and shadows." *Trap A/B/C off-text.*

Q14 RIT 220

C

Lexile 840L · Inference. "the more he learned, the more he wanted to know" — his curiosity had been sparked. *Trap A/B/D miss the point.*

Q15 RIT 222

A

Lexile 860L · Theme. "The sky he had once thought was boring had become the most amazing thing he had ever seen." *B/C/D are plausible false themes that each contradict the passage (the "boring" hobby became amazing; a small telescope was enough; the club met far from city lights).*

PASSAGE 4 · WHY WE SEND ROBOTS TO EXPLORE

Q16 RIT 219

C

Lexile 860L · Key Detail. "The first reason is safety. Some places are far too dangerous for humans." *Trap A/B/D off-text.*

Q17 RIT 220

B

Lexile 890L · Key Detail. "A robot does not need food, water, or sleep, so it can keep working long after a human crew would have to turn back." *Trap A/C/D off-text.*

Q18 RIT 221

D

Lexile 910L · Cause & Effect. "a robot can be much lighter and cheaper to launch," while sending a person safely "requires huge amounts of fuel and equipment." *Trap A/B/C off-text.*

Q19 RIT 223

A

Lexile 935L · Author's Purpose. Admitting robots "are not perfect" gives a fair view before the conclusion that robots still help us explore. *Trap B/C/D off-purpose.*

Q20 RIT 225

B

Lexile 960L · Main Idea. "by sending machines into the unknown, people can explore worlds that would otherwise stay beyond their reach." *A/C/D each distort the argument (the text favors robots, not against; cost is one of three reasons, not the only; robots cannot decide everything alone).*
