Directions. Read each short passage. Choose the best meaning of the bold word as it is used.

Q1 RI.5.4

Young dolphins are not born with all the skills they need. They cannot yet **fend** for themselves.

What does **fend** mean here?

- **A.** to copy whatever a parent does
- **B.** to look after a younger animal until it grows up
- **C.** to take care of yourself without help from anyone
- **D.** to sleep for a very long time

Q2 RI.5.4

Life is hard for dolphin calves. In fact, the **mortality** rate for calves is 50 percent in the first year.

What does **mortality** mean here?

- **A.** the speed of a dolphin swimming fast
- **B.** the number of babies born in a herd each year
- **C.** the rate at which members of a group die
- **D.** the first year of a young animal's life

Q3 RI.5.4

Dolphin calves are born with one special ability. They can **mimic** and mirror whatever their mother does.

What does **mimic** mean here?

- **A.** to stand up on the tail above the water
- **B.** to follow someone from place to place
- **C.** to hide deep under the sand
- **D.** to act or sound exactly like someone else

Q4 RI.5.4

The calf becomes its mother's shadow. It imitates her every move, pose, **posture**, and action.

What does **posture** mean here?

- **A.** the way a person or animal moves from place to place
- **B.** a loud sound made under the water
- **C.** the way a person or animal holds its body
- **D.** a shadow that follows close behind someone

Q5 RI.5.4

Finding food is the most important skill a mother teaches. She gives her calf **instructions** with special sounds.

What does **instructions** mean here?

- **A.** words that tell someone how to do something
- **B.** the food a mother brings to her baby
- **C.** words that praise someone for a job well done
- **D.** the sounds fish make when they are afraid

Q6 RI.5.4

Q20 RI.5.4

The bees share everything in winter. Now, in the merciless cold, we share each **morsel** of heat, each honeyed crumb.

What does **morsel** mean here?

- **A.** a loud noise
- **B.** a small piece or amount
- **C.** a huge pile
- **D.** a long rope

Q21 RI.5.4

The bees press together to stay warm. We **cram** to a sizzling ball to warm our queen, our heart, our home.

What does **cram** mean here?

- **A.** to sing a song
- **B.** to squeeze tightly into a small space
- **C.** to spread out over a wide space
- **D.** to paint a picture

Q22 RI.5.4

The bees huddle more as it gets colder. The colder it gets, the tighter they huddle, **shrinking** to a football-size mass.

What does **shrinking** mean here?

- **A.** to become smaller
- **B.** to grow larger
- **C.** to change color
- **D.** to make noise

Q23 RI.5.4

The bees make heat with their bodies. When hive temperatures drop to dangerous levels, the cluster begins to "shiver," or **flex** their flight muscles, to generate heat.

What does **flex** mean here?

- **A.** to tighten and move a muscle
- **B.** to let a muscle go limp
- **C.** to wrap a gift
- **D.** to break a bone

Q24 RI.5.4

The bees take turns being warm. While worker bees **cycle** in and out of the cluster's warm center, the queen remains at its heart.

What does **cycle** mean here?

- **A.** to stay in one spot
- **B.** to fix a wheel
- **C.** to move around in a repeating pattern
- **D.** to ride a bicycle

Q25 RI.5.4

The queen waits for spring. The queen remains at the cluster's heart, ready to **resume** her egg-laying at the first sign of spring.

What does **resume** mean here?

- **A.** to begin something brand-new
- **B.** to start again after a pause
- **C.** to stop for good
- **D.** to finish quickly

Q26 RI.5.4

The tree poem talks about letting go. Roots are deep and time is slow. All we **grasp** we must let go.

What does **grasp** mean here?

- **A.** to toss something
- **B.** to hold something tightly
- **C.** to paint something
- **D.** to let something go

Q27 RI.5.4

A science note explains trees in winter. Deciduous trees grow **like mad** while the weather is warm, but in winter they essentially shut down.

What does **like mad** mean here?

- **A.** in an angry way
- **B.** in a silly way
- **C.** very slowly or hardly at all
- **D.** very fast or very much

Q28 RI.5.4

Leafy trees shut down for winter. They shed their **luxuriant** leaves, which would freeze anyway and suck much-needed water from the tree.

What does **luxuriant** mean here?

- **A.** thin, bare, and dying
- **B.** loud and shrill
- **C.** cold and icy
- **D.** thick, full, and growing well

Q29 RI.5.4

Trees get ready for the cold. As the temperatures drop, the living tissue in the tree's trunk **undergoes** a process called hardening.

What does **undergoes** mean here?

- **A.** to fly over a tree
- **B.** to dig under the ground
- **C.** to go through a change or process
- **D.** to stay exactly the same

Q30 RI.5.4

Hardening protects the tree. In this process, cells lose water and become more **resistant** to freezing.

What does **resistant** mean here?

- **A.** able to stand up against something without being harmed
- **B.** easily hurt or damaged
- **C.** very sweet
- **D.** very colorful
